KOEHRING DANDIE

Light Mixer

Dandie Light Mixer

7 cu. ft. mixed Concrete. Two or four cylinder gasoline engine. Power charging skip, or low charging hopper and platform. Rubber tired steel disc wheels or steel rimmed wheels.

*Send back
the coupon*

VALUE
—Such as Never Before
Seen in the Light Mixer Field!

STILL within the price range for light mixers, this 7 ft. Dandie Model offers extraordinary values!

A heavy duty, four cylinder, radiator cooled gasoline engine, completely enclosed in a steel housing.

Completely enclosed transmission always running in an oil bath, and mounted on shaft revolving in roller bearings. Steel disc wheels with rubber tires or regular steel rimmed wheels. Beveled edge, chilled drum rollers, pinned to shaft which turns in big bearings! Koehring double gear drum drive!

In every bearing—every detail—you'll find the reliable Koehring construction the surest insurance of reliability and long, trouble-free service life!

Light Weight—just the balanced light weight to be hauled on its rubber tires behind your car or truck and to lose no time between job and job.

This Dandie Model has been tested and tried by *overwork* and abuse—and it's more than worthy of the Koehring name.

For high speed operation—solid, substantial construction and light weight portability—this Dandie has established new values and standards in the light mixer class.

Congress of March 3, 1879.

**STATE HARBOR COMMISSION IS
SUED FOR \$407,639**

Suit has been started in the U. S. District Court (San Francisco) against the State Board of Harbor Commissioners for \$407,639 for an alleged infringement of patent for building concrete docks and piers.

The plaintiffs in the action filed by Fisk & Randall and Garton D. Key-ston former assistant United States attorney, are W. S. Ferguson, original owner of the patent; James D. Carey, I. T. Kahn, J. S. Rubie, G. W. Feaga and Albert Lynn Lawrence. All with the exception of Lawrence now are part owners of the patent. Lawrence was elected on January 31, 1925, trustee to represent all of the owners.

The complaint alleges that Ferguson in 1903 patented the method for making concrete docks and piers, which has been used on the San Francisco docks.

More than \$6,000,000 worth of work has been done by the State Board of Harbor Commissioners on the docks and in all this work the Ferguson patent has been infringed upon, according to the allegations of the complaint.

A demand was made upon the board for the payment of \$300,000 royalties. The commissioners refused to pay. The owners then brought the action for \$407,639, the additional amount being for exemplary damages and interest.

STATISTICS SHOW BUILDING CONSTRUCTION HAZARDOUS TRADE

Accident statistics made public by the state industrial accident commission show that building construction is the most hazardous occupation in California.

Out of a total of 206,231 accidents reported to the commission in 1924, 11,836 were chargeable to the building trades, says the report. Of the accidents reported, 645 resulted in deaths, 1,319 in permanent disability and 87,982 in temporary disability.

Accidents are charged to other major occupations as follows:

Commercial enterprises, 7859; lumber and wood manufacturing, 6768; railroads, 5967; food and beverages, 5831; cartage and storage, 5532; engineering construction, 5424; oil producing, 4646; public utilities, 4367.

A total of 4823 men and women employed in agriculture, but who do not enjoy the benefits of the compensation act, were injured during the year.

While the building construction is charged with the larger number of accidents, the largest number of fatalities occurred to employes of public utilities, numbering eighty-eight. The motion picture industry is charged with seven deaths.

S. P. SEEKS AUTHORITY FOR 40-MILE EXTENSION

As a further step in its plan to tap the rich Northern California-Southern Oregon country, the Southern Pacific Railroad Company has filed application with the Interstate Commerce Commission for authority to construct 40 miles of railroad from Klamath Falls, Oregon, to Cornell, California.

The projected line will run in a southeasterly direction from Klamath Falls, through Merrill and near Malin, Oregon, and will have its southern terminal in northwestern Modoc county. Since the Modoc Northern Railway ceased activities, this country has been without railroad transportation. The new "feeder" line will afford direct communication both to Pacific Coast and Eastern points.

The application was filed in the name of the Central Pacific, proprietary company of the S. P., which company has already acquired 20 miles of the defunct Modoc Northern's right of way.

OLD CREOSOTED PILING SALVAGED

Recently, in rebuilding a sawmill in British Columbia, the Weyerhaeuser Timber Co., according to Wood Preserving News, removed some creosoted Douglas fir for piling that had served in teredo-infested waters for 19 years. Although the piles were covered with barnacles, examination failed to show any damage by teredo or other wood bores; the piles apparently were in as good condition as when originally driven. Therefore the old treated piling was salvaged and is now being used in permanent construction. Untreated piling in this same location is completely destroyed by teredo in from five to six years.

AMERICAN INDUSTRY IMPROVES ITS EFFICIENCY

American industry is making big strides in increasing its efficiency. More goods are being turned out with less labor, and particularly since the war, also with proportionately less machine power. The amount of labor and installed primary power since 1914 has definitely decreased in proportion to the volume of production, owing largely to increased efficiency in management and technical labor saving improvements, in the view of the National Industrial Conference Board. The volume of production, according to a chart prepared by the board, during the last quarter century (1899 to 1923) has increased 185 per cent, while the number of wage earners during that time has increased only 90 per cent; installed primary power going into the productive process, during the same period increased 236 per cent. The increased use of machinery, however, does not tell the entire story, for, according to the chart, installed primary power and labor employed both dropped off in proportion to the volume of production since the year 1924. This, in the view of the conference board, indicates that administrative and technical improvements in the utilization of both labor and power are playing an increasingly important part in the growth of production.—Engineering News-Record.

STEEL MERGER REPORTED

The "Cleveland News," Ohio, says reports are current in steel and banking circles here of a giant steel merger said to be near the verge of accomplishment and a smaller merger that will make Cleveland a steel center not second to any of the major areas of steel production in this country.

In the bigger merger have been mentioned the Bethlehem Steel Co. and the Youngstown Sheet & Tube Co., second and third largest steel producers in America; Republic Steel Co., Youngstown; Inland Steel Co., Chicago, and several other companies.

In the smaller merger are heard the names of McKinney Steel Co., Otis Steel Co., Bourne-Fuller Co. and Cleveland Steel Co., of Cleveland, and, if it reaches into the interior of the Cleveland steel district, the Trumbull Steel Co., Warren Central Steel Co., Massillon, American Rolling Mills Co., Middletown, and others elsewhere in Ohio.

ARCHITECT'S STATUS TO BE DECIDED BY COURT

The trial of Charles Muhs of Monterey, who is charged as having acted as an architect without having secured a license from the State Board of Architecture, has been set for July 21 by Judge Wallace at Salinas.

The complaint against Muhs was brought by J. J. Harris of Seaside who claims that Muhs posed as an architect and did work for him as such. When the case comes up it will be fought by Muhs, who produced evidence to show that he rates himself as a construction engineer.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

ALONG THE LINE

Although the general cost of living has decreased nearly one-fifth from the peak in July 1920, rents still hover close to the highest level they ever reached, which was in July of last year. Average rental rates, having climbed last July to a point 86 per cent higher than they were at the beginning of the war, today are still 82 per cent higher, according to the cost of living computation of the National Industrial Conference Board. Although slow and small, the decline in average rents during the past seven months has been consistent. During the last four months, including March, the greatest number of increases in rents are reported from eastern cities, while the preponderance of changes in the Middle West and South was toward lower rents.

Construction of the first unit of the proposed \$3,000,000 street paving program for Oakland started when the Oakland Paving Company broke ground for the improvement of East Fourteenth street and Fiftieth avenue to the San Leandro city limits. This improvement will cost approximately \$500,000. Other big projects soon to go under way include the Elmhurst storm sewer, to cost \$350,000; paving of Fourteenth street from First avenue to Thirteenth street, to cost \$75,000; the Grand avenue storm sewer from Grand avenue to Lakeshore avenue, to cost \$30,000; and the Grand avenue street work to cost \$60,000.

Lumber production for the week ending June 20, as compared with the week before, decreased somewhat, while shipments and new business showed no gains considering the number of mills reporting, according to reports received by the National Lumber Manufacturers Association from 362 of the larger softwood mills of the country as against 255 mills the week before. Comparing last week with the same period in 1924, however, all three factors showed substantial increases.

Exceeding all previous high records, America's fire waste last year totaled \$548,000,000 according to a report just issued by the Actuarial Bureau of the National Board of Fire Underwriters. This represents an average loss of \$1,500,000 every day or \$1,044 every minute throughout the entire year. The total amount of property destroyed during the year was equivalent to more than half the annual interest on our national debt.

The average yearly income of all the wage earners in the United States is \$1,157.89, which is a trifle more than \$20 a week, according to the LaSalle Extension University, Chicago. "Persons above the age of 10 years engaged in gainful occupations in the country number 41,614,248; of these 33,064,737 are males and 8,549,511 females."

Building permits issued in Burlingame have increased from \$1,841,758 during the fiscal year 1923-24 to \$2,857,385 during the year 1924-25, according to the building inspector's report.

A double circuit 220,000-volt steel tower power transmission line, starting at Brighton and running to Merced, is planned by the Great Western Power Company, which has made application to the state railroad commission for permission to start construction immediately. The cost is estimated at \$2,750,000. All preliminary engineering work on the new transmission line has been completed, and actual construction awaits the decision of the commission. The entire distance to be covered by the line will be 104 miles. Specifications for the line call for steel towers of the double circuit type, designed to carry 220,000 volts, although it will be used for but 175,000 volts.

Builders all over the country who are interested in licensing of contractors will now have an opportunity to study the effects of such a measure since on May 10 a license law became operative in the state of North Carolina. The North Carolina law applies to persons, firms or corporation undertaking to construct bridges, highways, buildings or other structures of \$10,000 valuation or over. The license board consists of 5 members appointed by the governor. Licenses run for 1 year. Violation of the law may be punished by a fine of not less than \$500, or imprisonment for three months, or both.

The shutting down of the Los Angeles Lumber Company's plant at San Pedro, the sale of the stock on hand and the effort to dispose of its three steamers marks the close of an earnest trial to make Los Angeles harbor a greater manufacturing and distributing point for lumber. Freight rates were one trouble which the company tried to overcome without very much success.

The Valley Building Material Company of San Jose has filed a complaint with the Railroad Commission against The Western Pacific Railroad Company and The Atchison, Topeka & Santa Fe Railway Company asking a refund of \$46.63, alleged overcharges for the transportation of fire brick from Richmond to San Jose.

Intoxicated drivers, the license of anyone arrested on a charge of driving while intoxicated regardless of the court's decision is revoked for a period of not less than six months. The second offense brings a sentence of sixty days and permanent revocation of the license.

The Marin County Supervisors have authorized the preparation of proceedings necessary for a bond election to finance construction of a county good roads system. It is estimated \$1,250,000 will be required to cover the cost of the improvements proposed.

The Foundation Company of San Francisco and New York announces a contract with the Greek Government for a huge land reclamation and irrigation project in the Vardar river basin in Macedonia. The contract price runs in the neighborhood of \$26,000,000.

Daniel W. McCarthy, pioneer construction engineer and for twenty years superintendent of the Grant Building in San Francisco, died in St. Mary's Hospital, San Francisco, June 30 at the age of 81 years. He was born in Ireland in 1844 and came to California in 1867, where he first started his career as a constructing engineer in the Knoxville Quicksilver Mines of Lake county. A few years later he became an engineer on Mare Island, where he had charge of constructing the engines in the U. S. S. Tuscan, then the largest boat built at Mare Island. He moved to San Francisco thirty-seven years ago, and was employed as an engineer on the San Francisco Daily "Post."

Ralph D. Wichman, electrical and civil engineer, with the Pacific Gas & Electric Co., San Francisco, for the past three and one-half years in charge of design for transmission substations, distribution sub-stations, steaming generating stations and steam plants, is now associated with Wichman & Albers, Engineers Service Bureau, 525 Market St., San Francisco.

Victor H. Staheli, city engineer of Redondo Beach, has resigned as city engineer of Hawthorne, but will continue to exercise supervision over work started during his tenure of office, amounting to over \$2,000,000. Aside from this Mr. Staheli will devote all of his time to his duties as city engineer of Redondo Beach, where an extensive improvement program is under way.

To prepare for a harbor expansion program, a full time engineer will be appointed by the Oakland City Council. The position will pay \$325 a month. H. L. Hess, former assistant to Ralph Beebe, former harbor engineer, is slated for the position. Mr. Hess has been acting harbor engineer since the resignation of Beebe a year ago.

Harry H. Hannah, city engineer of Eureka suspended February 13 by Mayor Oscar W. Lord on a charge of issuing fraudulent pay vouchers against the city and acquitted after two hours of deliberation in the Superior Court, has been reinstated by the Eureka city council. Frank H. Green has been acting city engineer.

John Shyff has been appointed city building inspector of San Bruno, San Mateo County, succeeding Gus Magnuson. Appointment of Shyff came after the city trustees declared the office of Magnuson vacant due to the complaints of contractors that Magnuson did not keep satisfactory office hours.

Marston Campbell has been appointed by the Oakland city council as inspector of sewers to be constructed under the recently voted bond issue. He will receive a salary of \$10 a day.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

LICENSE ELECTRICAL MEN

An ordinance has been adopted by the city of Alhambra requiring electrical contractors doing business in that city to pay a fee of \$100 a year for a license and give a bond for \$1000. The bond may be sued upon by any person claiming to have been damaged by violation of the city ordinances regulating electrical installations. The city commission will pass on the sufficiency of the surety.

BUILDERS TO PICNIC

The Portland, Ore., Builders' Exchange will hold its annual picnic in Montrose Park on the Columbia River highway, July 25. The park was the scene of the two previous outings and is about one hour's drive from Portland.

ENGINEERS NAME OFFICERS

The Engineers' Luncheon Club of Oakland has elected A. Vander Nallden, Jr., president and W. L. Wilson vice-president of the club. Phil John was elected secretary-treasurer. Mr. Vander Nallden, Jr., is chief deputy surveyor in the office of Geo. A. Posey, county surveyor of Alameda county.

BUILDERS' PICNIC

Approximately two hundred persons attended the second annual outing of the Builders' Exchange of Santa Clara County at the Trout Farm on Stevens Creek, near San Jose, Sunday June 28. Swimming, dancing and athletic events were enjoyed in addition to a barbecue feed prepared by Chas. Alva, Joe Alva and Bud Gallichote.

IN NEW OFFICES

The East Bay Industrial Association announces the opening of new offices at Eleventh and Webster streets, Oakland. A three-year lease has been secured on the new quarters which will be fitted out on a much larger and more efficient scale than heretofore.

During the month of May 1443 placements were made by the association.

U. S. EXAMINATIONS

The United States Civil Service Commission announces an examination will be held shortly for the position of associate architectural draftsman, a position paying from \$3000 to \$3600 a year. Receipt of applications closes July 25. The examination is to fill a vacancy in the Central Office of the U. S. Veterans' Bureau, Washington, D. C., and vacancies in positions requiring similar qualifications.

LUMBER PRODUCTION

Reports from 352 of the principal softwood mills of the country to the National Lumber Manufacturers Association for the week ending June 13 as compared with the week before indicate a reduction in production, shipments, and new business, with 19 fewer mills reporting last week than for the week earlier. As compared with the same week a year ago all three factors show heavy increases, particularly in new business.

Alameda County Exchange Features Own Talent in Show

By Joe Odgers

Staged in the auditorium of the new \$250,000 home—a minstrel show—the first social to be held in the new quarters by the Builders' Exchange of Alameda County, "went over the top" on Friday evening, June 26.

All talent was composed of members of the exchange from the ushers to the scene shifters and from the musicians to the "stars" on the stage.

The orchestra composed the following exchange members: Herbert Stanton, A. B. Greenberg, R. S. Locke, Geo. Marshall, H. A. Emmrick and Lester Doell.

Chorus, featuring twenty male singers in all, opened the evening with "The Hottest Coons in Dixie" and with the vigor and vim behind the voices assured the audience that they could do other things than figure plans and specifications and erect buildings.

F. Dowdle gathered in considerable applause when he sang "Lonesome, That's All" as did Vic Treadwell in rendering "Don't Bring Lulu." Sam Stroud offered "Rose of Picardy" and Billie Makin, the opera singing plasterer, rendered "Friend of Mine" followed by Dudley Develbiss in a specialty. "Moonlight and Roses" was offered by Geo. Lester and "There's Sunlight in Your Eyes" by Frank Oates. Geo. Schuster gathered in considerable applause with "Katerina" following which the Chorus sang "Dixie." Anton

Brothers played several numbers on the xylophone followed by R. O. Brown in a monologue. R. A. Brown's solo was well received as was a song and dance by Jack Norwood.

Fred Bishop in a whistling number was followed by Sam Muriale with a solo. E. A. Mulford submitted a specialty and J. S. Orr a song and dance.

Greenberg's Irish Hawaiians were a feature of the evening. These six songsters were greeted with round after round of applause.

Following the drop of the curtain in the last number the audience assembled in the banquet hall in the basement of the exchange building and enjoyed a hearty luncheon.

Rex Thompson filled the position of Interlocutor. Willis Lowe, architect, was musical director.

Considerable credit is due to H. E. Bettinger, chairman of the show, for the success of the social. L. Chilcotte, secretary of the Electrical Contractors' Association, arranged the lighting affects.

Committees in charge of the affair were: Entertainment—Henry Caplan, J. B. McKeon, L. B. Kirby. Refreshments—Paul Cunningham, Rex Thompson, Frank D. Moller. Publicity—Ken Graham, Vic Treadwell, A. B. Greenberg.

Conditions in the Building Trades

(Special Correspondence from the National Building Trades Employers Association, Cleveland, Ohio.)

Differences between contractors and the building trades have been settled in most of the large cities of the country and it is believed that for the balance of the year there will be peace and harmony in the construction industry. The only obstacle in the way at this time apparently is the disinclination of certain trades, especially the carpenters, to go along with the decisions of the National Board for Jurisdictional Awards.

In the city of Boston the painters returned to work on May 26, after having been on strike since April 1, in an effort to secure an advance from \$1.10 to \$1.25 an hour. The painting contractors after waiting for some time for the union to accept the same kind of an agreement that was signed by the majority of the other trades in Boston began to employ mechanics on the open shop basis. As a result the union changed tactics and agreed to the rate of \$1.10 per hour. On May 25 approximately 5000 union laborers went on strike for an increase in wages above the prevailing rate of 65 and 70 cents an hour. Contractors are hiring non-union men in order to man their jobs.

In Washington, D. C., on May 14th, the strike of painters and paperhang-

ers was called off and the men went back to work at \$3.50 which was a fifty increase. Plumbers in the same city recently negotiated an agreement, which runs until February 1, 1927. From May 8, 1925, to February 1, 1926, the rate will be \$10.50 a day and from that date until February 1927 it will be \$11.00 a day.

The general strike of structural iron workers in Indianapolis, which began on April 1st, following the refusal of the employers to grant a wage increase of 25 cents per hour, ended recently when the strikers returned to work at the 1924 wage scale; but on July 1st they will automatically receive an increase of 10 cents per hour.

In St. Louis the United Slate Tile and Composition Roofers recently renewed an agreement with the Master Roofers Association at the 1924 rate of \$1.25 an hour.

In Los Angeles the bricklayers are demanding \$11.00 a day which is an increase of \$1 a day over the old rate. Contractors are united in their opposition to granting this craft an increase.

In Portland, Oregon, the bricklayers and plasterers were recently given an increase of \$1 a day, and the carpenters are asking for an increase from \$8 to \$9 a day.

TRADE NOTES

The Northern Clay Co. and Gladding McBean Company have opened offices in the United States Bank Building, Portland, Ore., with Fred D. Kribbs as manager. Gladding McBean Company recently purchased the Northern Clay company and the combined companies now operate three terra cotta and clay products plants: Auburn, Wash., Lincoln and Los Angeles, Cal. They manufacture terra cotta, face brick, roofing tile and faience tile.

Sierra Manufacturing Co., capitalized at \$250,000, has been incorporated in Sacramento and will engage in the manufacture of gas appliances, ranges and sundry equipment. It is proposed to erect a plant in Sacramento employing about 200 men. Directors of the company are: H. W. Laramie, W. B. Shearer, A. B. Reynolds, F. T. Stanton and C. L. Whittemore, all of Sacramento. W. D. Walker is president of the company.

Enterprise Planing Mill Company, capitalized at \$25,000, has filed certified copies of articles of incorporation with the county clerk at Stockton. The incorporation actually took place on September 25, 1924, and the county filing was a legal formality. The stockholders of the concern are George C. Wheelock, Alfred H. Perry and Frank P. Dietrich.

W. D. Madigan, representing the American Plywood Company, on a recent visit to Martinez announced the company has deposited in escrow, funds for the purchase of a site for the proposed plant the company will erect in Martinez, Contra Costa County. The company has secured the site of the American Canning Company, near the Southern Pacific Railroad.

Schwerin Electrical Appliance Company of San Francisco has filed certified articles of incorporation in Redwood City. The company is incorporated for \$200,000 and filed original articles in Sacramento on June 12, 1924. Directors are: William J. Schwerin, Walter Henry, Hugh F. Keon Jr., Geo. C. W. Egan and Milton A. Nathan.

Nickey Bros., Inc., of Memphis, Tenn., heavy hardwood operators, are reported locating in Los Angeles, a site having been secured at 65th and South Park Ave. Construction of warehouse, office and other facilities is expected to be finished by September 1st.

The Sol Electric Steam Heating Company has opened offices at 626 Ellis street, San Francisco. The company will market Sol electric steam heaters in Northern California. The heater is manufactured by the Salisbury Turbine Motor Company in Seattle.

Frank Berka, pioneer lumberman of Santa Rosa, has sold his yards to E. U. White of Fort Bragg. White has been sales manager for the Union Lumber Company in Northern California for several years. Berka will retire from active business life.

The plant and yards of the Wolfe Lumber & Hardware Company in Nineteenth street between Folsom street and Treat avenue, San Francisco, were destroyed by fire on June 27. The loss is estimated at \$100,000.

To Study Reforestation

As a result of an exhaustive study of its southern cutover areas begun in September, 1923 and completed in December, 1924, The Long-Bell Lumber Company has instituted forest management and protection upon more two hundred thousand acres of cutover lands in Arkansas, Louisiana and Texas.

These areas, which are designated as temporary forest reserves, are receiving intensive fire patrol and strategically located fire-lanes are being developed somewhat along the lines of European practice. During 1924 the local forester in charge of Arkansas reserve area extinguished 192 fires, which burned over about 2000 acres. Experiments are being conducted in the use of carpet grass for fire lanes and also in the use of plows and spring-tooth harrows for keeping lanes clear of leaves and debris during the dry periods. It is expected that by such experimentation, methods of fire protection will be developed which

will combine economy of operation with maximum effectiveness.

The possibilities of selective and improved logging and thinnings for increased production, are being tested by actual practice. Growth and yield data are obtained periodically from permanent sample plots. An experimental planting of longleaf pine on a commercial scale has been approved for this fall.

In view of the uncertainties of taxes and other carrying charges it is not possible as yet to fix probable rotation periods for these forests, but it is hoped that conditions will develop favorably so that these cutover lands may be managed for the production of another crop of southern pine in the future.

J. E. Woods, Forester for The Long-Bell Lumber Co. is now engaged in a comprehensive study of the Company's Western holdings with the aim of formulating plans for future management of cut-over lands in Washington, Oregon and California.

Pan American Road Congress

The Pan American Road Congress, which will be held at Buenos Aires, October 3 to 13, has great potential importance to members of the automotive, motor accessory, road machinery and allied industries of the United States.

The American delegation will sail from New York, September 3, on the Grace Line Steamer Santa Anna.

The itinerary of the United States group will include stops in Panama, Peru and Chile. From Valparaiso, Chile the delegates will be crossed by rail and the delegation will reach Buenos Aires nearly two full days in advance of the opening of the conference.

During the period of the conference,

visits will be made to other cities of Argentina and probably Montevideo, Uruguay. Stops at Sao Paulo and Rio de Janeiro, Brazil, have been arranged for the return journey, and the party will land in New York on November 11.

It is estimated that an allowance of \$1500 per person will be ample for the whole trip.

The Congress itself will bring together the leading highway officials and engineers of South America. The visits to countries other than Argentina, mentioned above, will be of hardly less importance in impressing upon the peoples concerned the importance of the good-roads movement and as an opportunity to gain a firsthand knowledge of trade conditions.

Richmond Reports Demand For Workers

A total of 214 men were placed on jobs during May through the free employment bureau of the Richmond Builders' Exchange, according to L. C. Dexter, secretary of the exchange. Employment was found by the bureau for more men in May than during any month thus far this year.

Dexter declares the demand for both skilled and unskilled workers this month is still greater than was the

case in May. Calls were sent in for more men than the bureau could supply, and Dexter was forced to procure the men from Oakland.

The 214 men were placed in the following lines of work during May: Laborers, skilled and unskilled, 130; carpenters, 30; plasterers, 6; brick-masons, 4; electricians, 3; painters, 10; hod-carriers, 8; lathers, 3; millmen, 4; cabinet makers, 2; auto mechanics, 1; miscellaneous, 13.

JUNE BUILDING SUMMARY

Private building operations in San Francisco for the month of June, 1925, totaled approximately \$4,661,424, according to Chief Inspector of Buildings John P. Horgan of the Board of Public Works. During the month 902 permits were issued, of these, 444 being for alterations, the balance of the operations being for new construction. Following is a segregated report as compiled by Chief Inspector Horgan.

Class	No. of Est.	Permits	Cost
A	3	\$1,050,000
B	2	83,000
C	23	586,485
D	426	2,263,774
Alterations	441	523,599
Public Bldgs.	2	48,166

TOTAL.....902 \$4,661,024

NOTICE TO CONTRACTORS

West Side Union High School District

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the West Side Union High School District, Santa Clara County, State of California, in the present High School Building, near Sunnyvale, California, at 7:30 P. M., the 16th day of July, 1925, for the following work in connection with the new building to be erected in the High School District near Sunnyvale, California, according to plans and specifications prepared for the same by W. H. Weeks, Architect.

Bids will be received as follows:
General Contract with alternate bids.
Glass and Glazing.
Plumbing Work.
Electric Work.
Composition Roofing.
Terra Cotta Tile Roof.
Lath and Plaster Work.
Window Shades and Metal Guides.
Linoleum and Cork Carpet on floors.
Sheet Metal Work.
Painting Work.
Heating and Ventilating.

Plans and specifications may be seen at the office of the Architect, W. H. Weeks, 369 Pine St., San Francisco, or Ray Bldg., 1924 Broadway, Oakland, California, or at the office of the Clerk of the Board in Sunnyvale, California.

All bids should be presented on bid forms furnished by the Architect. Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than five (5%) per cent of the amount bid, made payable to President of the Board of Trustees of the West Side Union High School District, for the purpose stated in specifications.

Each bid must be delivered in sealed envelope and addressed to the Clerk of the Board of Trustees, and endorsed: "Proposal for New High School Building."

The Board reserves the right to reject any and all bids.

LEO H. VISHOOT, Clerk.
(Signed) West Side Union High School.

NOTICE TO CONTRACTORS

(Kingsburg Joint Union High School District)

Pursuant to an order of the Board of Trustees of the Kingsburg Joint Union High School District, Kingsburg, California, and entered in its minutes of June 16, 1925, notice is hereby given that the said board will receive sealed proposals for certain alterations and additions to the present High School Building, all in strict accordance with the plans and specifications for the same prepared by W. D. Coates, Jr., Co., architects.

Plans and specifications are on file with E. Ed. Peterson, clerk of the board. Copies may be obtained at the offices of the architects, 626 Rowell Building, Fresno, California.

All bids must be in the hands of the clerk of the board not later than 7:30 p. m., July 8, 1925.

A certified check equal to ten per cent (10%) of the bid submitted must accompany each proposal.

The time mentioned for the completion of the work will be a factor in the awarding of the contract. The board reserves the right to reject any or all bids received.

All bids must be sealed and the name of the bidder must be marked on the outside of the envelope.

THE BOARD OF TRUSTEES OF THE KINGSBURG JOINT UNION HIGH SCHOOL DISTRICT.
E. Ed. Peterson, Clerk.

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned at 1:30 P. M., July 13, 1925, for constructing a portion of the state highway system in Douglas County, between 5 miles east of Holbrook and the east county line, length 5.63 miles, work consisting of grading and construction of culverts.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned, also may be examined in the county clerk's office at Minden; the division offices in Elko, Reno and Las Vegas; and the district office of the Bureau of Public Roads, Bay Building, San Francisco. For copy of plans, undersigned requires a deposit of Fifteen Dollars (\$15.00), which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

NOTICE TO CONTRACTORS

..(Aromas (Joint) School District)

Notice is hereby given that sealed bids will be received and opened by the Board of Trustees of the Aromas (Joint) School District, Monterey County, State of California, in the present Aromas School Building, Aromas, California, at 2:00 o'clock P. M., Saturday, July 18, 1925, for the erection and completion of a one-story wood and concrete school building, in accordance with plans and specifications made for the same by W. H. Weeks, Architect, 369 Pine Street, San Francisco, and 1924 Broadway, Oakland, California, with its several propositions.

Plans and specifications may be seen at the offices of the architect before mentioned, or at the office of Harry Biddle, the Clerk of the Board in the Town of Aromas.

All bids should be presented on bid forms furnished by the Architect.

Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to Harry Biddle, Clerk of the Board of Trustees of the Aromas (Joint) School District, the said check to be forfeited to the said district if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract.

Each bid must be enclosed in a

Sealed Envelope which is endorsed "Proposal for Aromas School," and must be delivered to Harry Biddle, Clerk of the Board of Trustees, prior to the date and time set for the opening of bids.

A deposit of Twenty (\$20.00) Dollars will be required on all plans loaned out.

Owner reserves the right to reject any or all bids.

HARRY BIDDLE,
Clerk of the Board of Trustees Aromas
(Joint) School District.

NOTICE TO CONTRACTORS

(Children's Ward, Ahwahnee)

The Tri-county Tuberculosis Sanatorium Committee of Madera, Merced and Stanislaus Counties, California, will receive sealed proposals up until 11:55 o'clock A. M., July 11th, 1925, at the Administration Building, Ahwahnee, California, at which time and place said bids will be opened and read in public, for furnishing the required labor and materials for the construction of a children's Ward, in accordance with plans and specifications prepared therefore by W. E. Bedesen, Engineer, Schaffer Building, Merced, California.

Cashier's or certified check, or bidder's bond for an amount not less than ten per cent (10%) of amount of bid shall accompany each proposal, drawn to the order of V. D. Whitmore, Chairman of said Committee, as a guarantee that the bidder will within ten days after being notified of the acceptance of his bid, enter into contract with said Counties in accordance therewith and shall furnish the surety bonds as required by the specifications, said check or bond to be forfeited to the Counties, should the bidder fail to execute the contract and furnish bond as above mentioned.

All bids to be made out on forms furnished by the Engineer.

Plans and specifications for all the above work may be seen at the office of the County Clerks of any of the three Counties above mentioned or at the Sanatorium at Ahwahnee, and may be secured for bidding at the office of W. E. Bedesen, Schaffer Bldg., Merced, California.

A deposit of \$10.00 will be required from all contractors receiving plans, said deposit to be refunded when plans and specifications are returned in good condition.

The said Committee reserves the right to reject any all bids, and to waive any informality in any bid received.

By order of the Tri-county Tuberculosis Sanatorium Committee of Madera, Merced and Stanislaus Counties, California.

By V. D. WHITMORE,
Chairman of Tri-county Committee.

All valves to withstand 125 pounds pressure.

Bids to be for f. o. b. Yreka.

The board reserves the right to reject any or all bids and to waive informality in any bid.

Address all bids to U. F. Brown, city clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on July 27, 1925, at which time they will be publicly opened and read for construction, in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows:

Riverside County, between Edom and two miles north of Indio (VIII-Riv-26-E), about nine and one-tenth (9.1) miles in length, to be widened with Portland cement concrete shoulders.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be constructed, and the specifications of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: June 29, 1925.

BIDS WANTED FOR POST OFFICE

Notice to Contractors

TREASURY DEPARTMENT, Office of the Supervising Architect, Washington, D. C., June 26, 1925.—SEALED PROPOSALS will be opened in this office at 2 p. m., July 24, 1925, for the construction, including mechanical equipment of a one-story, brick and terra cotta, non-fireproof building of about 3900

sq. ft. ground area, for the United States Post Office at Fallon, Nevada. Drawings and specifications may be obtained from the Custodian of the site at Fallon, Nevada, or at this office in the discretion of the Supervising Architect, J. A. Wetmore, Acting Supervising Architect.

NOTICE TO CONTRACTORS

(Siskiyou Union High School District)

The Board of Trustees of the Siskiyou Union High School District will receive sealed proposals at or before 2 o'clock P. M., Sunday, July 13, 1925, at the office of the Board of Trustees, Yreka High School Building, Yreka, California, at which time and place bids will be opened and read in public for furnishing the labor and material for erecting and completing changes in the Heater Room and Heater Plant, and the construction of a Septic Tank and Sewage Disposal System for the Port Jones High School, Fort Jones, California, in accordance with plans and specifications prepared by John W. Woollett, Architect, Sacramento, California.

Bids will be received separately for the following classes of work:

1. All architectural and structural work and plumbing.
2. Electrical wiring.
3. Heating.

All bids must be accompanied by a certified check for 10 per cent or more of the amount of the proposal. In case this proposal is accepted, the contractor in part and the bidder fails to execute a contract for the performance of said work, and a bond of sufficient sureties in the sum of 50 per cent of the amount of the contract to secure the faithful performance thereof, within fifteen days after such acceptance, then this certified check shall be retained by the Board of Trustees of Siskiyou Union High School District as liquidated damages for the failure to carry out this proposal. Such contract and bond shall be in such form and of such content as shall be satisfactory to the Board of Trustees of said Siskiyou Union High School District.

All bids to be made out on forms furnished by the architect.

Plans and specifications may be obtained from John W. Woollett, Architect, 606 Plaza Building, Sacramento, Calif., or Lella E. Steele, Clerk, Siskiyou Union High School District, Yreka, Calif.

A copy of the plans and specifications will be placed on file with L. S. Newton, County Superintendent of Schools, at the Court House, Yreka, California, for the use of contractors desiring to bid.

A deposit of Ten Dollars will be required from all contractors receiving plans, said deposit to be refunded when plans and specifications are returned in good condition.

The Board of Trustees reserves the right to reject any or all bids and waive any informality in any bid received.

By order of the Board of Trustees of the Siskiyou Union High School District, Yreka, California.

Dated, June 22, 1925.
LEILA E. STEELE, Clerk.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m., on July 20, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made of portions of State Highway, as follows:

Shasta County, a reinforced concrete bridge across Charley Creek 1 1/4 miles north of Pollock (II-Sha-3-1C), consisting of two 18-foot open span and one arch span and eight 23-foot girder approach spans.

Riverside County, a reinforced concrete girder bridge, 1 feet wide, across Coneahella Stormwater Channel about 2 miles northwest of Indio (VIII-Riv-

26-E), consisting of sixteen 30-foot spans on concrete pile bents.

San Bernardino County, between Victorville and Hicks (VIII-SBd-31-D, E & F) about twenty-five and seven-tenths (25.7) miles in length, to be graded and surfaced with crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank forms of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interest of the State.

NOTICE INVITING SEALED PROPOSALS

(Sunset School District)

Pursuant to resolution of the Board of Trustees of the Sunset School District, Monterey County, California, directing this notice, said Board of Trustees hereby invites sealed proposals for bids for the construction and completion of the Sunset School Building, in said Sunset School District, Monterey County, California, as described and set forth in the plans and specifications for the construction and improvement of John J. Donovan, architect, dated June 3, 1925, and heretofore adopted by resolution of said Board on June 24, 1925, which plans and specifications are now on file in the office of the Clerk and ex officio Secretary of said Board, at the existing Sunset School Building, at Carmel-by-the-Sea, California, and also at the office of said architect at No. 1916 Broadway, Oakland, California, to which plans and specifications reference is hereby made for further particulars, and said work shall be done in accordance therewith.

Said plans and specifications may be seen at the office of said Board or of said architect. A deposit of twenty dollars (\$20) hereby is required as guaranty for the return of the plans and specifications taken from either office, and will be refunded to the contractor when the plans and specifications are returned in good condition.

All proposals or bids shall be accompanied by a check payable to the Sunset School District of Monterey County, California, certified by a responsible bank, for an amount which shall not be less than ten per cent of the aggregate of the proposal. Should the successful bidder fail to obtain bonds for material, labor and for faithful performance, respectively, as prescribed in the plans and specifications, or fail or refuse to sign the contract for said work within ten days after the date of said contract, said certified check in said (Continued on Page 42)

Engineering News Section

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

Building & Engineering News

ENGINEER APPOINTED ON BOARD FOR ROAD DEVELOPMENTS

Announcement is made by Chas. M. Upham, Director of the Highway Research Board of the National Research Council, that Professor S. S. Steinberg of the University of Maryland has been designated Acting Secretary of the new investigation begun by that Board on the Development of Earth Roads. The object of this investigation, which will be national in scope, is to co-ordinate the efforts and data already available on the improvement of earth roads and to stimulate further research in order to find an inexpensive surface that will carry intermediate traffic at a low cost of both construction and maintenance.

Professor Steinberg has had fifteen years of engineering experience, about ten years of which were spent in highway construction and highway research. After graduating from the Cooper Institute, New York, he was for five years with the New York State Highway Department. Following a period on subway construction in New York and on railroad construction in Central America, he was with the State Highway Departments of South Carolina and Delaware.

Since 1918 he has been with the University of Maryland, and for the past five years as Head of the Department and Professor of Civil Engineering. He still retains this connection.

During several summers Professor Steinberg was in the U. S. Bureau of Public Roads on detail at the University of Maryland in connection with highway research being conducted there by Dean A. N. Johnson. During the past summer, he was Assistant Director of the Highway Research Board of the National Research Council.

BUILDING FOR PERMANENCE

Wise men are building today for permanence, and those who specify and buy materials must remember that though they themselves may have an expectancy of but a few years, the utility they serve is an enduring institution. A dam well built is as overlasting as the hills. It is for the public and the stockholders that they are intended, and there will be stockholders and a public when fifty years have rolled away. Executives must recognize the responsibility that comes with this and build well. — Improvement Bulletin.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

ISSUES SPECIFICATION FILE

The Bass-Hueter Paint Company is distributing an interesting and comprehensive file covering the specifications of their various products. These specifications are made to fit the standard files and, in addition to the regular specifications have colors of their various paints which can be detached and inserted with the contract, eliminating the possibility of any confusion when a certain color is specified. A copy of the specifications can be had by any architect or general contractor on request to the company.

WELL! WHAT'S THE ANSWER?

An interesting sidelight on the feeling of the prisoner engaged in convict labor road construction toward his environment and its relation to his mental attitude is related by Ben H. Milliken, Superintendent of Prison Road Camps for the California Highway Commission. He says that one of the convicts wanted to know if it would not be possible for the camp baseball team to do their practicing—which it was necessary to carry on outside the camp limits—without the presence of a guard. It was explained to him that the guard was there merely for the moral effect on the free spectators. To this he replied with a look of surprise and earnestness—"What do they think we are, a bunch of crooks?"

HIGHWAY FUNDS AVAILABLE

The California Highway Commission will have a total of \$37,739,914 available for highway work during the next biennium, not taking into consideration any balance of money unexpended by July 1, which will bring the total figure to the \$40,000,000 mark, it is estimated by Charles G. Johnson, state treasurer.

"The amounts available at present will provide for more work than has ever been performed by any highway commission," said Johnson. "and if efficiently expended should take care of all legitimate demands for this biennium without creating additional methods for taxing an already overburdened public."

CITY OF LOS ANGELES WILL DEMAND U. S. MADE CEMENT

Coincidentally with its consideration of the first unit of the city major traffic highway plan, involving 45 miles of street paving to cost \$30,594,211, the Los Angeles city council announced its decision that only American-made cement will be used in civic construction work in the future. This announcement followed a recent report by the board of public service strongly endorsing American cement over foreign products.

SEEKS MILLIONS FOR FOREST PROTECTION FUND

Colonel W. B. Greeley, chief of the United States forest service announces departmental plans for the expenditure of \$2,000,000 for protection of Southern California forest reserves against fires. Congress will be asked for the appropriation at the next session.

CENTURY OLD CEMENT PATENT

A photographic copy of the original Portland cement patent granted by King George the Fourth, of England, to Joseph Aspdin, of Leeds, October 21, 1824, was presented to the Smithsonian Institution, Washington, D. C., March 27, by the Portland Cement Association. The cement patent copy is an exact replica of the original which is still in the possession of the Aspdin family in England. This copy was brought to the United States by Sir Edward Airey, former Lord Mayor of Leeds, during his visit here last fall.

LUMBER MILL BURNS

Fire of undetermined origin destroyed the mill of the Sandy Lumber Company 13 miles east of Sandy, Ore., June 21. The loss was placed by the owners at \$25,000, with \$2000 insurance.

(Continued from Page 19)
 amount shall be forfeited as and for liquidated damages.
 Said sealed proposals or bids shall be delivered to the said Clerk and ex officio Secretary of said Board not later than the hour of 8:30 p. m. of the 9th day of July, 1925, at which date and hour said Board of Trustees in open session in said existing Sunset School Building, at the City of Carmel-by-the-Sea, will publicly open, examine and declare all such bids and proposals; and the contract for said work will be thereafter awarded to the lowest responsible bidder therefore, who shall give such security as the said Board has prescribed in said specifications, said Board hereby reserving the right to reject any and all of said bids and proposals.

By order of the Board of Trustees of Sunset School District.

Dated: June 24, 1925.

FLORENCE M. SPOEHR
 Clerk and ex officio Secretary
 of said Board.

One unit of the Clyde line which has been gaining popularity very rapidly is the Concrete Tower Hoist. Two one drum 60 H. P. electric motors were employed on the operation illustrated, which shows the Phoenix Utility Company, of Duluth, working on a Hydro-Electrical development for the Minnesota Power & Light Co. at Fond du Lac, Minn.

The dam is 600 feet long and 85 feet high. Twelve hundred and seventy-five yards of concrete a day were hoisted and spouted to place. The Clyde 10 ton stiff leg derrick shown in the picture was used for handling materials from storage to bins.

Officials of the Phoenix Company have shown their satisfaction with Clyde Equipment by placing several repeat orders.

Complete information about either one or two drum concrete tower hoists or any other unit of the Clyde line, will be furnished gladly by the home office or any branch.

KOEHRING

DANDIE

Light Mixer

Dandie Light Mixer

7 cu. ft. mixed Concrete. Two or four cylinder gasoline engine. Power charging skip, or low charging hopper and platform. Rubber tired steel disc wheels or steel rimmed wheels.

Send back the coupon

VALUE
—Such as Never Before
Seen in the Light Mixer Field!

STILL within the price range for light mixers, this 7 ft. Dandie Model offers extraordinary values!

A heavy duty, four cylinder, radiator cooled gasoline engine, completely enclosed in a steel housing.

Completely enclosed transmission always running in an oil bath, and mounted on shaft revolving in roller bearings. Steel disc wheels with rubber tires or regular steel rimmed wheels. Beveled edge, chilled drum rollers, pinned to shaft which turns in big bearings! Koehring double gear drum drive!

In every bearing—every detail—you'll find the reliable Koehring construction the surest insurance of reliability and long, trouble-free service life!

Light Weight—just the balanced light weight to be hauled on its rubber tires behind your car or truck and to lose no time between job and job. This Dandie Model has been tested and tried by *overwork* and abuse—and it's more than worthy of the Koehring name.

For high speed operation—solid, substantial construction and light weight portability—this Dandie has established new values and standards in the light mixer class.

LOOP LUMBER PURCHASES WADDELL HOLDINGS

Sale of the Waddell Lumber Company, Broadway at Blanding Avenue, Alameda, to the Loop Lumber Company of San Francisco—one of the largest lumber concerns on the Pacific coast—is announced in a joint statement issued by William B. Waddell and Merrill Robinson, new manager of the plant.

The Waddell Lumber Company was formed in 1918 by George B. Waddell, who died last December. Since his death, and until the time it was acquired by the Loop Lumber Company, the plant has been under the management of William B. Waddell who will retire as its manager.

The two lumber schooners owned by the Loop company, the F. S. Loop and the Poulsen, will make Alameda a regular point of call in the future, bringing in lumber from the Columbia river.

Forty men are now employed in the yard and office of the company. With the exception of Waddell, the entire office personnel is unaffected by the change but will be augmented in the next several months.

Robinson, the new manager of the plant, has had years of experience both in the lumber trade and in shipping.

The F. S. Loop is one of the largest lumber packers on the coast.

Eastern Manufacturers Will Exhibit at All-Western Road Show

Unprecedented interest is aroused throughout the West in the All-Western Road Show to be held in San Francisco, November 9-14th, under the auspices of the Western Construction Equipment Distributors. Preparations are being made for ten thousand visitors and large delegations of Contractors, Supervisors, County Commissioners and Engineers are coming from every point in the Western third of the country to view the first large show of roadbuilding, excavating, and quarry equipment ever held in the West.

A separate day during show week is set apart for each group of visitors to the show. Tuesday is Engineers' Day, Wednesday Supervisors' Day, Thursday Contractors' Day, and Friday Dealers' Day. Conventions on the show grounds will be held on each of these dates and in addition to viewing the greatest machinery exposition ever held in the West, and second in size only to the annual Chicago show, visitors will have a chance to meet their kind, exchange ideas and profit by a mutual discussion of their problems.

The Executive Committee, consisting of Edward R. Bacon Co., Charles Spears of the Spears-Wellis Machinery Co., and P. H. Curtis of the Western Highways Builder announce that they have received orders for exhibition space from most of the leading manufacturers of the East, and ground plans provide for nearly 10,000 square feet of space for exhibits alone. Eighteen acres on the site of the Panama-Pacific International Exposition in the Marina in San Francisco have been engaged for the show and ample room is thus provided for the standing exhibits under canvas, as well as for the demonstration show in the open.

The Finance Committee consisting of T. W. Harron of Harron, Rickard & McCone Co., and G. T. Alm of the Coast Road Machinery Co., advise that more than enough applications for space are already received to completely finance the week, and those attending have the further assurance of a good organization to look out for their comfort and entertainment. There will be ample space provided for chairs outside of exhibit space where visitors may rest, and a prominent San Francisco restaurateur will be on hand to provide lunch. The show will close at sundown, as the committee feels that six days of daylight is sufficient time to permit everybody to examine the exhibits thoroughly.

Announcement will be made in the near future by chairman of groups giving tentative programs for their organizations, and many visitors are expected to attend sessions of all the groups. An interesting feature of the Conventions is the arrangement by which several manufacturers will give moving picture talks on their products during the hours in which Conventions are not in session in Convention Hall. These pictures and talks will describe interesting achievements of their machinery and are an added attraction to visitors.

STOCKTON CONTRACTOR SUEY FOR WORKMAN'S INJURY

The State Compensation Insurance Fund has started a \$51,335.34 damage suit in the Superior Court at Stockton against J. A. Allen, general contractor in charge of construction on the Union Safe Deposit Bank Building recently completed in Stockton, for injuries sustained by Victor Peterson, iron-worker foreman, who was injured last Summer.

Peterson was injured on July 3, 1924, when a runaway from the street to the upper part of the building, on which he was walking, collapsed suddenly.

He was taken to a hospital, seriously injured, the medical expenses costing the insurance fund \$1335.34. In addition it is obligated to pay the liability of Peterson's employer, the J. G. Williams Construction Company, from which the injured man was receiving \$1 a day at the time of the accident.

Negligence on the part of the general contractor is alleged by the insurance fund and the complaint demands that he be held liable for Peterson's personal damage as well as his hospital and medical expenses.

Frank C. Creede, T. W. Slaven and W. J. O'Connor of San Francisco are attorneys for the insurance fund.

OAKLAND BUILDING RECORD HITS HIGH MARK

Oakland is enjoying an unprecedented period of growth and prosperity, with indications pointing to a new high record for 1925; so prove statistics gathered from various sources for the fiscal year ending June 30.

Building permit records, an ever reliable source of information regarding growth of a community, bear out the claim that Oakland is the fastest growing city of its size in the United States. For the fiscal year ending June 30, 1925, building permit totals reached \$36,028,262, an increase of \$7,744,149 over the previous period ending June 30, 1924, which had a total of \$28,284,113.

Following is a comparison of the two twelve-month periods:

July	\$1,947,274	\$3,350,532
August	2,118,416	3,026,716
September	2,147,296	2,502,094
October	2,759,208	2,619,703
November	2,336,472	2,104,741
December	2,583,312	3,227,514
January	2,018,166	2,850,000
February	2,255,570	2,540,131
March	2,896,416	3,321,110
April	2,457,592	3,590,546
May	2,241,383	3,178,756
June	2,527,008	2,766,419

Total \$28,284,112 \$36,028,262

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

ALONG THE LINE

The Kentucky Court of Appeals holds, *City of Mayfield v. Phipps*, 263 S. W. 37, that if a municipality legally acquires a public utility plant, with the right to operate, it would acquire as an incident thereto the right to do everything a private person might do to furnish the citizen with the product, and a municipality which owns and operates within its limits a water-works and an electric plant was held to have the power incident to such ownership and operation to install the necessary plumbing and electrical equipment and furnish the material therefor, and to pay for such work and material out of the funds derived from such operation. Whether to do so would be a wise policy the court said it was not called upon to decide.

Finland, now the most heavily forested of European countries, has aroused much attention from American lumber manufacturers by creating an organization in its lumber trade for marketing in the United States. The National Lumber Manufacturers association, one of the American groups most concerned, has received advices that the Finnish saw mill owners have put in charge of their enterprise John Saari, formerly a lumber manufacturer of Portland, Oregon, and are attempting to establish a permanent foothold in this country.

Los Angeles' building for the first half of 1925 exceeded that for the corresponding period of 1924 by \$1,346,719. The number of permits issued by the city building department for six months of 1925 was 22,852, and the estimated valuation \$83,175,459, as compared with 27,748 permits and an estimated valuation of \$78,824,738 for the corresponding period last year. June building totaled \$15,305,516. During the month 2652 permits were issued.

Two hundred and fifty-nine permits were issued in Berkeley for new construction during the month of June, 1925. The expenditure for this construction was \$1,195,521. Alteration permits numbered 123 with a total estimated valuation of \$69,654 bringing the number of permits to 382 with a valuation of \$1,265,175.

June building in San Jose totaled \$330,520. During the month 85 permits were granted. New buildings will cost \$153,750, the balance of the operations being for alterations, additions and repairs.

Laurence Thompson, civil engineer, in the employ of the City of Vallejo has tendered his resignation to the city council. The resignation is effective July 21.

A. M. Rawn has been appointed assistant to the chief engineer of the Los Angeles County sanitation districts. Mr. Rawn has been connected with this work since the inception of the plan to consolidate into one office the sanitation work of the entire county.

Building construction in Richmond, Contra Costa County, for the month of June, 1925, totaled \$122,957 exceeding the May valuation by \$42,957.

Copper produced in the United States and Alaska in 1924 from domestic ores are placed by the Geological Survey at 1,634,249,192 pounds fine against 1,434,999,962 for 1923, smelter output. The total production of new refined copper in 1924 was 2,260,000,000 pounds, an increase of 280,000,000 pounds over the previous year. The value of production in this country was \$214,087,000 for last year, compared with \$210,945,000 for 1923. The world's production in pounds for 1924 was 2,998,286,000 against 2,711,533,000 for 1923. The average 1924 price was 13.1 cents a pound compared with the 1923 figure of 14.7 cents.

A reorganization of the Pasadena city government will be effected by an ordinance passed by the board of city directors. The city government will be divided into six departments with a city director in charge of each. Hereafter the city manager has had full charge of all departments with power to appoint and remove all assistants and employees. Under the new ordinance this power will be vested in the board of city directors. All official acts of the city manager will be subject to approval by the board.

Some building contractors ignore the law regulating temporary floors in buildings in course of construction. Several instances of this kind have come to the attention of the Commission recently. In one case it was necessary to take a contracting firm before the bond and warrant clerk in order to secure a compliance with this law, which is not an order of the Commission but an act of the legislature. Strict compliance with the law will be enforced by the Commission.—(Calif. Safety News).

Building construction in Alameda for the fiscal year 1924-25, totaled \$1,682,841, according to a report of Eugene Mallott, city building inspector. During that period 1008 permits were issued of which 378 were for new buildings. The peak in building was reached during the month of October when 102 permits were issued for a total of \$192,093.50. The ebb followed in November with 79 permits totaling \$88,959.75, the lowest for the year.

The lumber industry in the Butte county section is in full swing with 1200 men employed in the camps and mills. Operation of a night shift by one company has brought the average daily cut to 500,000 feet.

H. R. Crane, for the past several years city building inspector of Livermore, has resigned due to ill health. He will move with his family to Alameda.

Pasadena's zoning ordinance has been amended to permit the erection of buildings more than eight stories in height, the new limit being fixed at 130 feet.

O. D. Hunt, former mayor of Tulsa, Okla., a resident of Pasadena for the last five years, has been appointed assistant city manager of that city at a salary of \$500 a month.

Lieutenant-Colonel G. R. Lukesh, U. A., has arrived in San Francisco from Louisville to assume the office of diversion engineer in charge of rivers, harbors and fortifications, vacated when Colonel Herbert Deakne was transferred to New York. Colonel Lukesh will have charge of harbor work in California and Hawaii. Major J. W. N. Schultz, who has been temporarily in charge of the San Francisco office, will continue as district engineer for Northern California. Five years were passed by Colonel Lukesh at Louisville in charge of locks and dams on the Ohio river. He was a member of the Mississippi River Commission in charge of levee work, and gave up the position to join the California Debris Commission.

E. E. Brown, for twenty years an architect of Stockton, died in St. Joseph's Hospital, that city, July 3, following an operation performed several days previous. He was 55 years of age. In addition to designing plans for several large residences in Stockton and Southern California, Mr. Brown prepared the plans for the Hotel Stockton. He also designed a mansion for Lee A. Phillips, Los Angeles capitalist, in the Beverly Hills district and which is now occupied by Douglas Fairbanks and Mary Pickford. Mr. Brown was born in New York where, prior to his coming West, he was secretary of the Sketch Club.

Major U. S. Grant, III, United States corps of engineers, for more than four years executive officer of the California Debris Commission in connection with his detail in this state from the war department, has received orders to report at once for duty with the Arlington Memorial Bridge Commission at Washington, D. C. In his work with the debris commission, Major Grant has been closely identified with flood control and river work in general in Superior California. He made a close study of the Sacramento River and its problems and was an authority in matters connected with the river and its watershed.

Roy E. Watkins, Sacramento engineer and former superintendent of equipment for the California State Highway Commission, has been named city manager of Pittsburg, Contra Costa County. He was selected for the post from a list of nine applicants.

H. S. Williams, former city engineer of Santa Cruz, has opened an office in that city and will engage in private practice. Previous to going to Santa Cruz as city engineer, Mr. Williams was employed by the state as a field engineer on water resources.

James W. McCreiff, ceramic engineer for the Stockton Fire Brick Company of Stockton, was a recent visitor on the floor of the San Francisco Builders' Exchange.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

ARIZONA STATE LEGISLATION OF INTEREST TO BUILDERS

At the recent session of the legislature of Arizona three emergency bills were passed dealing with workmen's compensation. One of these bills directs the governor to call a special election for the purpose of submitting the second of the trio of bills, a constitutional amendment, to the people for their approval or disapproval at the special election. The third bill provides for an industrial commission and a workmen's compensation law. It will become a law only after the constitutional amendment has been approved by the people at the special election next September.

Another bill amends the mechanics lien law by providing that any person, firm or corporation who labors or furnishes labor in the construction or repair of canals, or other irrigation works, bridges, fences, roads, highways, ditches, excavations, clearing, leveling or ditching of lands shall have a lien upon them for unpaid wages or money due for them.—Southwest Builder.

HOME BUILDERS ELECT

The San Francisco Home Builders' Association at a recent meeting elected the following officers and directors: A. J. Falvey, president; L. B. Ham, vice president; Grace Pergo, secretary. Directors: E. A. Jansen, Henry Mangels, R. H. Stevenson, L. V. Riddle, J. V. Campbell, Ward Cox and J. Prout.

SEEK MEMBERSHIP

The J. G. Wilson Corporation, manufacturers of rolling steel doors, folding partitions and Venetian blinds, has applied for membership in the San Francisco Builders' Exchange. The Republic Truck Sales Company has also filed an application.

U. S. EXAMINATIONS

The U. S. Civil Service Commission announces an examination will be held shortly for the position of Associate Structural Engineer, a position paying \$3000. Advancement in pay may be made without change in assignment up to \$3600. The duties of the position consist of design of reinforced concrete, skeleton-frame buildings, retaining walls, roof trusses, etc. Receipt of applications close August 4.

An examination will also be held shortly for the position of Junior Engineer, paying an entrance salary of \$1860 with possibilities of an increase to \$2400 a year. The duties of the position consist of such work as drawing up plans for minor projects, preparing maps, making computations, performing field work, handling technical correspondence, compiling reports and other related work. Receipt of applications close Aug. 8.

Full information and application blanks may be obtained from the United States Civil Service Commission, Washington, D. C., or the secretary of the board of U. S. civil-service examiners at the post office or customhouse in any city.

Unions to Rebuild Santa Barbara Without Pay Increases

The Santa Barbara Building Trades Council has gone on record unanimously to the effect that under no circumstances will any increase in wages be permitted in Santa Barbara or vicinity during the period of reconstruction of earthquake damage. This action was taken at the suggestion of A. G. Gilson, secretary-treasurer of the State Building Trades Council, according to reports from Santa Barbara.

The resolution adopted by the council without dissent follows:

WHEREAS, The vicinity of Santa Barbara, California, was visited by a series of earthquake on the morning of June 29, 1925, and

WHEREAS, several large buildings have been demolished by reason of such series of earthquakes, and

WHEREAS, the reconstruction of these buildings will necessitate care-

ful and conservative action on behalf of all parties interested. Therefore be it

RESOLVED by the Building Trades Council of Santa Barbara County, in regular session assembled this 30th day of June, 1925, that we keenly deplore this unfortunate event, and be it further

RESOLVED, that we hereby decree that no raise in our present scale of wages shall be countenanced or allowed to any craft or mechanic affiliated with this Building Trades Council during the course of rebuilding or reconstruction occasioned by said damage and be it further

RESOLVED, That we hereby freely offer our individual and combined services to the Santa Barbara Chamber of Commerce and all other civic and fraternal organizations in their several deliberations that may be held for the purpose of co-operating in the upbuilding reconstruction or advancement of the interests of this afflicted city.

To Provide More Work—Stockton Building Trades Propose 5-day Week

To provide more mechanics with work, the unions affiliated with the Stockton Building Trades Council are taking steps to put a five-day week into effect. These crafts now work five and a half days a week and under the new plan only five days a week will be the rule.

The painters have already voted for a five-day week and the plasterers have so voted and submitted their action to the International union for approval. Other unions are in sympathy with the movement, it is understood, but have not as yet definitely voted upon the question.

F. J. Murphy, representing the Building Trades Council, explains the situation by saying: "This is a move to provide more men with work. By every man working five days, more men will have to be employed than under a five and a half-day week schedule, time being a factor in all contracts. It is in no sense a question of wages, and does not mean added expense to the contractor. It simply means more men at

work, and we wish to share the jobs among the workers the best we can."

It is urged by some of the workers that the Saturday half-day plan is not an efficient one. They say a real half-day's work is not given for the reason that time is lost getting ready to work and actual construction work time is lost again in preparing to knock off work. This is in part due to the fact that in most construction jobs the place has to be left safe with respect to sidewalks and passersby, and there are other things to be looked after that are done at the expense of actual construction time.

It is felt among the workers that the employers will not object to the plan for a five-day week. Some may be opposed, it is said, but it is held by the workers that if all the local unions adopt a five-day week that it will be accepted as actually beneficial to all concerned.

It is hoped to have the five-day week go into effect in July, according to some of the workers who are active in promoting the plan.

HOME BUILDING COST DROPS, STUDY REVEALS

The cost of materials necessary for the construction of a six room house has averaged lower for the year 1925 than at any corresponding time since 1922. So far as materials are concerned conditions thus are more favorable for home builders than they have been for three years.

The department of commerce makes a continuing study of the cost of materials necessary for a six room frame house and a six room brick house. It shows the rise and fall of these materials by comparing their cost with that of 1913.

For the current year the cost of materials for a six room frame house have averaged 98 per cent above the 1913 level. For the corresponding period last year the average was 101 per cent above the 1913 level. The 1923 average was 107 per cent above the 1913 level. The 1922 average was 107 per cent above 1913 and the 1922 average 82 per cent above.

Materials for the brick house of six rooms have moved up and down in about the same ratio. At present the brick house materials stand at 100 per cent above 1913 compared with 103 per cent last year, 109 per cent in 1923 and 85 per cent in 1922.

TRADE NOTES

The McCloud River Lumber Company, operating extensively in Siskiyou county, is reported to be planning the erection of a manufacturing plant covering an area of 100 by 280 feet. The company expects to manufacture more lumber this year than during any year in its history. Production last year amounted to approximately 150,000,000 feet.

Edward O. Teall, 324 Main Street, San Francisco, has been named agent in the Northern California district for the "Acme" automobile turn-table, a product of the North Machine Company of San Francisco. The table is designed mainly for private garages to obviate the necessity of backing the machine through narrow spaces.

The Latourrette-Fical Company, formerly located in the Ray Bldg., Oakland, has moved to larger quarters at Ninth and Parker streets, West Berkeley, telephone Thornwall 848. The move was made to afford better service to clients through a combined warehouse and office plant.

H. R. Hill, formerly connected with the Fair Manufacturing Company, has opened offices and plant at 39 Tehama street, San Francisco, and will engage in the ornamental and miscellaneous iron work trade. He will operate under the trade name of H. R. Hill Company.

The U. S. Steel Products Company is planning early construction of a two-story steel frame and reinforced concrete factory at the southwest corner of Williams Avenue and Third Street, San Francisco. The plant will cover an area of 208 by 416 feet.

The Marlin Sheet Metal Works has opened quarters in the Kroncke Bldg., Pine street, San Anselmo, and will do all kinds of sheet metal work.

Gould & Tilden, mining and civil engineers, have moved from 1402 Hobart Building to 222 Mills Building, San Francisco.

BETTER PLASTERING FOLDER

"Better Plastering for Your Home" is an interesting illustrated pamphlet, printed in two colors, describing the advantages and safety of proper plastering in home construction. Points to watch to insure a "Better Plastering" job as advocated in the National Campaign for Better Plastering also are outlined. Copies may be had without charge by writing to the National Council for Better Plastering, 819 Madison Square Bldg., Chicago, Illinois.

BETTER PLASTERING CAMPAIGN

Education in the benefits of better plastering in building construction is the object of a nation-wide campaign now being conducted by the National Council for Better Plastering with headquarters at 819 Madison Square Building, Chicago. Every Lathers' and Plasterers' local union in the country will devote a meeting to a consideration of the factors underlying the time honored institution of plastering and how the ordinary kind, due to influence of modern times, is affecting the industry.

Data on Cost of Electricity Compiled by R. R. Comm. Engineer

Interesting data, as to where the cost of electricity occurs, has been prepared by Chief Engineer Lester S. Ready of the Railroad Commission, which answers questions frequently asked by consumers of electric utilities, as to why the ordinary lighting consumer pays from five cents to eight cents per kilowatt hour for electricity when street railways and other large power consumers, buy electric energy for less than one cent a kilowatt hour. The wide variation in the price of electricity is mainly due to the difference in the cost of rendering service. Electric utilities, though great in size, carry on one of the most complete retail enterprises that exist. One company has over 250,000 credit consumers whose average monthly bills are less than \$2.50, yet it is selling power to large concerns where the individual bill is over \$100.00 per month, and all the rates are fixed by the Railroad Commission.

Many people spend more money every month in the Five and Ten Cent Stores than they pay for their electric lighting service. Despite the fact that the electric service is delivered to their houses, and the bill is rendered at the end of the month, and that they must go to the Five and Ten Cent Stores, and pay cash for each purchase, and the State has no hand in fixing the prices, they do not entertain any of the questions as to the negotiation that they do about their electric bills.

The power company puts into practice the plan of "producer to consumer" that is heralded by the method of reducing the cost of living. It carries on all of the activities which, in other lines of business, are often handled by numerous agencies. If shoes were marketed under the same conditions as kilowatt hours of electricity, the shoe concern, would have to include in its operations the cattle raisers on the great plains of the West to the parcel delivery company that delivers the shoes to your home.

Hydro-electric utilities, by the installation of dams, ditches and pipe-lines, store and divert the water of the mountain streams along the side of the canyons and through the electric generative plants, transform the potential energy represented by the water high above the stream bed in the mountains 100 to 200 miles from the cities where we live, into electric energy; transmit it over long transmission lines to the cities where it is needed in pressure to voltages safe for distribution throughout the cities.

Great steam plants for the generation of electricity are maintained near the large cities to produce electric energy when the water supply is reduced in the summers, and in the dry years when inadequate supply of water power occurs. We could not obtain service as we wish, were it not for these steam plants which make possible our having electricity at all times. From the substations where the electricity is made available for distribution throughout the country and cities, large amounts of electricity are delivered directly to street railroads, large industrial consumers, cement plants, and other utilities and municipalities for distribution. From the same substations carry tensive networks along the streets and the electricity along the streets and roads to our pumping plants, factories and residences. The electricity is used

on the farms to pump water for irrigation, by industries for running manufacturing machinery, and in our homes and stores for lighting, heating and running various electric appliances.

The cost of electricity we use occurs due to various causes. Fuel to produce steam power, labor and material to operate and maintain the plants, lines and various equipment. Then there is the annual cost of the money invested in the property, largely interest upon the investment, which has been made, in power plants, transmission lines, substations and distribution lines; and, further, part of the cost are the taxes which have to be paid to the state and federal governments and local communities. An analysis of one of the largest utilities in the state indicates that this cost equals \$.004 per kilowatt hour for power as it is delivered from the hydro-electric plants. The kilowatt hour produced from the water power plants, when delivered 100 to 200 miles distant at the substation, cost approximately \$.0075 per kilowatt hour. This increase is mainly in the transportation of the kilowatt hour the long distance. The kilowatt hour produced by the steam plant to supply those not available from the water power plants cost approximately one cent a kilowatt hour and the energy from both sources delivered from the various substations averages approximately \$.0084 per kilowatt hour. The energy delivered to the large re-sale companies, railroads and cement plants, which is taken directly from the substations, cost approximately \$.0093.

The requirements of the individual consumers of the electric utilities varies from 10 to 20 kilowatt hours per month for the small residence consumer to 2000 kilowatt hours for the average power consumer on up to from 10,000,000 to 20,000,000 kilowatt hours per month for the large utility consumers. Few of us have visualized such a variation where one consumer buys from 500,000 to a 1,000,000 times as much energy as another. This explains, partially, at least, why the great difference in rates occurs.

The cost of electric energy practically doubles in the distribution from the substation to the average power consumer, as the cost of that delivered to him averages \$.0016. Extensive pole lines are required and energy has been lost in this distribution as wires are not perfect conductors for electricity.

In the cost of the lighting consumer the cost mounts rapidly because of the relative smallness of his use. Poles and wire, transformers and meters are required to supply the service continuously day and night, while he only actually uses electricity a relatively small part of the time.

On the system analyzed there are 194,000 lighting consumers who use only seven per cent of the energy produced; 16,000 power consumers used 21 per cent, while approximately 10 large consumers used 40 per cent of the energy produced. Between the pole in front of one's home and the house the company on an average has an investment of approximately \$25.00. The interest on, and maintenance of, this investment, reading of meters, preparation of bills and collection of money, the maintenance of employees to call when fuses are burned out, etc., costs approximately 75 cents per month for each lighting consumer. The average of all lighting consumers use but 40

kilowatt hours per month. The average residence consumer around 20 kilowatt hours. This cost then represents from two to four cents per unit of energy, or approximately two to four times as much as the cost of producing and transmitting the energy from 100 to 200 miles.

COMPENSATION LAW CHANGES

The Legislature of 1925 amended certain sections of the Workmen's Compensation, Insurance and Safety Act, and those changes become effective July 24, 1925.

The allowance for burial expense is increased from one hundred to one hundred fifty dollars, and this allowance is in addition to any death benefits due dependents.

Section 29 of the Act, as amended, makes it a misdemeanor not to secure the payment of compensation in either of the following ways:

1. By insuring and keeping insured with a duly authorized compensation insurance carrier.

2. By securing from the Industrial Accident Commission a certificate of consent to self-insure.

The penalty for this misdemeanor is a fine of not more than five hundred dollars or imprisonment for not more than six months, or by both fine and imprisonment.

To obtain the Commission's certificate of consent to self-insure, the employer will be required to furnish security in the form of a surety company bond or approved collateral that are legal investments for savings banks in this state. The minimum amount of security required in this respect will be twenty thousand dollars.

Section 24 of the Act, as amended, makes the claim for compensation a preferred claim against the employer, or his estate, the same as is given by law to claims for wages.

ANOTHER CONSTRUCTION HAZARD

ATLANTIC CITY, June 4—Shapely bathing girls in one-piece suits were blamed today by Superintendent of Construction G. F. Nourse for the much criticized delay in the completion of the new Absecon Boulevard to this city.

There is a swimming pool at Absecon which is popular with fair maidland damsels.

"These girls go past in one-piece suits," said Nourse, bitterly, "and my whole force lays off work while they are in sight. We often lose fifteen minutes of work at a time while the girls are going by. If the swimming pool were closed to them while this job is under way, we'd make much more progress."—New York Herald-Tribune.

BETTER PLASTERING FOLDER

"The Art of Better Plastering" is a booklet which emphasizes the necessity for Better Plastering as urged by the National Council for Better Plastering, 819 Madison Square Building, Chicago, Ill. Attractively illustrated, it tells of the importance of the plastering since it represents 80 per cent of the interior of the home, and shows the necessity of a reinforced base for the plaster. The booklet stresses the need for fire protection. While intended primarily for home owners, it will prove interesting to those in the building field. It will be mailed without charge to those who write to the National Council for Better Plastering.

Wages and Hours in the Iron And Steel Industry During 1924

Bulletin 381 of the Department of Labor covering the results of a study of wages and hours of labor in ten departments of the iron and steel industry has just been issued through the Bureau of Labor Statistics. The departments covered were blast furnaces, bessemer converters, open-hearth furnaces, puddling mills, blooming mills, plate mills, standard rail mills, bar mills, sheet mills, and tin-plate mills, which are the same departments the Bureau has covered in its studies of this industry for many years.

Summary figures for each department were published in the Monthly Labor Reviews for June, July, and August, 1924. Data were obtained from 139 separate departments of plants located in 14 States which have been grouped into four geographical districts. A total of 74,104 employees were covered who were distributed as follows: 15,540 to blast furnaces; 3457 to bessemer converters; 11,611 to open hearth furnaces; 3428 to puddling mills; 5649 to blooming mills; 4234 to plate mills; 3382 to sheet mills; 6564 to bar mills; 9690 to sheet mills, and 10,549 to tin mills. No bessemer converters, sheet or tin-plate mills were covered in the eastern district, nor bessemer converters, sheet or tin-plate mills or plate mills in the southern district, as these departments were not of sufficient importance in those districts to warrant inclusion in the report.

In the summer of 1923 a general reduction of working time was begun in this industry and the present report shows clearly the extent to which employees' hours have been reduced. The decrease was in accordance with a conference of 41 of the leading manufacturers of the country with the President of the United States.

In 1922, 69 per cent of all blast furnace employees reported worked 72 or more hours per week. Sixty-seven per cent in the bessemer converting department, 64 per cent in open hearth furnaces, 57 per cent in blooming mills, 39 per cent in plate mills and 16 per cent in bar mills also worked 72 hours or longer. In 1924, however, working time has been so far reduced that only 9 per cent of the employees in blast furnaces, 7 per cent in open hearth furnaces, 3 per cent in blooming mills, 4 per cent in plate mills and 3 per cent in bar mills were on a basis of 72 hours or more. Only two employees were found in the bessemer converting department working as many as 72 hours per week in 1924, while 8 per cent of the employees in rail mills worked 72 hours or more. Employees in sheet and tin-plate mills have been on an 8-hour basis for many years, and hours per week in these departments are subject to only slight changes from year to year. The 12-hour turn had previously been practically eliminated from the puddling mills department

also and scarcely any change in working time was noticed from 1922 to 1924.

Of the 15,540 employees shown for blast furnaces, 6982 or 45 per cent, worked seven days per week regularly and 5383 or 35 per cent worked a week of seven days at least once every three or four weeks. The large amount of 7-day week work, however, has been largely offset by the introduction of the 8- or 10-hour day. Of all employees reported, 9305 or 60 per cent were on an 8-hour day basis and 4778 or 31 per cent worked ten hours. A large majority of the 8-hour workers also worked seven days per week,—4478 all the time, and 4585 a part of the time. These data are shown in detail for each of the ten departments separately in the bulletin.

While full-time hours per week were decreased so materially, wage rates were adjusted so that employees received but slightly less pay for the shorter shifts than they had formerly received for working the longer hours. Later substantial wage increases were effected in practically every department, so that the increase in hourly earnings has even more than offset the reduction in hours per week and full-time earnings per week still show an increase over 1922 in all departments except plate mills. For example, keepers in blast furnaces received an average of 20.5 cents per hour in 1909 as compared with 63.5 cents in 1920. The average was reduced in 1922 to 42 cents per hour but increased again in 1924 to 57.9 cents. Laborers received 13.8 cents per hour in 1909, 47.4 cents in 1920, 31.5 cents in 1922 and 40.1 cents in 1924. Vesselmen in bessemer converters received 49.9 cents per hour in 1914, \$1.273 in 1920, 89.7 cents in 1922 and \$1.166 in 1924. Steel pourers increased from 43.9 cents per hour in 1908 to \$1.326 in 1920, dropped to 90.5 cents in 1922 but were increased to \$1.073 in 1924. Charging machine operators in open hearth furnaces increased from 28.7 cents per hour in 1911 to 89.5 cents in 1920, fell back to 62.5 cents in 1922, and were increased to 86.3 cents in 1924. Puddlers, level-handled, in puddling mills received 39.2 cents per hour in 1915, but were increased to \$1.227 in 1920. A reduction of approximately 50 per cent was suffered in 1922, but the average was increased again in 1924 to \$1.051. These are only samples of the averages shown for each principal productive occupation for each department for each year for which material is available.

In addition to the data showing averages for the principal productive occupations separately, index numbers for average full-time hours per week, average earnings per hour and average full-time earnings per week are shown for each department as a whole, based on the averages of 1913 as the base, or 100.

STATE'S LUMBER INDUSTRY

The lumber industry of California ranks second in the state, points out the San Francisco Chamber of Commerce, giving employment to approximately 35,000 persons annually. The value of lumber and lumber products

produced in California in one year, according to the latest available figures, amounted to \$170,000,000.

California ranks fifth among the states in the quantity of lumber produced in the United States; third in the number of people employed in the industry; and second in the value of the product, the Chamber points out.

APARTMENTS

Bids Being Taken for General Contract
APARTMENTS. Cost, \$—
SAN FRANCISCO, Pacific Ave. bet Laguna and Buchanan Sts.
Twelve-story reinforced concrete community apartment house.
Owner—Donald C. Kennedy.
Architect—F. W. Quand and Geo. Bos, Humboldt Bank Bldg., S. F.

To Be Done By Day's Work.
APARTMENTS. Cost, \$100,000
SAN FRANCISCO, S Broadway 68 E Fillmore St.
Six-story and basement reinf. conc. (24) apartments.
Owner—J. Greenback, 185 Stevenson St., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

To Be Done By Day's Work.
APARTMENTS. Cost, \$27,000
SAN FRANCISCO, SW Lincoln Way & 12th Ave.
Three-story and basement frame (15) apartments.
Owner—Stempel & Cooley, 1960 Chestnut St., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

Plans Complete. Cost, \$70,000
APT. HOUSE
SAN FRANCISCO, Balboa Street near Eleventh Avenue.
Four-story reinforced concrete apartment house (16 4-room apts.)
Owner—Withheld.
Architect—Henry Shermund, Hearst Bldg., San Francisco.

Segregated Figures Being Taken.
APARTMENTS. Cost, \$30,000
SAN FRANCISCO, N Sacramento St. W of Waverly Place.
Three-story reinforced concrete apartment house.
Owner—Wai Yen Quai.
Architect—Morrow & Garren, De Young Bldg., San Francisco.

Sub-Contracts Awarded.
APARTMENTS. Cost, \$53,000
BERKELEY, Alameda Co., Cal. University of California Campus.
Apartment and dormitory building.
Owner—University of California.
Lessee—Eph. Neils.

Architect—Reed & Corlett, Oakland Bank of Savings Bldg., Oakland.

Contractor—A. Cederborg, 1455 Excelsior Ave., Oakland.

Plumbing—Oscar Zeiss, 2181 High St., Oakland.

Plastering—G. Glimme, 4048 Brown St., Oakland.

Painting—G. Leitsen, Oakland.

Mill Work—Lannoy Bros. Mfg. Co., 5th and Magnolia Sts., Oakland.

To Be Done By Day's Work.
APARTMENTS. Cost, \$25,000
SAN FRANCISCO, S Golden Gate Ave., 125 E Divisadero.
Three-story and basement frame (12) apartments.
Owner—Beyer E. Reibman.
Architect—Baumann & Jose, 251 Kearny St., S. F.

Bids Being Taken.
APARTMENTS. Cost, \$15,000
SAN FRANCISCO, SE Cor. Union and Webster Sts.
Two-story frame and stucco apartments (4 apts.)
Owner—Samuel H. Levin, 2055 Union St., San Francisco.

Architect—Reid Bros., 105 Montgomery St., San Francisco.

Segregated Figures Being Taken.
APARTMENTS. Cost, \$80,000
SAN FRANCISCO, SE cor. Clayton and Waller.

Three-story and basement frame and brick veneer apartment bldg.
Owner—Sallier Co.
Architect—Baumann & Jose, 251 Kearny St., S. F.

Figures to Be Taken Shortly.
APARTMENTS. Cost, \$60,000
SAN FRANCISCO, NW Shrader and Fell Sts.

Three-story and basement frame and brick veneer apt. bldg., (2-, 3- and 4-room apts.)
Owner—O. M. Oyen.
Architect—Baumann & Jose, 251 Kearny St., S. F.

To Be Done By Day's Work.
APARTMENTS. Cost, \$28,000
SAN FRANCISCO, N Filbert, 100 W Steiner St.
Three-story and basement frame (12) apartments.
Owner—Income Properties Co., 825 Monadnock Bldg., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

Bids Being Taken.
APT. AND STORE. Cost, \$40,000
SAN FRANCISCO, SE cor. 38th Ave. and Euclid.

Two-story brick veneer apt. and store building.
Owner—Jacob Weisbaum.
Architect—Baumann & Jose, 251 Kearny St., San Francisco.

Sub-Contract Awards.
Figures Being Received.
APARTMENT. Cost, \$185,000
SAN FRANCISCO, N side of Jackson west of Laguna.
Eight-story class A apartment bldg. (8 apts.)
Owner—Carl Jorgensen.

Architect—Baumann & Jose, 251 Kearny St., San Francisco.
Structural Steel to Judson Mfg. Co., 604 Mission St., S. F.

LOS ANGELES, Cal.—Arthur C. Le Brun & Co., 5656 Hollywood Blvd., are preparing working plans for 3-story and basement apt. bldg. with 77 apts. on Menlo nr. Santa Barbara Ave., for L. C. Adams; 91x167 ft., brick constr., wire cut brick facing; art stone trim, comp. rf., hwd. flrs., pine trim, tile baths and drains, wall beds, built-in ice boxes, aut. storage water htr., gas ds., struc. steel, ornsm. iron; \$60,000.

LOS ANGELES, Cal.—Roy L. Jones and Dick M. Ward, 1555 N Western Ave. are preparing working plans for 3-story and basement apt. bldg. with 77 apts. on Menlo nr. Santa Barbara Ave., for L. C. Adams; 91x167 ft., brick constr., wire cut brick facing; art stone trim, comp. rf., hwd. flrs., pine trim, tile baths and drains, wall beds, built-in ice boxes, aut. storage water htr., gas ds., struc. steel, ornsm. iron, incinerator; \$100,000.

PASADENA, Los Angeles Co., Cal.—Union Constr. Co., 301 Bartlett Bldg., is completing plans and will erect 3-story and basement class C apartment building at the corner of Mentor St. and Colorado Blvd., Pasadena, for self; 138 rooms divided into 40 apartments, composition roof, pressed brick facing, plate glass, ornamental iron work, steam heating, automatic electric elevator, cement and hardwood and pine floors, tiled baths and drainboards, pine trim, ventilating system, refrigerating system, vacuum cleaning system, wall beds; \$140,000.

LOS ANGELES, Cal.—Architects Arlos R. Sedgley and Roland D. Putnam, associate, 1547 N. Western Ave., have completed plans for 4-story and basement apartment hotel building with 16 hotel rooms and 43 apartments at 887 Shatto Place for Harris N. Dickerman; brick construction, structural steel, composition roof, ruff. brick facing, art stone trim, hardwood floors, mahogany and pine trim, marble work, tile baths and drainboards, built-in ice boxes, gas heating, storage water heater, fire escapes, ornamental iron, 1 automatic elevator, day work by owner; \$100,000.

LOS ANGELES, Cal.—Jas. R. Friend, 512 Spring St. Arcade Bldg., is preparing preliminary plans for 5-story and part basement reinforced concrete apartment building, 50x115 ft., 90 rooms, 40 apartments, on Normandie Ave., owner's name withheld; reinforced concrete and steel, plaster and rock stone facing, fire escapes, ornamental iron, composition roof, automatic electric elevators, gas radiators, automatic water heaters, tile baths and sinks, wall beds, probably electric refrigerating system, mahog. trim; \$100,000.

LONG BEACH, Cal.—Architect L. L. Jones, 602 Grosse Bldg., is completing plans and bids will be taken this week for 14-story and basement, 312-room, 130-family Class A apartment building, 75x106 ft., at 1655 La Brea Ave., for H. H. Abernathy, corner Wilcox Ave. and Hollywood Blvd.; reinforced concrete frame and floor and roof slabs, art stone and brick exterior, tile and composition roof, fire escapes, ornamental iron, tiled lobby, corridors, baths and sinks, steel sash, electric elevators, steam heating system, closet beds, refrigerating system; \$700,000.

LOS ANGELES, Cal.—L. A. Smith, Lilly-Fletcher Bldg., 3rd St. and Western Ave., has completed plans for 4-story and basement brick apartment building, 50x160 ft. at the southeast corner of 7th St. and Mariposa Ave., for The 7th and Mariposa Improvement Co.; plaster exterior, art stone trim, structural steel, tile and composition roof, tile baths and drainboards, steam heating system, hardwood and tile floors, hardwood and pine trim, tile and marble work, built-in refrigerators, wallbeds; \$125,000. Day work by owner.

BONDS

GRIDLEY, Butte Co., Cal.—Election will be held July 16 in Gridley School District to vote direct tax for \$9000 to finance 2-classroom and basement addition to Woodrow Wilson School. Trustees of district are: Mrs. F. L. Bratton, C. M. Gilleece and J. C. King.

MARTINEZ, Contra Costa Co., Cal.—Oak Grove School District defects proposal to issue bonds of \$7000 to finance erection of new school.

SAN JUAN, San Benito Co., Cal.—San Juan Grammar School District at recent election defeated proposal to issue bonds of \$55,000 to finance erection of new school building.

E. T. Thurston

Mem. Am. Soc. C. E.

Consulting Construction
Engineer

57 POST STREET

Kearny 6757

Twenty-five years' experience as
engineer and general contractor.

SAN BERNARDINO, Cal.—It is probable that bond election will be held about Oct. 1 at which time electors will be asked to vote approx. \$350,000 to finance 3 year school building program. It is proposed to spend \$400,000 on elementary schools and \$450,000 on high schools.

YOLO, Yolo Co., Cal.—Proposal to levy direct tax of \$5000 to finance addition to grammar school failed to carry by vote of 7 to 1. Another election is probable.

SAN MATEO, San Mateo Co., Cal.—San Mateo Union High School District contemplates \$275,000 bond issue to finance additions to present school. It is proposed to move the San Mateo plant to the Burlingame site and consolidate the plants into one, building additional quarters needed at the present Burlingame plant. Members of the citizens' committee backing the proposal are: George Mason, chairman; E. A. Green, N. P. Peterson, E. L. Norberg, George Hughes, Fred Birlem and Elliott McAllister.

BAKERSFIELD, Kern Co., Cal.—Election will be held July 24 in Fruitvale School District to vote direct tax of \$100,000 to finance school improvements. Trustees of district are: Gus Gribble, C. A. Stubblefield and R. D. Owens.

BAKERSFIELD, Kern Co., Cal.—Election will be held July 27 in Mountain View School District to vote bonds of \$20,000 to finance school improvements. Trustees of district are: Lewis J. Young, C. H. Green and W. A. Smart.

ROSEVILLE, Placer Co., Cal.—Roseville Union High School District defeats proposal to issue bonds of \$25,000 to finance construction of gymnasium and auditorium for high school. Chief opposition to the issue was that the amount of money should have been greater.

LODI, San Joaquin Co., Cal.—Victor School District votes \$3500 to finance construction of 1-classroom addition to present school.

VISALIA, Tulare Co., Cal.—Until July 23 bids will be received by Supervisors for purchase of \$12,000 bond issue of Packwood School District; proceeds to finance construction of new school.

CHURCHES

Plans Being Figured.
CHURCH Cost, \$85,000
SACRAMENTO, Cal. Thirty-seventh & K Sts.
Frame church.
Owner—Fremont Presbyterian Church.
Architect—Leonard F. Starks, Ochsner Bldg., Sacramento.

Figures Being Taken.
CHURCH Cost, \$25,000
TRACY, San Joaquin Co., Cal.
Frame and stucco Romanesque style church, seating capacity 250, Sunday school rooms and social hall.
Owner—Presbyterian Church.
Architect—Paul V. and Rollin S. Tuttle, 363 17th St., Oakland.

Plans Being Completed.
CHURCH Cost, \$70,000
DAVIS, Yolo Co., Cal. C St., between 4th and 5th Sts.
Concrete church, stucco exterior, Mission type of architecture, 102 by 134 feet.
Owner—Davis Community Church, Rev N. M. Fisk, pastor.
Architect—Allison & Allison, Hibernian Bldg., Los Angeles.
An organ and church furniture will cost an additional \$30,000.

PASO ROBLES, San Luis Obispo Co., Cal.—Arthur G. Lindley, 800 American Bank Bldg., Los Angeles, is preparing working plans for one-story frame and stucco church, at Paso Robles, for the Paso Robles Methodist Episcopal Church; auditorium to seat about 500. Sunday school departments. Kitchen; tile and composition roof, hardwood and pine floors, pine trim, art glass, organ grille, pipe organ.

FACTORIES & WAREHOUSES

Bids Under Advisement.
FACTORY BLDG. Cost, \$50,000
SAN FRANCISCO, Brady and Market Streets.
Three-story and basement steel frame and hollow tile factory bldg.
Owner—Edward L. McLoskey.
Architect—Fabre & Hildebrand, 110 Sutter St., San Francisco.

Plans Being Prepared.
CREAMERY BLDG. Cost, \$50,000
SAN MATEO, San Mateo Co., Railroad and Third Street.
Two-story reinforced concrete creamery building.
Owner—Peninsula Creamery Co.
Architect—O'Brien Bros., 315 Montgomery St., San Francisco.
Contractor—Industrial Construction Co., 815 Bryant St., San Francisco.
Figures will be taken for grading, mill work, glass, sheet metal, roofing and considerable Ceramic tile, plastering and miscellaneous iron.

Plans Being Prepared.
MILL BLDGS. Cost, \$1,000,000
SOUTH SAN FRANCISCO.
Group of steel mill bldgs. (1st unit to be 90x2000).
Owner—Peninsula Pipe and Steel Co. of South San Francisco.
Engineer—W. W. Breite, 601 Clunie Bldg., San Francisco.

Contract Awarded.
ADDITION Cost, \$25,000
SAN FRANCISCO, SE 15th and Kansas Sts.
Two-story class C addition to warehouse.
Owner—R. P. Schwerin, Alexander Bldg., S. F.
Engineer—C. H. Snyder, 251 Kearny St., S. F.
Contractor—Geo. Wagner, Inc., 181 So. Park St., S. F.

Sub-Contract Awarded.
UBLISHING PLANT. Cost, \$300,000
SAN FRANCISCO, N Mission St. 75 W Fourth St.

Six-story class B and reinforced concrete class A publishing plant and office building, cement and plaster front, Gothic architecture.
Owner—A. Aronson, Merchants Exchange Bldg., San Francisco.
Lessee—The Bulletin, 767 Market St., San Francisco.
Architect—Ashley & Evers, 58 Sutter St., San Francisco.
Electrical Work, Decker Electrical Const. Co., 149 New Montgomery St., San Francisco.
As previously reported, Terra Cotta to N. Clark & Sons, 116 Natoma St., S. F., concrete work to Barrett & Hill, 518 Harrison St., S. F.; elevators (2 passenger and 2 sidewalk) to Otis Elevator Co., No. 1 Beach St., S. F.; plumbing and heating to James H. Pinkerton, 927 Howard St., S. F.; carpentry work to Robinson & Gillespie, 1051 Sutter St., S. F.; structural steel to Schrader Iron Works, Inc., 1247 Harrison St., S. F.

Irving Iron Works Co.
Irving Subway Flooring.

T. J. Callahan Co.

Rialto Building, San Francisco
Sutter 2763

Plans Being Prepared.
ALTERATIONS Cost, \$100,000
SAN FRANCISCO, Fillmore and Eddy Streets.
Alterations to ground floor of two-story Class C bakery building.
Owner—S. Swartz.
Architect—S. Helman, 57 Post St., San Francisco.

Completing Plans.
CREAMERY BLDG. Cost, \$15,000
WATSONVILLE, Santa Cruz Co., Cal.
One-story reinforced concrete and terra cotta creamery bldg.
Owner—Watsonville Creamery.
Architect—W. H. Weeks, 369 Pine St., San Francisco.

Contracts Awarded.
ALTERATIONS. Cost, \$82,000
SAN FRANCISCO, 1119 to 1129 Sutter St.

Remodel two 1-story and basement class C buildings for 1 structure, construct Mezzanine floor, roofs, for undertaking establishment.
Owner—W. A. Halsted & Co., 1122 Sutter St., San Francisco.
Architect—August Nordin, 717 Mills Bldg., San Francisco.
Contractor—A. H. Wilhelm, 180 Jessie St., S. F.

Electrical Work—National Elec. Co., 103 Third St., San Francisco.

Plumbing, Heating and Ventilating.
J. H. Pinkerton, 927 Howard St., San Francisco.

Contract Awarded.
OFFICE, ETC. Cost, \$22,000
FRESNO, Fresno Co., Cal.
One-story office and warehouse building.

Owner—California Transit Co., Oakland.
Architect—Swartz & Ryland, Rowell Bldg., Fresno.
Contractor—Jolly & Jolly, 547 Echo St., Fresno.

Sub-Contracts Awarded.
WAREHOUSE & MANUFACTURING PLANT. Cost, \$35,000
SAN FRANCISCO, Northwest corner of Courtland Ave. and Bradford St.

One-story concrete warehouse and manufacturing plant.

Owner—Louis R. Lurie.
Architects—O'Brien Bros., 315 Montgomery St., San Francisco.
Contractor—Industrial Construction Co., 815 Bryant St., San Francisco.
Lessee—Quality Enameling & Porcelain Works.

Cement Work—J. S. Guerin, 720 Folson St., S. F.

Roofing—Bender Roofing Co., 180 Jessie St., S. F.

Eddie Boyden in "Tell It to Eddie" in the San Francisco Chronicle of July 1st, 1925, says:

"TWAS AN UNCLEAN TRICK TO LET THOSE PETS PLAY"

It appears that the boys put one over on the Society for the Prevention of Cruelty to Animals down in Tulare County, as I get the story from "Sandy" Pratt, "Mayor of Westwood Park," who got the story over the grapevine route from fellow Tulareans. It seems that a king snake and a rattlesnake were booked to meet in combat at the recent Badger rodeo. But vigilant representatives of the S. P. C. A. blocked a public bout between the ophidians. However, after the rodeo was over, it was decided that the only decent thing to do was to turn the king snake loose so that he might return to his home. This was done. But in making his getaway the king snake started through the den occupied by the rattlesnake, and the fight was on. By some strange coincidence the human attendance was large. It may be that the crowd lingered merely to watch the getaway of the king snake. Be that as it may the fight was fast and furious while it lasted. At the end of six minutes the king snake glided away to his native heath, leaving behind one defunct rattlesnake. It is unlawful to aid or abet a battle between animals or reptiles in the State of California, and likewise it is unlawful for any person or persons to witness such combat. "But," as Sandy explained yesterday, "accidents will happen." Still, I am inclined to the belief that the boys put one over on the Tulare Society for the Prevention of Cruelty to Animals. In fact, I'm sure of it.

EDDIE WROTE the above.

WITHOUT CONSULTING Sandy Pratt.

OF THE Pratt Building Material Co.

OF MARYSVILLE, Sacramento.

PRATTOCK (NEAR Folsom).

AND PRATTO (Monterey County).

ALSO SAN Francisco.

BUT EDDIE Boyden.

IS A clever writer.

AND SANDY Pratt, producer.

OF CLEAN, sharp sand.

AND HAUD, crushed rock.

FEELS FLATTERED.

TO HAVE the big writers.

MENTION SANDY'S name.

BUT WHEN Sandy.

WAS A boy at Tulare.

HE HAD a summer job.

OF HERDING 800 turkeys.

TILL THE boss fired him.

FOR A mere trifle.

SANDY WAS making tarantulas.

FIGHT A duel.

WHEN A coyote.

WENT INTO the band.

OF FINE, big turkeys.

AND KILLED eleven goblbers.

BESIDES OTHER fine birds.

THE TURKEY owner was sore.

AT SANDY and fired him.

BEFORE SANDY could resign.

ON THIS same job.

SANDY USED to kill snakes.

AND NOW.

IN LATER years.

EDDIE GETS an idea.

FOR A story.

IN THE Chronicle.

"I THANK you."

B. A. Turkey of Rocky Hill, near Sand Creek, who fired Sandy Pratt (when 14 years old) because Sandy let a coyote eat up a band of turkeys.

SUNNYVALE, Santa Clara Co., Cal.—Until July 21, 7:30 p. m., bids will be received by Leo H. Vistoc, clerk, West Side Union High School District, to erect two-classroom addition to present high school. W. H. Weeks, architect, 369 Pine St., San Francisco and Ray Bldg., Oakland. S. Govern-
 ment Work and Supplies—bond issues contemplated or voted for all character of public improvements—
 official proposals, etc., etc. Sample copies will be furnished on request.

LARSEN ADVANCE CONSTRUCTION REPORTS

818 MISSION STREET

SAN FRANCISCO, CALIF.

Do You Know Whitco?

Hundreds of architects, thousands of builders, and tens of thousands of home owners know it to be the best, if not the only practical means of swinging and controlling casement sash and transoms.

Whitco makes it easy and safe to clean the outside of a casement from within the room.

But what does the hardware dealer know about it? Here's the answer:

Twelve re-orders in eight months—ranging from 5 to 300 sets at a time, for a total of 1481 sets—is the story of

Whitco Casement and Transom Hardware

as one Boston dealer knows it.

Up in Manchester, N. H., a much smaller city, WHITCO seems to be doing equally well. A dealer there re-ordered four times in five months for a total of 512 sets.

Down in Philadelphia, one of the several dealers now selling WHITCO, re-ordered 16 times in ten months for a total of 6983 sets, his requirements, ranging from 50 to 1,000 sets at a time.

Out in Ohio the story is the same. In Cincinnati a dealer bought two sets of WHITCO, one in solid brass and one in rust-proofed steel, for samples. This was on August 20th. On August 25th, he placed an order for 50 sets, and since that time his re-orders totalled 1,600 sets more.

Again in Toledo, a dealer whose initial order was for 100 sets, sent in enough re-orders in six months to run his total up to 850.

And so on—in Middletown, Conn., New Rochelle, N. Y., Passaic, N. J., Easton, Pa., Norfolk, Va., Newport, Ky., etc., etc., dealers not only bought from 150 to 2,250 sets of WHITCO, but the fact that they re-ordered from five to eight times, shows that they have been turning their investment in it over with more than ordinary rapidity and regularity.

Compare This With The Average Turnover In Other Lines Of Hardware

Figures compiled from authentic sources show the average to be 2.4 times per year.

Official Proposals

NOTICE TO BIDDERS

(School Furniture—Woodland Grammar School District)

Sealed bids will be received by the Woodland High and Grammar School Boards of Education, on or before July 14, 1925, for the contract of furnishing the Woodland High School with approximately one thousand assembly or opera seats, twenty mechanical or geometric drawing desks and twenty free-hand drawing desks or easels, also for approximately six hundred assembly or opera seats for the grammar school. Samples of the assembly seats should be submitted. Photographs of drawing desks should accompany descriptions and bids.

The board of education reserves the right to accept any or a part of any old or reject all bids.

Bids should be sent to either Kathryn Fall, Secretary of Grammar School Board, or Wm. M. Hyman, Secretary of High School Board.

J. L. HARLAN,
President Woodland Board of Education.

NOTICE TO CONTRACTORS

(Henton School—Fresno)

Notice is hereby given that the Board of Education of the City of Fresno School District of the City of Fresno, County of Fresno, state of California, in accordance with the provisions of law made and provided will on the 23rd day of July, 1925, at the hour of eight p. m. of said day, at the office of said board in the Technical school building at 2525 Tuolumne street in said city, let to the lowest bidder or bidders, upon the terms and conditions hereinafter specified, a contract or contracts, for the construction and completion of the Henton schoolhouse, to be erected on certain real property in said city of Fresno belonging to said school district.

All bids therefore must be in writing and sealed, and may be mailed to or left with the undersigned secretary of said board, at the said office of said board in the said city of Fresno, at any time after the first publication of this notice and before the letting of said contract or contracts. All bids submitted shall be in accordance with the plans and specifications heretofore prepared by Swartz & Ryland, architects, which together with forms for all bids, may be obtained at the office of said architects at room No. 824 Rowell building in the city of Fresno. Bids will be received for all of said work in accordance with the following segregation:

- Contract No. 1—General contract.
- Contract No. 2—Masonry.
- Contract No. 3—Plastering and lathing.
- Contract No. 4—Electrical work.
- Contract No. 5—Roofing.
- Contract No. 6—Blackboards.
- Contract No. 7—Plumbing.
- Contract No. 8—Sheet metal work.
- Contract No. 9—Glass and glazing.
- Contract No. 10—Painting and tinting.

Contract No. 11—Lump sum proposal for all work, included in contracts No. 1 to 10 inclusive.

Each bid must be accompanied either by a good and sufficient undertaking, or by a certified banker's check in a sum of not less than 10 per cent of the amount of each bid payable to said school district, conditioned that the penalty thereof shall be forfeited to said school district should the party to whom the contract or contracts shall be awarded, fail to enter into the proposed contract, or contract within five days after notification of the award, and to execute and deliver to said school district, a good and sufficient undertaking for the faithful per-

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

formance of said contract or contracts. Said board reserves the right to reject any and all bids.

Dated this first day of July, 1925.

L. L. SMITH,
Secretary of the Board of Trustees of the City of Fresno School District.

NOTICE TO CONTRACTORS

(Lasser National Park—Roads)

DEPARTMENT OF THE INTERIOR, NATIONAL PARK SERVICE, WASHINGTON, D. C. June 26, 1925.—Bids will be opened by George E. Goodwin, Chief Civil Engineer, National Park Service, in the office of the U. S. Commission, Bank of Tehama County Bldg., Red Bluff, California, at ten o'clock A. M., July 29, 1925, for the construction and reconstruction of from 9 to 11 miles of road in Lassen Volcanic National Park. Contract will be entered into for about \$100,000 worth of work, which work will be let as one or two contracts as seems desirable. Instructions to bidders; Blank proposal forms, specifications and drawings can be obtained from Mr. Goodwin's office, 808 Couch Building, Portland, Oregon, upon personal or written application and deposit of \$5.00, which sum will be refunded upon return of specifications and drawings in good condition prior to opening the bids. Specifications and drawings can also be seen at the National Park Service, Washington, D. C., and at the Chamber of Commerce of Red Bluff, Redding, Sacramento, San Francisco and Chico, California, and at the office of Association of General Contractors at Sacramento, and at the headquarters of the Lassen Volcanic National Park Association, San Francisco, California.

ARNO B. CAMMERER,
Acting Director.

General Listing Bureau

Architect's Preliminary Estimates

De Longchamps, Gazette Bldg., Reno, Nevada.

A deposit of \$100.00 will be required for each set of drawings and specifications taken from the Architect's Office.

Bids shall be filed at the office of the Comptroller of the University of Nevada not later than 9:00 A. M., July 22, 1925.

All bids are to be sealed in opaque envelope and addressed to "Board of Regents, University of Nevada," and marked "Bid for Construction of Women's Dormitory."

Each bid shall be accompanied by a certified check amounting to at least 5 per cent of the amount bid.

The Board of Regents reserves the right to accept any bid or to reject all bids.

NOTICE TO CONTRACTORS

(Prescott School Annex)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 21st day of July, 1925, at 9:45 o'clock A. M., at which time said bids will be opened for the erection and completion of the Prescott School Annex Building of the Oakland School District, to be erected on S. W. corner of 5th and Campbell Streets. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, Room 415, 532 16th Street, Oakland, California.

On a deposit of Twenty-five (\$25) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office heretofore mentioned and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of the Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not be less than Fifty Thousand (\$50,000) Dollars, but for all bids of less than Fifty Thousand (\$50,000) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District, on Tuesday, the first day of July, 1925, at 9:45 A. M., in the Board Room, 211 second floor of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,
Secretary of the Board of Education of Oakland, California.

STATE OF CALIFORNIA
CALIFORNIA HIGHWAY COMMISSION
NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m., on August 15, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Orange County, between Newport Beach and Laguna Beach, (VII-Ora-60-A & B), about nine and eight-tenths (9.8) miles in length, four (4.0) miles to be paved with Portland cement concrete and five and eight-tenths (5.8) miles to be paved with asphalt macadam.

Imperial County, between Holtville and East High Line Canal (VIII-Imp-27-D), about six and nine-tenths (6.9) miles in length, to be graded and surfaced with crushed gravel or stone or well decomposed granite.

All bids are to be compared on the basis of the State Highway Engineer's estimate of the quantities of work to be done.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: July 6, 1925.

NOTICE TO BIDDERS

(Santa Cruz—Pipe and Fittings)

Notice is hereby given that the Council of the City of Santa Cruz invites sealed proposals or bids for furnishing the following:

10,000 feet 4 inch Class B Cast Iron Pipe Bell and Spigot Joints.
6—4 inch 45° Cast Iron Bends.
24—4 inch x 4 inch Cast Iron Tees.
60—4 inch 22½° Cast Iron Elbows.
Pipe to be not less than 12 foot lengths.

Pipe and Fittings to be delivered F. O. B. Santa Cruz. Delivery to be made within 50 days after award of contract.

Said proposals or bids will be received at the office of the City Clerk in the City Hall, Church Street, in the City of Santa Cruz, up to the hour next 9 o'clock A. M., on Thursday, the 16th day of July, 1925, and the same will be opened by said Council at 9:30 o'clock A. M. on said day.

All proposals or bids must be in writing, give the total amount of bid submitted and must be accompanied

by a certified check or bond for ten per cent of the amount bid, payable to the City of Santa Cruz.

The Council of said City reserves the right to reject any and all bids.

S. A. EVANS,
City Clerk.

Dated July 3rd, 1925.

STATE OF CALIFORNIA
CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS
SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock p. m., on July 20, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Shasta County, a reinforced concrete bridge across Charley Creek 1½ miles north of Pollock (II-Sha-3-C), consisting of one 148-foot open spandrel arch span and eight 25-foot girder approach spans.

Riverside County, a reinforced concrete girder bridge, 21 feet wide, across Coachella Stormwater Channel about 2 miles northwest of Indio (III-Riv-26-E), consisting of sixteen 30-foot spans on concrete pile bents.

San Bernardino County, between Victorville and Hicks (VII-SB-31-D, B & P) about twenty-five and seven-tenths (25.7) miles in length, to be graded and surfaced with crushed gravel or stone.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank forms of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: June 22, 1925.

NOTICE TO CONTRACTORS
(Highlands Hospital, Alameda County)

Office of the Clerk of the Board of Supervisors, Alameda County, Calif.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County at his office until Monday, July 20, 1925, at 10:30 o'clock A. M., (the day when said bids will be opened and the contract awarded) for the Highways and Hospital, and miscellaneous equipment consisting of steel instrument cases, steel lockers, utensil racks and refrigerators, and for sterilizing equipment, for use at the Highlands Hospital of Alameda County, situated at 14th Avenue and Vallecito Place, Oakland, Alameda County, Calif.

The above specified equipment is divided into the following departments: Department No. 21, (miscellaneous equipment), Department No. 22 (sterilizing equipment, etc.).

Complete plans and specifications for each of the above specified departments are on file in the office of the County Clerk in the Hall of Records Building, Oakland, California, where copies may be obtained by requesting with the County Clerk the sum of Twenty-five (\$25.00) dollars for each department. Contractors will be restricted to the least length of time the plans and specifications may be retained to twelve (12) days. Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda.

Each bid must be accompanied by a check for at least ten per cent (10%) of the total amount of the bid or proposal, certified to by some responsible bank and made payable to Geo. E. Gross, Clerk of the Board of Supervisors, to be forfeited to the County of Alameda in the event of a default. Damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award, or to give the bond required by the Board for the faithful performance of the contract.

The Board of Supervisors reserves the right to reject any and all bids.

Dated: June 22nd, 1925.
GEO. E. GROSS,
Clerk of the Board of Supervisors of Alameda County, California.

NOTICE TO BIDDERS
(Merced Irrigation District)

Notice is hereby given that sealed proposals will be received at the office of the Board of Directors of the Merced Irrigation District, in the Barcroft Building, Merced, California, until 10 A. M., on Tuesday, July 28, 1925, for the furnishing of certain equipment for the Spillway Gates of the Eschschuer Dam and Power Plant of the Merced Irrigation District, consisting of the following materials:

14 Sets of Gate Operating Gearing, consisting of Cast Iron Gears and Racks with screw stems on cast steel bed plate, and worm and bevel gear drives.

Specifications for said material can be seen at the office of said Board and copies thereof will be furnished upon application to the Secretary of said Board accompanied by a deposit of \$20.00 to be repaid to all bidders and to all others upon return of the plans and specifications in good and acceptable condition not later than the day set for opening bids.

Said Board will be in session at its office at 10 o'clock A. M. on Tuesday, July 28, 1925, and open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Board reserves the right to reject any and all bids.

Each proposal must be accompanied by a certified check for five (5) per cent of the amount of the bid, or of the bidder's highest bid in case alternative bids are submitted, said check to be payable to the order of the Merced Irrigation District, and the bidder, who the bidder will, if successful, execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five (25) per cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications, said bond to be approved by said Board.

The proposal form bound with the specifications must be properly filled out by the bidder, and the plans and specifications, including the proposal, must be submitted intact with the bid in a sealed envelope to the Board of Directors of the Merced Irrigation District, and marked to indicate that it is a proposal for Equipment for the Spillway Gates for the Eschschuer Dam.

Done in pursuance of an order of the Board of Directors of the Merced Irrigation District, this 9th day of June, 1925.

H. P. SARGENT,
Secretary of the Board of Directors of the Merced Irrigation District.

Engineering News Section

Interior of Grauman Metropolitan Theatre, Los Angeles. Done entirely in concrete. William Lee Woollett, Architect.

TRULY CREATIVE

AMONG advanced achievements in concrete is the interior of **Grauman Metropolitan Theatre, Los Angeles.**

From lobby to proscenium the conception has been executed in the same basic material used to insure structural soundness and economy.

Especially worthy of note are the rough, form-marked walls with murals painted on them, the great open trusses and massive beams, the decorated columns and the symbolic statuary—all of concrete.

The result is a daring creation indicating possibilities through the medium of concrete undreamed of a few short years ago. And it may well be that this truly creative work will serve as an inspiration for other individual achievements destined, perhaps, to herald a new era in architecture.

* * *

Competently supervised, modern workmen can produce concrete in any form, texture or color the architect may direct. If you are interested, we shall be most happy to send further information. Simply address the nearest office listed below.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

TRY WHEELBARROW TEST

If you want to find out the difference
between cost of a paved road and a
dirt road or gravelled one, take a
wheelbarrow, load it down with bricks
and start down a cement walk. When
you get to the corner of the next block,
try the street for a block. If you are
not satisfied then, go a little farther
and try to push it through a mud hole
or a stretch of sand. By this time, you
ought to realize just how much more
energy is required. The same thing
holds true of pushing an automobile
over gravel or dirt roads. There is
just enough difference in the energy
required so that a gallon of gas will
drive a car about three miles farther
on pavement than it will on sand or a
soft road. Now then, will it take you
very long to figure out where a tax-
payer could soon make the price of
his share of taxes required to build sub-
stantial paved roads, to say nothing
of the saving in maintenance? Answer
us that?—Wabasha Herald.

METAL LATH FOLDER ISSUED

"The A-B-C-of Metal Lath Erection,"
a folder issued by the Associated Metal
Lath Manufacturers, Inc., 123 West
Madison St., Chicago, is filled with
practical information for those who
wish to familiarize themselves with the
proper erection of metal lath as a
plaster base. Proper weights of the
material for different walls and ceil-
ings are listed; explicit directions for
applying the material are given and
the booklet is illustrated with dia-
grams, which prevent any possibility of
mistake. Copies may be procured
without charge by writing to the Metal
Lath Manufacturers.

KOEHRING DANDIE

Light Mixer

Dandie Light Mixer

7 cu. ft. mixed Concrete. Two or four cylinder gasoline engine. Power charging skip, or low charging hopper and platform. Rubber tired steel disc wheels or steel rimmed wheels.

*Send back
the coupon*

VALUE
—Such as Never Before
Seen in the Light Mixer Field!

STILL within the price range for light mixers, this 7 ft. Dandie Model offers extraordinary values!

A heavy duty, four cylinder, radiator cooled gasoline engine, completely enclosed in a steel housing.

Completely enclosed transmission always running in an oil bath, and mounted on shaft revolving in roller bearings. Steel disc wheels with rubber tires or regular steel rimmed wheels. Beveled edge, chilled drum rollers, pinned to shaft which turns in big bearings! Koehring double gear drum drive!

In every bearing—every detail—you'll find the reliable Koehring construction the surest insurance of reliability and long, trouble-free service life!

Light Weight—just the balanced light weight to be hauled on its rubber tires behind your car or truck and to lose no time between job and job. This Dandie Model has been tested and tried by *overwork* and abuse—and it's more than worthy of the Koehring name.

For high speed operation—solid, substantial construction and light weight portability—this Dandie has established new values and standards in the light mixer class.

SHEET METAL CORNICES

The National Association of Sheet Metal Contractors, 608 Chestnut St., Philadelphia, Penn., has issued an illustrated catalogue for architects and contractors offering suggestions on specifications for sheet metal cornices. Notable structures in the East are featured and are accompanied by detail drawings of the various installations. Copies of the book may be had from the association offices in Philadelphia. A limited number of copies are available at the headquarters of the Sheet Metal Contractors' Association of San Francisco at 180 Jessie Street.

PROPOSED TOWER BUILDINGS

Further great development is in process in the tower and pyramidal styles of architecture for city buildings. Designs have been worked out for a structure eighty-eight stories high by the Italian architect, Mario Palanti, and 1400 ft. high by a New York architect, this latter a veritable plumb set on a base 125 ft. square. Whether or not these particular structures are ever built, the style has assumed a commanding place in contemporary architecture.—Exchange.

STEADY GAIN IN UNITED STATES CONSTRUCTION

Value of engineering and construction contracts let in the United States from January 1 to June 1 shows a gain of 7 per cent, compared with the corresponding period a year ago. The total value of contracts actually let in the first five months of the year amounted to \$341,019,000, as against \$380,025,000 in the same time a year ago, the "Engineering News-Record" reports.

Construction has been on the upgrade in all sections of the country, except in the South and Middle West. In the South the slowing down occurred mainly in public works, while in the Middle West the decline reflects lessened activity in bridges and commercial buildings.

Contracts let in the month of May were valued at \$199,205,000, which compares with \$239,785,000 in May a year ago. May construction activity, according to sections of the country, was as follows: New England, \$16,915,000; Middle Atlantic \$76,417,000; Southern, \$13,619,000; Middle West, \$33,012,000; West of Mississippi, \$39,230,444, and Far West, \$20,009,000. Minimum costs observed in arriving at these figures are waterworks and excavations, \$15,000; other public works, \$25,000; industrial buildings, \$40,000; commercial structures, \$150,000.

Cost of construction for the entire country declined 1 per cent in the month of April. There was a similar drop in April, indicating that the trend continued downward in rather easy stages. Price firmness prevailed in such items as light rails, railway supplies, steel scrap, sewer pipe, asphalt, tile, rope and piling. Weakness was apparent in pig iron, railroad ties, cast iron pipe, lumber, rivets, nails, steel sheets and water and sewage treatment chemicals.

The construction cost index number settled at 204.60, which compares with 207.20 on May 7. The average rate for common labor for the entire country is now 53 cents an hour, against 54 cents a month ago.

JUNE BUILDING TOTALS HALF BILLION. SUMMARY SHOWS

Half a billion dollars of buildings under construction throughout the country is the record-breaking figure set by June, 1925, according to compilations made by the Associated General Contractors of America.

The June total exceeded the record set in May last.

A nationwide survey has led experts to the conclusion that a great portion of the record-breaking activity is due to the construction of residences.

The association predicts that the volume of construction will remain at or near its present high mark during the seasonal peak period, covering the next three or four months.

The actual volume of building in June, indicated by shipments of construction materials, was more than twice that for the same month in 1913.

The combined construction activity for the first six months of 1925 exceeds the 1924 period by 13 per cent.

ENGINEERS APPOINTED TO DRAW UP PLANS FOR \$5,000,000 DAM

A board of consulting engineers to supervise plans and specifications for the construction of the Coolidge Dam on the San Carlos Indian Reservation in Arizona, was named June 22 by the Commissioner of Indian Affairs with the approval of the Secretary of the Interior.

The members of the board include, Louis C. Hill, construction engineer, and Fred A. Noetzel, designing engineer, Los Angeles, Calif., and Andrew J. Wiley, construction engineer, Boise, Idaho. All of the appointees have wide experience in engineering and irrigation enterprises in the West, two of them having served with the Bureau of Reclamation.

The dam, which will be built across the Gila River near San Carlos, will cost approximately \$5,000,000 and will store water for the irrigation of from 75,000 to 100,000 acres of Indian lands, public and private lands in the lower Gila River Valley. It will furnish a permanent supply of water to the Pima Indians living on the San Carlos Reservation.

Congress recently authorized the construction of this reclamation project, the expenditure not to exceed \$5,500,000. An appropriation of \$450,000 has been made to begin work and the selection of a board of consulting engineers to draw up and supervise plans and specifications for the dam will be the first step toward completion of the project.

SHORT SKIRTS THREATENED BY IMPROPER HOUSE HEATING

Short skirts and chiffon stockings represent a problem that must be solved by the heating engineer, according to R. M. Searle, president of the Rochester Gas and Electric Corporation.

Mr. Searle, speaking at a recent meeting of the American Gas Association, declared that present day heating methods in most American homes are totally inadequate to cope with modern fashions.

"Home are either hot, cold or indifferent," he said. "The ceiling is 105 and the floor 60, and the women today, in short skirts and silk stockings, do not sit on the ceiling."

Mr. Searle advocated the increased use of city gas to improve temperature conditions in the home.

"Heating with gas," he said, "is the only way on earth that you can maintain a temperature with a properly designed furnace and an even heat distribution between the ceiling and the floor of one-half of one degree with any degree of outside temperature. That means that the air is put into the room in a proper way."

"You can go into the average coal-heated home today, and you will see them sitting on their feet to keep warm in an upholstered chair, and they are the ones that stay there all day while we are active in an office and more or less comfortable."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The anti-injunction bill, which was sponsored by organized labor in Illinois, was recently passed by the legislature and it is almost sure to be signed by the governor. The bill sanctions picketing and prohibits judges from restraining strikers from persuading workmen to stop work. It also provides that no restraining order shall be issued to prevent employees from terminating their employment or from peacefully persuading others to do so. Unless this law is declared unconstitutional, employers in Illinois will be without recourse to courts of equity in any future labor trouble.

W. C. Baccus, Oakland city commissioner of streets, urges the construction of a concrete and steel bridge over Lake Merritt as a means of solving the congestion of traffic in the lake district. City Engineer W. W. Harmon estimates the cost of the proposed structure at \$2,000,000. It is probable that provision will be made in the \$20,000,000 harbor bond issue to be submitted within the next two years for funds to finance the structure.

Ernest Pickering has acquired control of $\frac{3}{4}$ mile ocean frontage between Pacific and Mission Beaches, and will start work shortly on a \$1,000,000 pleasure pier, 600x800 feet. Among those interested are: A. H. Frost of Ames & Frost, lumber firm of East Jordan, Mich.; Phillip Morse, president San Diego Lumber Co., and William Kettner of San Diego.

Thirty-five American cities are overbuilt in apartments, according to the semi-annual survey of the National Association of Real Estate Boards. In a similar survey last December only six cities had too many flats. The last survey says: "Existing shortage still is most felt in single family dwellings, although twenty cities report an oversupply."

A new process which, by removing smoke from bituminous coal, will result in smokeless cities was described to the members of the National Coal Association at their recent Chicago convention by Russell Cooper of Georgetown, Pa. Research work leading to such a result is being carried on by the Carnegie Institute of Technology.

Architects' certificates were granted to the following at a meeting of the State Board of Architecture, Southern Division, June 30: R. F. Rabold, 2819 Elm St.; Sidney W. Orme, 603 Wright-Candler Bldg., and Russell E. Collins, 1123 Stock Exchange Bldg., all of Los Angeles; William L. Stoddard, 50 E 41st St., New York City; Walter C. Poland, 608 E Colorado St., and Trent Thomas, 2145 Mar Vista Ave., Pasadena.

Charles Osgood Hooker, lumberman, died in San Francisco, July 7. He was one of the pioneer lumbermen of San Francisco and amassed a fortune in that business in the early days.

Soloman Frost, widely known Oregon and Michigan lumberman, is dead. A brother, W. H. Frost, resides at Long Beach.

The average price of building material is under that of last year, according to data compiled by Greenebaum Sone Investment Co. Lumber is an exception to the general trend. According to the Department of Labor, lumber prices now stand at a level 93 per cent above the level of 1913, while last year at this time it was 92 $\frac{1}{4}$ per cent above the level of 1913. The present level of common brick is 108 per cent above the 1913 level; last year it was 114 per cent above. Structural steel is far below a year ago. The 1924 level was 65 per cent above 1913 while the latest Labor Department report shows the level 39 per cent above 1913.

Prior to the last five years American highway engineers were more or less in the habit of going to Europe to observe the latest developments in highway construction. Today the reverse is true. So rapid and so extensive has been the development of road building in America that European highway engineers are now coming to this country for the purpose of studying the materials, methods and machinery employed in building roads. (Amer. Rd. Bldrs. Ass'n.)

General John C. Greenway, former manager of the Calumet and Arizona Mining Company, is reported to be backing a \$27,000,000 project for the development of 200,000 h. p. power plant on the Colorado river at the mouth of Diamond Creek, north of the Santa Fe Railway Station at Peach Springs. The project is to be known as the Girard-Greenway hydro-electric project. Probably the greater part of the power would be utilized by copper leaching works.

Plans for the construction of an electric railroad from San Bernardino to Lake Arrowhead, a mountain resort, to cost \$2,000,000 are announced by J. Benton Van Nuys, president of the Lake Arrowhead Company and D. W. Pontius, vice-president and general manager of the Pacific Electric Railway. The resort is a mile above sea level and the survey from the present rail ends covers about fifteen miles.

Bids will be considered by the Alameda County Board of Supervisors on July 20 to pave approximately five and one-half miles of road between Sunol and Pleasanton. Geo. A. Posey, Alameda county surveyor, estimates the work to cost \$188,000.

The San Francisco Board of Supervisors has authorized the circulation of petitions seeking the formation of a bridge and highway district to construct the Golden Gate straits bridge over San Francisco Bay. Registrar Zemansky will have charge of the petitions.

Thirty permits were issued in Alameda during the month of June, just closed, for new construction valued at \$111,374 and sixty-two permits for alterations valued at \$25,607, making the total operations for the month \$136,981.

TRADE NOTES

The Union Rock Company of Los Angeles has purchased the rock, sand and gravel plants of the Los Angeles Rock & Gravel Co. at El Monte and Baldwin Park from Henry W. Hawley. Included in the purchase is a railroad four miles in length connecting the two plants. Hawley will continue to operate the plants of the Los Angeles Rock & Gravel Co. in the Arroyo Seco and at Culver City, but the output of both will be marketed by the Union Rock Company. The new deal gives the Union Rock Company a total capacity of about 8,500,000 tons of rock, sand and gravel a year. It will involve no changes in the Union Rock Company, of which George A. Rogers is president.

Douglas F. Smith has become associated with Geo. A. Schuster, contracting engineer, specializing in steam and hot water heating, with headquarters at 916 Franklin street, Oakland. With the entry of Smith into the firm it will enable the company to enter the plumbing field on a large scale, Smith having been connected with that industry for many years.

The Nelson Lund Brick plant east of Palermo, Butte county, has started operations with a daily capacity of 10,000 bricks. Machinery is being installed which will permit of a 40,000 capacity production daily. Clay deposits owned by the company, according to reports, will last one hundred years.

The board of directors of the Monolith Portland Cement Company has declared the regular semi-annual dividend on preferred stock at the rate of 8 per cent per annum, payable during the month of July, 1925, to stockholders of record at the close of business June 15, 1925.

Albert Lea, formerly connected with Pilkington Bros., Ltd., of Winnipeg, Manitoba, Canada, has been appointed a member of the sales staff of the Cobbleck-Kibbe Glass Company with headquarters at 666 Howard street, San Francisco.

L. L. Harris of the electrical contracting firm of Hagen & Harris, Napa, Calif., announces his retirement from the concern to engage in another line of business. Hagen will continue to operate under the firm name of Hagen & Harris.

Campbell Constructing Co., general contractors and engineers, formerly located in the Nicolaus Building, Sacramento, has moved to new quarters at 800 R street, Sacramento, where offices and warehouse are under one roof.

PORTLAND BUILDING

PORTLAND, Ore., during the month of June, witnessed the biggest period of construction in its history, basing the operations on building permits issued, surpassing March of this year, the biggest previous month, by \$100,000. The totals follow:

	No.	Amount
June 1925.....	1149	\$4,775,457
June 1924.....	1159	2,344,290
Six months 1925.....	7792	22,882,182
Six months 1924.....	7646	15,032,855

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

GOLF TOURNAMENT

The Alameda County Builders' Exchange will shortly stage a Handicap Golf Tournament at the Sequoia Links in Alameda county. The winner of the tournament will have his name engraved on a beautiful silver cup which shall remain the property of the exchange. The winner, however, will be given a miniature cup. The tournament is open to all members of the exchange and their employees.

Entry blanks may be obtained from The Golf Shop, 23 Grand Ave., Oakland, or from the Golf Editor of the "East Bay Builder," 354 Hobart St., Oakland.

PLUMBERS ADOPT UNIQUE TRAINING METHOD

Likening the method adopted by a group of Wisconsin cities to train apprentices in the plumbing trade to the itinerant preacher of colonial days known as the "circuit rider," the Monthly Service Bulletin of the National Trade Extension Bureau in a recent issue describes in detail the plan which is being tried out in that State. Five cities have employed a plumbing instructor to spend one day a week in each place instructing apprentices in the plumbing trade. This plan will no doubt be watched by many other small cities where there are not enough apprentices to keep an instructor busy and if it proves successful in Wisconsin it will likely be used in other localities.

BRINDELL IS ACTIVE AGAIN IN NEW YORK

According to an affidavit submitted to the New York State Parole Board, Robert P. Brindell, former czar of the building trades of New York City, and who was released on parole from Sing Sing a few months ago, is again injecting himself into the labor movement and extortion is alleged in the affidavit. At the time of his release last December, he stated that he would make no endeavor to re-affiliate himself with the building trades, and officers of the movement said there was no place in their ranks for the former leader. Samuel Untermyer, who was largely instrumental in having Brindell convicted a number of years ago, has been appointed as Special Deputy Attorney General to investigate the charges.

FLAY FIVE-DAY WEEK

Going on record as being opposed to the proposed five-day week working schedule which is being proposed by a local tradesmen's union, the Vallejo Builders' Exchange, at a special meeting held voted that the five-day working week schedule would be detrimental to the progress of building in Vallejo.

According to an announcement by the members of the Exchange, a local tradesmen's organization is endeavoring to eliminate Saturday from the regular working week.

Wages For Fresno Building Trades Will Remain Unchanged

Wages for building mechanics in Fresno will remain the same, according to the wage scale adopted by the Fresno Joint Labor Board and announced by Walter C. Adkins, president of the board and representative from the Fresno Building Trades Council.

The new wage agreement only awaits the approval of the Fresno Building Trades Council to become effective, Adkins said. It will be submitted Monday July 19, for action.

The wage agreement on building was adopted without much parley by the representatives of the builders and the laborers at recent conferences of the Fresno Joint Labor Board, consisting of five representatives of labor and employers, respectively.

The new agreement between the unions and the Fresno Building Exchange was altered in only one respect, according to Adkins. It provides that the union label may be taken off of mill work without the other crafts refusing to work with it.

It is understood that this agreement was made to protect local builders who were willing otherwise to work with the unions.

This is the third year that the Fresno Joint Labor Board has operated successfully. Organized at a time when the "open shop" - was seriously considered for the city, it recognized the bargaining power of labor in Fresno and the necessity for industrial peace, and decided to settle all wage disputes through negotiations with the labor board as clearing house.

A clause of significance in the labor agreement this year is the fact that at any time when a new set of conditions arise the board can meet and fix the wage scale immediately. This was pointed out by Adkins, who said that in the event oil was struck or a shortage of mechanics was found the board could immediately adjust the scale.

The members of the Builders' Exchange on the Board are: R. F. Felchlin, Arthur W. Bernhauer, George Faris, F. E. Ellings, H. H. Courtwright. The board members from the union are composed of Walter C. Adkins, secretary of the Building Trades Council and business manager; C. C. Jarman, Joseph P. Creem, James Leiber and William Donne. Donne is the only new member on the board from last year.

State Announces Examinations For Building Industry Positions

The California State Civil Service Commission with offices in the Forum Building, Sacramento, announces examinations will be held in the immediate future to fill vacancies in the following positions:

BOILER INSPECTOR—Paying salary of \$175 a month. The duties of the position are under direction to inspect all types of steam boilers and pressure vessels in accordance with the provisions of the Workman's Compensation Insurance and Safety Act, and the rules and regulations promulgated thereunder; and to report upon the condition of such boilers and pressure vessels. Applicants must submit evidence of at least five years of experience in responsible charge of the operation, repair, building, or inspection of steam boilers, must be familiar with all recognized types of steam boilers, must have a working knowledge of the boiler safety orders of the Industrial Accident Commission, and must be able to inspect steam boilers and report completely upon the safety and operating conditions of such boilers.

ELEVATOR INSPECTOR—Paying salary of \$175 a month. The duties of the position are under direction to inspect elevators in accordance with the provisions of the Workman's Com-

pensation Insurance and Safety Act and the rules and regulations promulgated thereunder; and to report upon the condition of such elevators. Applicants must submit evidence of at least five years of experience in the construction, erection, or inspection of elevators, must be familiar with all recognized types of elevators, must have a working knowledge of the elevator safety orders of the Industrial Accident Commission and must be able to inspect elevators and report completely upon the safety and operating condition of any elevator.

SAFETY ENGINEERS—Junior safety engineer (mechanical), paying from \$170 to \$230 a month; assistant safety engineer (construction), \$235 to \$280 a month; assistant safety engineer, (mechanical) \$235 to \$280 a month; assistant safety engineer (mining) \$235 to \$280 a month.

Further information together with applications may be obtained from the State Civil Service Commission, 116 State Building, San Francisco; 331 Forum Building, Sacramento; 1007 Hall of Records Building, Los Angeles and from the State Employment agencies in San Francisco, Oakland, San Jose, Fresno, Stockton, Los Angeles and San Diego.

U. S. THIRD IN UNEMPLOYMENT

The United States ranks third in unemployment, according to a recent survey made by the National Industrial Conference Board. Great Britain heads

the list with approximately 30 men per 1000 population unemployed. Austria is next with 20 per 1000 population, while the figures for the United States are 19.9 per 1000. Russia is fourth with 13.6. Finland is at the bottom of the list with .5 per 1000.

BUILDING MECHANICS APLENTY AT
SANTA BARBARA

The State Labor Commissioner, Walter G. Mathewson, has issued the following statement regarding conditions of employment in Santa Barbara: "Owing to grossly exaggerated reports concerning the real extent of the earthquake in Santa Barbara, thousands of men, especially building trades workers, are flocking to this city in the hope of finding lucrative employment. But, as a matter of fact, Santa Barbara is fully supplied with resident workers thrown out of jobs on account of the shock, and all newcomers find it necessary to retrace their steps to whence they came. The secretary of the Santa Barbara Chamber of Commerce and labor experts are authorities for the statement that neither jobs nor sleeping accommodations can now be found at Santa Barbara for the extra throngs of job seekers streaming into the afflicted city. Workers are therefore warned not to waste their time and money by going to Santa Barbara to find work without first making sure of jobs through the state free employment offices or other agencies, as is done in normal times."

TO INCREASE FEES

An increase in revenues accruing from electrical, plumbing and other fees received for permits issued by the public works department in connection with building projects will offset a sufficient amount of tax revenue to permit a reduction of two cents in the tax rate of Fresno for the fiscal year.

This was the statement of Commissioner of Public Works A. M. Jensen, during the city commission's discussion of the budget for his department. On the strength of Jensen's declaration that a portion of the budget in which revenues from sources other than taxes are set up was increased approximately \$10,000, Jensen was permitted to add appropriations for salaries of two inspectors, one in the electrical department and one in the plumbing inspection service, each of whom will receive a salary of \$200 a month.

ARCHITECTURAL DESIGNERS ARE
WANTED BY STATE

The California State Civil Service Commission, Forum Bldg., Sacramento, announces an examination will be held in the immediate future for the position of "Architectural Designer" in the Bureau of Architecture, State Department of Public Works. The position pays from \$285 to \$350 a month. Examination will be held in San Francisco. Further information together with application blanks may be had from the commission offices at Sacramento, 116 State Bldg., San Francisco, and 1007 Hall of Records Bldg., Los Angeles.

MAY CEMENT OUTPUT

Cement production established a record in May, with a total of 15,503,000 barrels, as compared to 13,807,000 in April, the Geological Survey reports. Shipments during June totaled 16,735,000 barrels, the largest figure since last October.

Stocks at the end of the month totaled 18,646,000 barrels, as compared to 19,877,000 at the end of the previous month. Stocks of clinker, or unground cement, at the mills at the end of May amounted to about 8,892,000 barrels, as against 9,731,000 at the beginning of the month.

\$47,591,739 Expended During
June For Pacific Coast Building

A grand total of \$47,591,739 in building permits issued during June in 79 cities of the Pacific Coast, is a figure which is 1% greater than the comparable figure for May of this year, 35% above the total for June of last year, 1% less than the June total for 1923 and 34% greater than the figure for June of 1922. This analysis of current building activities is shown in the Pacific Coast Section of the National Monthly Building Survey of S. W. Straus & Co.

Following are the official June, 1925, building construction figures reported by building department executives from 79 cities in the seven Pacific Coast States comprised in the Pacific Coast Section:

	June, 1925	June, 1924	May, 1925
CALIFORNIA:			
Alameda	\$ 138,981	\$ 133,735	\$ 123,541

TERM RESPONSIBLE CONTRACTOR IS DEFINED

Realizing the importance of placing a definite concept upon the phrase "responsible contractor," the Associated General Contractors of America recently appointed a committee to develop a distinct expression of the meaning of the term.

This committee, with J. H. Ellison of Minneapolis as its chairman, presented its report at the recent meeting of administrative bodies of the Association held at Washington.

The text of the report is as follows: The Responsible Contractor—Whether an individual, firm or corporation, must possess, as a minimum of requirement, three essential qualifications, as follows:

Integrity—He must consistently and persistently comply with the spirit as well as the letter of his contracts and must handle every transaction with fairness and honor.

Skill—He must possess the necessary technical knowledge and practical business experience, as applied to his particular form or group of undertakings, to enable him to carry them to completion in a workmanlike and economical manner.

Responsibility—He must possess cash or credit to meet all his commitments, also the equipment and organization for the satisfactory performance and completion of his undertakings.

In special cases, problems may appear which will demand that consideration be given to other qualifications, but in general the above three requirements apply to all construction contracts, and without them no contractor can properly be regarded as wholly satisfactory.

BUILDING ACTIVITY

Business conditions in the Twelfth Federal Reserve District, as reported by John Perrin, Federal Reserve Agent, with regard to building is summarized as follows:

"Value of building permits issued in 20 principal cities declined by 7.1 per cent during May, 1925, as compared with April, 1925, a decrease slightly greater than that which usually occurs at this season of the year. Compared with May, 1924, value of permits issued during May, 1925, was greater by 21.7 per cent. A large part of the increase as compared with last year was reported from Los Angeles, where value of building permits at \$16,602,502 for May, 1925, was \$7,812,570 or 88.9 per cent larger than for May, 1924. Building costs, including labor and materials, changed little during April and May and at the close of the later month were about 2.5 per cent lower than a year ago."

STATE BUILDING CONSTRUCTION

Expenditures for new building construction at state institutions during the new biennium will be three times greater than those of any previous biennium. The construction funds totals \$5,200,000.

In making this announcement, George G. Radcliff, chairman of the state board of control, said that the most necessary projects will be completed first. These include needed buildings at the state hospitals.

H. B. Braden, a member of the board of control, has just completed an inspection of the state institutions in Southern California in company with State Architect George B. McDougall, under whose supervision the building program will be carried out.

Tudor Succeeds Loder as Good Roads Manager For C. S. A. A.

Arthur E. Loder, manager of the good roads bureau of the California State Automobile Association, has resigned to accept an executive position with the Caterpillar Tractor Company, according to an announcement by D. E. Watkins, secretary and general manager of the association. William M. Tudor, who has been closely identified in an executive capacity with the automobile association for the past eight years will succeed Loder as manager of the good roads bureau. Tudor has wide experience as an executive and has closely followed the development of the good roads movement in California from its inception.

According to Watkins' announcement, Tudor will actively manage the affairs of the automobile association's good roads bureau which functions under the direction of a good roads committee headed by H. J. Brunner, of San Francisco, a consulting engineer. Brunner is a member of the American Society of Civil Engineers and vice-president of the Pacific Association of Consulting Engineers.

Loder, who leaves the automobile association to go with the Caterpillar Tractor Company which was recently organized with the amalgamation of the Holt and Best tractor companies, has been manager of the association's good roads bureau for nearly two years. Previously he was assistant chief engineer and also district engineer of the United States Bureau of Public Roads and before that division engineer of the California Highway Commission and chief engineer of the Los Angeles County highway commission.

In his new position with the Caterpillar Tractor Company, Loder will exert a broad road building experience in the general sales promotion and research activities of the California manufacturing concern which now operates manufacturing plants at San Leandro, Stockton, and at Peoria, Illinois. Loder is making his headquarters at the company's general offices at San Leandro.

Engineers Endorse Lumber Standards

The joint meeting of the Timber Committee of the American Society for Testing Materials and the Bridge and Trestle Committee of the American Railway Engineering Association, at Atlantic City, went definitely on record in support of American Lumber Standards. These two committees, more than any other two technical committees in the country, shape specifications used by the specifying consumer. Unless specifications have the stamp of either the American Society for Testing Materials or the American Railway Engineering Association they do not get far with the engineering or architectural professions.

The strong support therefore, that was given, particularly to the waste provisions for the grading of structural material, adopted by the May 1st General Conference at Washington, by these two Committees in joint session marks a distinct forward step and indicates consumer appreciation of the effort the lumber industry is making to provide an equalization of grading methods for structural material. There will be a meeting of these two Committees at Madison, Wis-

consin, in September. The session will extend over several days, probably a week, and at that time the detailed grading rules, which will be offered for adoption to the American Railway Engineering Association next March and to the American Society for Testing Materials next June, will be developed.

Dudley F. Holtman, Construction Engineer of the National Lumber Manufacturers Association, who represents the industry on both of these Committees, considers the work that is now being done one of the most important steps that have been taken to promote the intelligent and the proper use of lumber by the engineer and the architect. He points out that the surest way to hold the technical consumer is to keep him a satisfied consumer, and that one of the best ways to satisfy a consumer is to make it easy for him to use lumber. These new specifications, when adopted by the American Society for Testing Materials and the American Railway Engineering Association, will do more than any other thing that has been done in a decade to make it easy for the specifying consumer to use lumber.

Propose State Mining Bureau Expansion

Within a short time actual work of drafting a new legislative measure to expand the state mining bureau into a state department of mines and mineral resources will be undertaken by the Department of Mines and Mining of the Sacramento Chamber of Commerce, assisted by the other mineral organizations of the State and the State Mining Bureau. The 1925 Legislature passed unanimously Assembly Bill No. 470, providing for such a Department, but it was pocket vetoed by Governor Richardson as "unnecessary". No opposition to the bill developed.

At a meeting of mining representatives last week with the local mining department, it was voted unanimously to proceed with a campaign in behalf of the new bill, to be introduced at the 1927 session. A statewide educational campaign on the dire necessity of a

State Department for California's fundamental industry, which is only ten million dollars behind agriculture in value of production, will be carried on.

Meetings on the subjects throughout the mining districts are being planned by the Sacramento Department. From now, until the 1927 legislature adjourns the Sacramento Department plans a continuous campaign in behalf of the new bill. Suggestions as to additional provisions to add the industry are invited from mine operators.

Special attention to be paid to acquainting the public with the importance of the mineral industry, and the fact that the big fortunes and many of the larger structures of the cities were derived from the mines of California and Nevada. Hydraulic mining ditches formed the nucleus of the big hydro-electric systems.

PROPOSAL TO STANDARDIZE TECHNICAL TERMS

Standardization of a large number of technical terms in the English, Spanish and Portuguese languages will be one of the results of the Pan American Congress of Highways at Buenos Aires next October, the Pan American Confederation for Highway Education announces.

Preliminary work to this end has been begun by members of the United States delegation to the Congress. They are proceeding on the principle that future national and international communications on the subject of highway building and improvement will be greatly expedited if an exact definition is given to the many technical and semi-technical words used.

At present, it was pointed out, many of these words connote different meanings, not only in different countries but often in various parts of the same country. For instance, highway engineers of the United States do not agree on the exact meaning of the word "maintenance." Furthermore, a word in current use in one of the Spanish-speaking countries of Latin America may be little used, or have an entirely different meaning in a neighboring country.

It is proposed, therefore, to compile a glossary of all terms which may be useful to highway engineers. Each word will be precisely defined and its exact equivalent in Spanish, English and Portuguese will be given.

The North American delegation will present to the Congress a tentative glossary. This will be discussed by the representatives at Buenos Aires, amplified and put into permanent form with the cooperation of experts in all the American republics.

TAXING ROADSIDE BILLBOARDS

Regulation of the location of all billboards along state highways by the state highway department and taxing of roadside advertising, the revenue so derived to be applied to highway maintenance, are recommended by C. D. Buck, chief engineer of the Delaware State Highway Department, in his annual report for 1924. He states:

"It must be conceded that the value of the highway sign is derived from the public thoroughfare and not from private property on which it is located and the first obligation should be to the public, which owns the highway."

"The practice in the state of erecting billboards along our improved highways is increasing with startling rapidity. A recent survey of our primary roads alone gave proof that 157 of such signs line these roads. If an annual tax of \$0.10 per square foot was levied on the signs now erected within 200 feet of the state highways, the revenue derived therefrom would be sufficient to maintain 35 miles of roads for 12 months."

L. A. COUNTY IMPROVEMENTS

Los Angeles County improvements in 1925, including additions to roads, buildings, flood controls, hospitals and sanitariums, will cost \$71,376,832, according to announcement made by the budget committee of the Board of Supervisors. Construction has been started on the new sanitary sewer system, which will cost \$17,000,000 complete; flood control projects will cost \$35,300,000; the new Hall of Justice, \$6,000,000; General Hospital, Honda County Farm, County Juvenile Hall and Olive View Sanitarium improvements, more than \$500,000.

Disparity in Wages is Cause Of Unrest Says Metal Publication

Wages paid in some industries today are out of line with the value of the service rendered, as measured by prevailing standards of efficiency in manufacturing establishments, says an editorial in the "American Metal Market."

Under the old order of things, the editorial states, the keen competition there has been for orders, and the low prices that have developed in pig iron and the majority of finished products, would have led to wage reductions before this time. As it is, there have been no wage reductions, excepting the case of a few sheet mills, and there is no indication, at least at present, that there will be.

The wage reduction in the Connellsville region last March does not constitute a real exception to this general observation. That reduction simply took effect an advance made only three months earlier, an advance that had not been warranted. The coke operators thought at the time it was necessary, the coke consumers insisted it was not, and the coke operators soon admitted that their customers had been right.

In recent years business stability has come to be recognized as advantageous to everyone. Wages should be fair, which means that they should be in keeping with the service performed for them and with the cost of living. It is bad enough for market prices to go up and down. Wages should act as a market stabilizer, not a market disturber. Many times during the past the evil effects of wages being squeezed down have been seen, and in 1920 the

very evil effect of adding labor expense to already high rates were seen.

The relative stability of iron and steel industry wages in recent years is the result of two influences, first, greater enlightenment as to the economic disadvantages of large wage fluctuations and the disturbance thereby created in business, and second, the development of large producers, able to carry the doctrine into practice.

A great deal has been said about the growth of large industrial institutions putting men and management farther apart. It has been argued that in some respect this is not a good thing. Here is one respect in which it is a very good thing. If the steel market of today were made by a lot of little mills, with the management in close personal contact with the men, there is every reason to believe there would be many cases of the management telling the men that if they would accept such and such wages the management could get such and such orders, and furnish more employment. Competition between the workmen would lower wages all around without being benefited.

Most wage rates in the United States are all right as they stand and should be left alone. Some rates are all wrong, like the union coal mining scales, both bituminous and anthracite, and some wages, like those in the building trades, are all wrong in relation to the amount of work done. It would be good for business in general if these things were corrected, but as to majority of wage rates it is better that they should stand.

Wall Construction in S. F. is Lowered 25 Per Cent by Ordinance

Considerable impetus will be given to building in San Francisco by an amendment to the building code which was approved last week by the San Francisco Board of Supervisors and has just been made into a law by Mayor Rolph's signature.

This is the first amendment to the building ordinance since 1906 which permits the use of a less expensive material. Now it is estimated that wall construction in San Francisco will cost 25% less than before.

Heretofore all walls have had a backing of one-inch lumber sheathing over the studding. While this assures sturdy walls, it has been a more expensive form of construction than is used in other parts of the state. With the new amendment a patented backing for stucco or plaster walls, known as Bishopric Base, is endorsed for use instead of the sheathing.

It was only after convincing proofs and tests had been placed before the Board of Supervisors that this amendment was authorized, according to Leo Meyer, of Meyer-Muzzall Co., San Francisco distributors for Bishopric Base.

"We showed that similar amendments had been made in the building codes of Chicago, Philadelphia, Boston, New York and other leading cities," explained Mr. Meyer. "A comparative test conducted by several engineering companies proved absolutely that walls built with Bishopric Base were twice as strong as walls built of one-inch lumber sheathing."

"This is because of the unusual construction of the base, which consists of fibre board covered with asphalt

mastic, into which is imbedded beveled white pine lath. This material is nailed directly to the studding, inside and out, and stucco or plaster is applied. The stucco wedges between the beveled lath and forms a dovetail lock—the strongest mechanical key known. This lock makes the wall much more solid because base and stucco are welded into one inseparable unit.

"Falling of plaster from inside walls is entirely eliminated by the use of this base, and there are many Bishopric-built walls which are conspicuous by their entire freedom from cracks."

"This method of wall-building is not new—having been used for 18 years back east. Last year a California factory was erected and it is expected that the demand for the base from San Francisco alone will operate the western plants to capacity."

"Builders of San Francisco will now find their wall-building costs reduced by approximately 25%—for in figuring the cost of material and labor we find that to be the average saving."

A warning was issued from the City Hall that the new amendment does not permit the use of other manufactured backings for stucco or plaster, as tests have been made of all these products submitted and only Bishopric Base has been found to be stronger than sheathing construction. "We are carefully guarding the quality of buildings to be erected in San Francisco," said a member of the Board of Supervisors, "and Bishopric Base was approved only when definite, conclusive proof was given that it would enable San Francisco builders to erect stronger walls at lower cost."

APARTMENTS

Segregated Figures Being Taken.
APARTMENTS Cost, \$200,000
SAN FRANCISCO, Green Street near
Jones Street.
Ten-story class A apartment building.
Owner—Dr. C. R. Brlica.
Architect—C. A. Muesdorffer, 502
Humboldt Bank Bldg., S. F.

Contract Awarded.
APARTMENTS Cost, \$16,000
OAKLAND, 6009 Claremont Ave.
Two-story 18-room apartments.
Owner—Agnes R. Swift, 6073 Clare-
mont Ave., Oakland.
Architect—None.
Contractor—J. W. Swift, 6073 Clare-
mont Ave., Oakland.

Sketches Being Prepared.
APARTMENTS Cost, \$12,000
SAN FRANCISCO, Marina District.
Two-story and basement frame and
stucco apartment house.
Owner—Mrs. Lane.
Architect—Walter Falch, Hearst Bldg.,
San Francisco.

Contract Awarded.
APARTMENTS Cost, \$100,000
SAN FRANCISCO, NE Fillmore and
Hatch Sts.
Four-story reinforced concrete apart-
ment and store building (30 2-rm
apts.).
Owner—W. J. Sandell.
Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.
Contractor—W. S. King, 215 Hearst
Bldg., San Francisco.

Figures to be Taken Shortly.

Kearny 6757

Twenty-five years' experience as
engineer and general contractor.

LOS ANGELES, Cal.—Lee Callahan
& Sons, 518 S Carondelet St., will build
4-story and part basement 146-rm., 70-
ft.-high, class C apt. bldg., 90x112 ft., at
716 S Berendo St. for California Land
& Bldg. Co., 720 Story Bldg.; tan stip-
pled face brick, cast stone trim, ornam.
iron, fire escapes, met. sash, struc.
steel, comp. rfg., tile copls, pine trim
and flrs., tiled baths and sinks, built-
in beds, aut. elec. elevator, 2 Hoffman
water htrs., steam htg., incinerator;
\$200,000.

BONDS

LAKEPORT, Lake Co., Cal.—Election
will be held July 31 in Middletown
School District to vote bonds of \$10,-
000 to finance school improvements.
Trustees of district are: W. H. Sweil-
kert, Roy L. Rife, tile copls, pine trim
and flrs., tiled baths and sinks, built-
in beds, aut. elec. elevator, 2 Hoffman
water htrs., steam htg., incinerator;
Robert Tocher and Ned Burgher.

BAKERSFIELD, Kern Co., Cal.—
Union Avenue Grammar School Dis-
trict votes bonds of \$12,000 to finance
erection of 2-classroom school. Will
be of brick and concrete construction.
Rowen Hall, clerk of district.

MARICOPA, Kern Co., Cal.—Super-
visors sell \$60,000 bond issue of Mari-
copa School District; proceeds of sale
to finance school improvements.

ATWATER, Merced Co., Cal.—Mit-
chell School District votes bonds of
\$4500 to finance and equip manual
training and cafeteria building.

MERCED, Merced Co., Cal.—Election
will be held July 30 in San Joaquin
Elementary School District to vote
tax of \$1600 to finance school im-
provements. Trustees of district are:
Carlie Clark, Cora E. Shurtz, Henry
F. Boss and Hilda I. Larson.

LODI, San Joaquin Co., Cal.—\$20,000
bond issue of Thornton School District
sold; proceeds of sale will finance
school improvements.

MONTEREY, Monterey Co., Cal.—
Monterey Grammar School District
votes bonds of \$35,000 to finance
erection of new school in Oak Creek
District.

SAN JUAN, San Benito Co., Cal.—
Second election will be called in San
Juan School District to vote bonds of
\$55,000 to finance erection of new
school; previous election failed by 6
votes.

TRANQUILLITY, Fresno Co., Cal.—
Election will be held July 20 in Tran-
quillity Grammar School District to
vote bonds of \$12,000 to finance 2-
classroom addition to present school.

SANTA CRUZ, Santa Cruz Co., Cal.—
Until Aug. 7 bids will be received by
supervisors for purchase of \$30,000
bond issue of Watsonville School Dis-
trict; proceeds of sale to finance
school improvements.

CHURCHES

Plans Being Figured.
CHURCH Cost, \$40,000
BERKELEY, Alameda Co., Cal. Spruce
St., bet. Cedar and Vine Sts.
Concrete block church with tile roof.
Owner—Second Church of Christ.
Architect—H. H. Gutterston, 626 Powell
St., San Francisco.
Heating has been awarded to Mr.
Watts of Oakland.
Separate bids will be taken for glass

ALHAMBRA, Los Angeles Co.—Arch. Ross Montgomery is preparing prelim. plans for a church and sch. bldg., on Alhambra Rd. betw. El Molino Ave. and Vega St., Alhambra, for the Roman Catholic Bishop of Los Angeles and San Diego the church of St. Therese; 8 classrooms and auditorium to be used as parish hall; church will seat 850; stucco ext., tile fls., tower probably reinf. concr.; monastery and convent to be erected later; \$150,000.

SANTA BARBARA, Cal.—Arch. Thos. Franklin Power, 2615 W 7th St., Los Angeles, has been commissioned to prepare plans for class A church at cor. Micheltorena and Anacapa Sts., Santa Barbara, for the Roman Catholic Bishop of Monterey and Fresno, church of the Ladies of Sorrows, Father Walter F. Thornton, pastor; it will have 2 chapels, auditorium to seat about 1000 people, assembly hall, special rms. and kitchen, reinf. conc. constr., steam htg. sys., cem., pine and hwd. flrs., granite walls, etc.; \$250,000.

LOS ANGELES, Cal.—Pozzo Constr. Co., 421 Macy St., was low bidder at \$115,000 on the genl. contr. for a new church bldg. for 13th Church of Christ Scientist, on Edgemont Blvd. north of Hollywood Blvd.; Allison & Allison, 1405 Hibernian Bldg., archts. Low bidders on other contracts were: Brooks Art Stone Co. on east stone at \$12,148; Atlas Corncove Works on sheet metal work at \$15,000; C. L. Lussmore on the rfg. at \$4659; Hammond Lumber Co. on comp. rfg. at \$270; Western Linoleum Co. on linoleum at \$199; Long Beach Marble & Tile Co. on the tile work at \$4,269; H. H. Mann on painting at \$1466; Woodill-Patterson Co. on wiring at \$2510; Theo. Larson Co. on plumbing at \$3875; and Hoagland-Lakin Electrical & Engineering Co. on heating and ventilating at \$21,200. Ely Bros. Stone Co. submitted the only bid at \$1600 for Tufa stone columns; J. Dillenburgh only bidder at \$1150 for ext. tiling; and Bennett-Montgomery Hardware Co. only bidder at \$2250 on finish hardware. Bids taken under advertisement. Bldg. will be reinf. conc. constr., auditorium with balcony to seat 1200, steel roof trusses; \$200,000.

LOS ANGELES, Calif.—Anton Johnson Co., 1007 S. Grand Ave., has genl. contr. for all work comp. at about \$150,000 for reinf. conc. church at St. James Pl. and Wilshire Blvd., for St. James Episcopal Church, Rev. Ray Miller, pastor; reinf. conc. walls, fir. stone trim, cem. and art. stone flrs., steam htg. and vent. sys.

SANTA BARBARA, Cal.—Methodist Laymen's Assn. of Southern California, J. W. Patterson, pres., has authorized Bishop Chas. Wesley Burns to call a meeting of dist. supts. to arrange for raising by gifts from various Methodist churches, \$150,000 with which to rebuild Santa Barbara Methodist church.

Irving Iron Works Co.
Irving Subway Flooring.

T. J. Callahan Co.
Direct Action Sash
Control.

St. Louis Fire Door Co.
Freight Elevator and
Warehouse Doors.

Rezilite Seamless Floors
Water, Acid and
Chemical Proof.

Rialto Building, San Francisco
Sutter 2768

CHICO, Butte Co., Cal.—Larson Roofing & Supply Co., Chico, at \$3827 awarded contract to place asbestos roof on Presbyterian church.

KNIGHTS LANDING, Yolo Co., Cal. Collier interests have donated \$5,000 to finance erection of new Catholic church building on site of old dance pavilion.

FACTORIES & WAREHOUSES

Contract Awarded.
FACTORY BLDG. Cost, \$12,000
SAN FRANCISCO, 16th & Shotwell.
One-story reinforced concrete & brick factory building.
Owner—American La France Fire Engine Co.
Architect—Arthur Bugbee, 14 Montgomery St., San Francisco.
Contractor—John Spargo, 460 Montgomery St., San Francisco.

Sub-Contracts Awarded.
WAREHOUSE Cost, \$40,000
OAKLAND, Alameda Co., Cal. First and Market Sts.
One-story brick warehouse building.
Owner—Howard Co., Premises.
Architect—None.
Contractor—Lawton & Vezey, 354 Hobart St., Oakland.
Sheet Metal—Fluren & Arenson, 2919 Union St., Oakland.
Steel Rolling Doors—James G. Wilson Corp., Los Angeles.
Rock & Sand—Oakland Bldg. Material Co., Oakland.
Brick Work—Roy Carter, Oakland.
Excavating—Arris-Knapp Co., 354 Hobart St., Oakland.
Wiring—Advance Elec. Co., 419 19th St., Oakland.
Roofing—A. K. Goodmundson, 21st St. and San Pablo Ave., Oakland.
Plumbing—Fearey & Moll, 1075 40th St., Oakland.
Structural Steel—California Steel Co., Hobart Bldg., San Francisco.
Painting—R. Zelinsky, 130 Jessie St., San Francisco.
Steel Sash—Detroit Steel Products, 251 Kearny St., San Francisco.

Bids Under Advertisement.
BOILER PLANT ETC. Cost, \$60,000
SAN FRANCISCO, Humboldt & Maryland Streets.
Steel frame and corrugated iron boiler plant and a generator building.
Owner—Pacific Gas & Electric Co., 245 Market St., San Francisco.
Architect—Engineering Dept. of Owner.

SANTA BARBARA, Cal.—Southern Pacific Ry. will start work at once on reconstr. of engine house on present site according to J. H. Dyer, general manager.

SAN BERNARDINO, Cal.—Santa Fe Ry. will let contract shortly for 3-story reinforced concrete addition to present storehouse; \$165,000.

SAN FRANCISCO—The Standard Sanitary Manufacturing Co., 1900 Bryant St., San Francisco, announces its intention of building a large plant to cost approximately \$1,000,000 on the Pacific Coast. Sketches for the new building have been submitted to the Board of Directors for their approval when a location will also be selected.

TURLOCK, Stanislaus Co., Cal.—J. H. Smith, Turlock, at \$2749 awarded contract by Southern Pacific R. R. to erect cantaloupe packing shed, 180 by 24 ft. in north section of city.

LOS ANGELES, Cal.—Archts. Noenberg & Johnson, 401 L. A. Ry. Bldg., have comp. plans for 4-sto. reinf. conc. warehouse at s.w. cor. 17th and Los Angeles Sts., for Waterhouse-Lester Co.; 100x120 ft., plas. ext., art. stone trim, granite base, steel sash, cem. flrs., sprinkler sys., elec. freight elevators, pine trim, ornam. iron wks.; \$200,000. Bids will be taken about next week from selected list of bidders by owner.

SAN BERNARDINO, Cal.—Robt. E. McKee, 1918 Texas St., El Paso, Tex., has started work on 3-story reinf. concr. addition to storehouse building here for Santa Fe Ry.; \$165,000.

FRESNO, Fresno Co., Cal.—Following bids received by State Highway Commission to erect maintenance shop building and truck shed in Fresno. Will be one-story steel and wood frame with tile walls and concrete floor and foundation with office and stockroom. Truck shed will have concrete floor and foundation and wood frame covered with corrugated iron. Plumbing and electrical work is included.
J. P. Williams, Fresno.....\$23,292.00

 man Tyler, 747 S Grand Ave., Pasa-
 dena.

SHERIFF'S OFFICE—COUNTY OF LASSEN
 Geo. W. Carter, Sheriff, Leonard F. Dozier, Office Deputy, A. Norwood, Deputy

Susanville, Calif., July 6th, 1925.

Mr. Sandy Pratt, President,
 Pratt Building Material Co.,
 San Francisco:

Dear Sandy:—As per your postal card received by this office several days
 ago, kindly send me

3 windshield stickers

of your "California highway scene." One of these is for my car and one
 each for the cars of my deputies. Thanking you in advance, I am,

Very truly yours,

GEO. W. CARTER, Sheriff,
 By Leonard F. Dozier, Deputy Sheriff.

WELL, SHERIFF Geo. Lassen Carter.

SANDY WAS glad.

TO SEND you windshield stickers.

FOR YOUR cars.

THEY READ as follows.

"SPEED LIMIT.

99 MILES per hour.

FORDS DO your best."

(ALSO SHERIFF Rock's picture).

IT IS an honor.

TO OUR Sheriff.

"A. ROCK" of Sand County.

TO HAVE another sheriff.

PUT SHERIFF Rock's photo.

ON HIS windshield.

ANY WAY, Sheriff Carter.

SANDY PRATT, producer.

OF CLEAN, sharp sand.

AND HARD, crushed rock.

AT PRATTROCK (near Folsom).

PRATTCO (MONTEREY County).

MARYSVILLE AND Sacramento.

HAS TWO fine fellows.

ASSOCIATED WITH him.

PERFECT IN every way.

EXCEPT JACK Crushed Rock Long.

OUR SACRAMENTO Valley salesman.

CAN'T CATCH fish.

ALTHOUGH HE promises.

TO SUPPLY our entire crowd

WITH TROUT, etc.

WE NEVER see any fish.

WE HAVE to eat meat.

EVEN ON Fridays.

THEN H. C. Cate.

FORMERLY OF our Marysville sand

NOW AT our sand plant.

ON THE American River.

AT TWELFTH Street, Sacramento.

PROMISED THE central office.

AT SAN Francisco.

AND ALL branch offices.

ALL THE wild game.

SUCH AS duck, deer, etc.

THAT WE could eat.

CATE SENT one tame duck.

ABOUT FIVE years ago.

NOW WE are all vegetarians.

BECAUSE CATE told us.

NOT TO buy meat.

AS HE would supply us.

NOW GEORGE.

IF YOU will.

UP IN Lassen County.

TEACH LONG to fish.

AND CATE to hunt.

SANDY PRATT will say.

"I THANK you."

The best place for Jack Washed
 (Pratt Long, salesman for the
 Pratt Building Material Company
 (producers of crushed rock, sand and
 gravel) for the Sacramento Valley, to
 fish is in a bowl with tame gold fish.
 It was "within the law" Washed
 Sand Cate should buy his wild game.

BEVERLY HILLS, Los Angeles Co.—Wallace Boery has purchased a site at n. e. cor. Sunset Blvd. and Doheny Rd. Beverly Hills and plans the erection of a Spanish type dwlg., swimming pool and tennis courts; \$50,000.

Figures are being received for floor tile and glazing.
HAYWARD, Alameda Co., Cal.—Fred Starr, Willard Battery Agency, is taking bids to erect a two-story store and apartment building on portion of old Hayward Hotel property. Est. cost, \$20,000.

Do You Know Whitco?

Hundreds of architects, thousands of builders, and tens of thousands of home owners know it to be the best, if not the only practical means of swinging and controlling casement sash and transoms.

Whitco makes it easy and safe to clean the outside of a casement from within the room.

But what does the hardware dealer know about it? Here's the answer:

Twelve re-orders in eight months—ranging from 5 to 300 sets at a time, for a total of 1481 sets—is the story of

Whitco Casement and Transom Hardware

as one Boston dealer knows it.

Up in Manchester, N. H., a much smaller city, WHITCO seems to be doing equally well. A dealer there re-ordered four times in five months for a total of 512 sets.

Down in Philadelphia, one of the several dealers now selling WHITCO, re-ordered 16 times in ten months for a total of 6983 sets, his requirements, ranging from 50 to 1,000 sets at a time.

Out in Ohio the story is the same. In Cincinnati a dealer bought two sets of WHITCO, one in solid brass and one in rust-proofed steel, for samples. This was on August 20th. On August 25th, he placed an order for 50 sets, and since that time his re-orders totalled 1,600 sets more.

Again in Toledo, a dealer whose initial order was for 100 sets, sent in enough re-orders in six months to run his total up to 850.

And so on—in Middletown, Conn., New Rochelle, N. Y., Passaic, N. J., Easton, Pa., Norfolk, Va., Newport, Ky., etc., etc., dealers not only bought from 150 to 2,250 sets of WHITCO, but the fact that they re-ordered from five to eight times, shows that they have been turning their investment in it over with more than ordinary rapidity and regularity.

Compare This With The Average Turnover In Other Lines Of Hardware

Figures compiled from authentic sources show the average to be 2.4 times per year.

Official Proposals

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned at 2:30 P. M. on July 20, 1925, for constructing a portion of the state highway system in Washoe County, between Sparks and Vista, length 2.54 miles, work consisting of grading, construction of culverts, excavation of drainage ditches and removal of obstructions in Truckee River. Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerk's office, Reno; the division offices at Elko, Reno and Las Vegas; and the district office of the Bureau of Public Roads, Bay Building, San Francisco. For copy of each set of plans, undersigned requires a deposit of Fifteen Dollars (\$15.00), which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as may be required in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on August 10, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Los Angeles County, between Philadelphia St. and Michigan Ave., Whittier (VII-L.A.-2-D), about one and nine-tenths (1.9) miles in length, to be paved with Portland cement concrete.

Los Angeles County, between Latigo Creek and Las Flores Canyon (VII-L.A.-60-A), about six and seven-tenths (6.7) miles in length; six and three-tenths (6.3) miles to be paved with Portland cement concrete, and four-tenths (0.4) miles to be paved with asphalt macadam.

San Bernardino County, between Big Bear Dam and Paineskin (VII-S.B.-43-D) about three and three-tenths (3.3) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. R. MIXON, Secretary.

Dated: July 13, 1925.

(July 17-24-31 Aug.7)

NOTICE TO CONTRACTORS

(Siskiyou County General Hospital)

Notice is hereby given that sealed bids will be received by the Board of Supervisors of Siskiyou County, California, at the office of the County Clerk of said County at Yreka, California, until ten o'clock A. M., August 4, 1925, for the erection of a county General Hospital Building to be built in Yreka, California, according to plans and specifications prepared by George C. Seldon & Company, the authorized architects.

Bids will be received for the various branches of the work as follows: For the concrete work; for the mason work; for the concrete and mason work combined; for the carpenter work; for the concrete, mason and carpenter work combined; for the plastering; for the painting; for the roofing; for the tile and marble work; for the sheet metal work; for the plumbing; for the plumbing and sheet metal work combined; for the heating; for the plumbing and heating combined; for the electrical work; and for the plumbing, heating, sheet metal,

and electrical work combined.

All bids will be received with alternate propositions.

Plans and specifications can be seen during office hours at the office of the County Clerk of said County at Yreka, California, and may be seen at or obtained from the office of the Architects, 1415 California State Life Building, Sacramento, California.

A cash deposit of \$25.00 will be required from all prospective bidders on all copies of plans and specifications loaned out, as a guarantee of the return of the same.

All bids shall be presented on blank forms which may be procured from the office of the Architects.

Each bid must be accompanied by a certified check on some responsible California Bank for a sum not less than ten percentum (10%) of the amount of the bid, made payable to W. J. Nellon, Clerk, of the Board of Supervisors, as a guarantee of good faith that the party to whom the contract may be awarded will, within ten days after the award is made, enter into the necessary agreement and furnish the necessary bonds for the faithful performance of said work, and in case the bidder to whom the contract is awarded fails or refuses to enter into said agreement, or to furnish said bonds, said check will be forfeited to the said Siskiyou County, in the manner provided by law. The Board of supervisors will not accept a Bidder's bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to W. J. Nellon, clerk of the Board of Supervisors, Yreka, California, and endorsed "Proposal for Building Hospital."

The Board of Supervisors expressly reserves the right to reject any or all bids and to waive any informality in any bid received.

By Order of the Board of Supervisors of Siskiyou County, California.
Dated July 7, 1925.

(Seal) Attest: W. R. LEE, Chairman,
W. J. NEILON, Clerk.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

STRICT BUILDING CODE IS McLERAN'S PLEA

While the building laws of San Francisco are considered ample to cover all present requirements of safety, the lessons of Santa Barbara earthquake, when virtually the only destruction to modern buildings was due to poor design, poor cement, and improper preparation of the cement, have aroused a demand from builders, owners and architects of San Francisco for a more stringent building code.

In response to the demand Supervisor Ralph McLeran, a general contractor, will introduce to the Board of Supervisors a resolution calling for a special conference to consider the building code of San Francisco and to make a study of the data being collected at Santa Barbara by various experts.

McLeran, in speaking of the matter, said:

"All the information I get from Santa Barbara, where they had many buildings collapse because of faulty construction and design, confirms my belief that those buildings would never have passed the inspection laws of this city. But no matter how excellent our present building rules are, there is room for improvement, and we want to find out from engineers, architects and others what that improvement should be. I favor the strictest building code possible."

In line with his studies of the cement question Supervisor McLeran will also ask for an amendment to the building code of San Francisco, making it illegal to use any cement in any structure in the city that is not manufactured in the United States. Many protests have been made recently that imported Portland cement, especially that from Europe, is not of the same high quality as that made in this country.

A CLYDE

fits the Job

The various illustrations shown herewith indicate different operations where the Clyde two-drum contractor's gasoline hoist is making good. In building operations, log loading, pile driving and many other occupations, it is more than meeting the expectations of the owners.

Satisfied users in all parts of the country voluntarily endorse the adaptability and the low operating cost of this Clyde unit. It is built of carefully selected materials and carries a rigid guarantee against original defects. The unit is LeRoI powered.

Any Clyde hoist, steam, electric or gasoline will more than meet its rated capacity. And it is so constructed that it will live up to and maintain the high standard of perfection the is represented by the Clyde trade mark. A bulletin describing any Clyde unit will be sent upon request or a Clyde salesman will call.

You'll Take Pride in Your Clyde!

DANDIE

Light Mixer

Dandie Light Mixer

7 cu. ft. mixed Concrete. Two or four cylinder gasoline engine. Power charging skip, or low charging hopper and platform. Rubber tired steel disc wheels or steel rimmed wheels.

Send back the coupon

VALUE
—Such as Never Before
Seen in the Light Mixer Field!

STILL within the price range for light mixers, this 7 ft. Dandie Model offers extraordinary values!

A heavy duty, four cylinder, radiator cooled gasoline engine, completely enclosed in a steel housing.

Completely enclosed transmission always running in an oil bath, and mounted on shaft revolving in roller bearings. Steel disc wheels with rubber tires or regular steel rimmed wheels. Beveled edge, chilled drum rollers, pinned to shaft which turns in big bearings! Koehring double gear drum drive!

In every bearing—every detail—you'll find the reliable Koehring construction the surest insurance of reliability and long, trouble-free service life!

Light Weight—just the balanced light weight to be hauled on its rubber tires behind your car or truck and to lose no time between job and job.

This Dandie Model has been tested and tried by **overwork** and abuse—and it's more than worthy of the Koehring name.

For high speed operation—solid, substantial construction and light weight portability—this Dandie has established new values and standards in the light mixer class.

AERATED CONCRETE CLAIMED TO MEET BUILDERS' APPROVAL

Housing experts and scientists, who have been watching the building of an aerated concrete house in Wembley, England, have been much interested in the method, which is entirely new to this country. The process has been developed in Sweden, where the material was used last year in the hydraulic power station of the royal waterfalls commission, a new building for the royal telegraph commission, two breweries and various apartment houses. The peculiar quality of this concrete is that it expands and then sets hard. It is claimed that it is fireproof, resists all sound and strengthens with age.

A chemical process takes place, when cement and coal slag are mixed with certain substances of a mineral character, and the hydrogen creates little bubbles in the mixture of cement, which swells up like yeast, until in texture it resembles cork. Then it gradually hardens. It is possible to produce in this way a concrete so light that a cubic foot weighs only 20 pounds, it is asserted. It floats on water like wood and can be made practically impervious reports say.

STANDARD SANITARY COMPANY PLANS \$1,000,000 S. F. PLANT

A new Pacific Coast factory involving an expenditure of more than \$1,000,000 and an annual payroll of \$350,000 will be erected immediately in the vicinity of San Francisco Bay if plans now considered by the Standard Manufacturing Co. of Pittsburgh, Pa., are carried through.

Definite announcement of the decision to erect the factory on the Coast was received from the executive committee of the Eastern concern by F. T. Letchfield, director of the industrial department of the San Francisco Chamber of Commerce, and comes as the result of an intensive survey of conditions prepared for the manufacturers by the local chamber.

The Standard Sanitary Manufacturing Co. is one of the largest manufacturers of plumbing supplies, brass goods and porcelain enamel in the world, and operates factories in a number of Eastern cities, among them Tiffin, Ohio; Kokomo, Ind.; Pittsburgh, Pa.; Louisville, Ky., and Baltimore, Md. The Baltimore plant represents an investment of \$5,000,000, and was only recently completed.

The Pacific Coast business of the company has been handled in the past through its warehouses in Los Angeles, Portland, Seattle and San Francisco. With the exception of the San Francisco warehouse, which was recently completed, the western buildings are rented by the company.

At the time of the disaster of 1906, there being then no local manufacturers of porcelain and plumbing supplies on the Coast, Theodore Ahrens, president of the Standard Sanitary Co., consigned a carload of supplies to San Francisco and rushed a representative here from the East to receive it. That was the beginning of the company's business on the Coast. In 1910 a branch office was opened in the Merchants National Bank building and the business was developed steadily until the present demand for a branch factory to care for the Pacific Coast and Oriental trade became imperative.

Miss Alice M. Jackson is local manager of the company and came to San Francisco in 1916 as assistant manager.

Territory to be covered by the local factory will be determined entirely by freight rates, and will include many western states in addition to northern and foreign countries.

OYSTER SHELL RIPRAP

In the Eighth District, Gulf of Mexico, at Timberline Light Station, La., a novel riprap protection was provided by the use of oyster shells, quantities of which were obtainable in the vicinity, whereas rock would need to have been shipped from a great distance. This oyster-shell riprap, according to the May-June Military Engineer, proved effective in arresting scum which threatened to undermine the structure, founded on piles on a sand bottom submarine site.

MODERN FIREPROOF BUILDING WILL WITHSTAND EARTHQUAKE

Earth tremors have little or no destructive effect on the modern fireproof building of reinforced concrete or steel frame and reinforced concrete construction. Such buildings designed so as to form a unified mass and constructed of good materials will successfully meet such a test as that which recently was visited upon Santa Barbara. This is one of the outstanding lessons learned by builders from Santa Barbara's experience and forms the theme of a report now being written by C. A. Rodegerdts, chief of the Pacific Coast engineering department of S. W. Straus & Co., for the executives of that organization.

Buildings of uniform construction that are designed to meet lateral stress or wind pressure, with walls and floors and foundations firmly united, as in the reinforced concrete type of construction, have little to fear from such an experience, is this engineer's conclusion. Structures not in lateral strength or not of firmly united mass, he points out, will fall with such a shock and will go to pieces in greater or less degree according to the intensity and duration of the disturbance.

"A study of the recent status of buildings within the affected area gives convincing proof of this conclusion," the engineer says, "and will doubtless prove more profitable in the guidance of builders and in the formulation of a better building code. A vast majority of the damage done would have been avoided if the buildings had been of the types named."

He illustrates the report with numerous references to buildings which successfully resisted the disturbance, buildings which were injured because of lack of adequate design or material and buildings of proper design but which were injured because of poor material or workmanship.

"Most convincing evidence is shown," he says, "that such a test of stability can have no serious results if the building design calls for a united structure of substantial solidity, if good materials are employed, if conscientious attention is paid to good workmanship and intelligent supervision controls the work."

PRaise FOR "PATH OF GOLD"

What experts think of the lighting of Market street, San Francisco's main thoroughfare, may be judged by the following paragraph from a recent issue of the Journal of the American Institute of Electrical Engineers:

"Ornamental lighting standards on every paved street' is the verdict of Schenectady, N. Y., which has made Erie boulevard, one of its main thoroughfares, the best lighted street in the Eastern part of the country. With the 'Path of Gold' of San Francisco and the business section of Salt Lake City, it ranks among the three best lighted streets in the world."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The proposed ordinance requiring buildings in San Francisco to be constructed of Portland cement manufactured in the United States was referred back to the Building Committee by the Board of Supervisors at the request of Supervisor Wetmore. The ordinance was up for final passage and was expected to be carried because of the almost unanimous support it had gained. Supervisor McLeran, who introduced the measure, explained that inferior European cement was invading the city and that poorly constructed and unsafe buildings would result. He called upon all builders to utilize only domestic cement. Wetmore made no explanation of his reason for wishing the ordinance taken back for discussion by the committee.

Representing Reno, Nevada, trade unions, contractors, architects, school authorities and other interests, a committee has recommended formation of a commission for proper training of apprentices. It is proposed that apprentices be required to attend a trade school four hours weekly for thirty-six weeks during a year, with the commission reserving the right to pass on the ability of any apprentice and admit him to a special trade. The commission is to mediate all disputes and act as a service organization for employers and employees. Recommendations will be immediately submitted to the various interested organizations for action.

Common labor the country over is better off than at any other time in the history of the world says Roger W. Babson. According to Mr. Babson, there is practically no unemployment today among common labor, while the demand in most sections of the country exceeds the supply. This condition is due to many reasons states Mr. Babson, but probably it is primarily due to the restrictions that have been imposed on immigration since the war.

Albach & Mayer, San Francisco plumbers, are carrying advertisements in San Francisco telling of their "easy payment plan" for plumbing installation. The advertisements urge the installation of additional plumbing fixtures and modernizing of present installations, payments to be made according to one's income.

There are now 137 operating Portland cement plants in this country, these being located in twenty-nine states. More are being built. In 1924, the plants operating turned out 28,000,000 tons of cement, requiring 45,000,000 tons of raw materials.

Unfilled orders of the U. S. Steel corporation on June 30, just made public, totaled 3,710,458 tons, a decrease of 359,342 tons compared with the end of the preceding month.

Building construction undertaken in Bakersfield for the month of June totaled \$191,439 as compared with \$192,612 for the preceding month when 234 183 permits were issued.

The San Joaquin Light & Power Corporation has applied to the State Department of Public Works, Division of Water Rights, for authority to appropriate waters for a \$10,000,000 hydro-electric project in Fresno County. The corporation seeks to take water from 10 different sources in Fresno County, including the north fork of Kings river and its tributaries. Storage capacity of 20,000 acre feet at the upper Glacial lakes and 102,500 acre feet at Helms Reservoir is planned. The work is to start on or before January 1, 1938, and to be completed on or before September 1, 1943. The total fall to be utilized is 1620 feet, and 60,750 theoretical horsepower will be developed.

Citizens of Lone, Amador county, propose to organize company to finance construction of a plant for the manufacture of clay products. About fifty interested in the proposal will form a stock company. Henry A. Leheldt, former manager of the Oakland Art Pottery of Oakland, is promoting the project and says that Lone is the best location for such a plant as the site will be practically donated and the clay beds of the vicinity are immense. There are ten clay pits being worked near Lone and the raw material is shipped away to be manufactured.

Secretary Hoover recently said: "If our engineers would be a little more vocal, if they would act more in the collective sense, and if instead of confining our activities to a partly developed engineering council for the nation, we should develop engineering councils for each municipality and for each state which would stand on guard on all public questions—I say all questions, for there are practically none today that has not engineering implications—we could transform the thought of this nation within another twenty years."

Samples of asbestos from a deposit recently located by A. E. Caldwell on the Andy Poor ranch near Rawhide, Tuolumne county, are on exhibition at the Tuolumne county exhibit building at Sonora. Though the find has not yet been developed to sufficient extent to determine its merit, it has already attracted the attention of outside investors.

Fred M. Randlett, chief engineer of the Portland, Ore. Water Department, resigned July 1 to become Pacific Coast manager for the Robert W. Hunt Co., testing engineers, with headquarters in Portland. Mr. Randlett has been with the Portland Water Bureau since 1906, and has been chief engineer since 1917.

Chas. Sloan, consulting engineer of San Francisco, has submitted report to the city trustees of Gilroy, Santa Clara County, covering the construction of a sewage disposal plant. The plant would cost approximately \$135,000 and will cost about \$150 a month to operate.

ALONG THE LINE

Harvey E. Luce, assistant engineer for the Truckee (Nevada) River Power Company for the past three years, has resigned to accept a position with the main office of the Stone & Webster Corporation at Boston. He will act in the capacity of assistant division manager in his new position. Luce is a graduate of the University of Nevada. His successor has not yet been named.

Henry F. Wegnorl will complete 33 years' service as building inspector of San Bernardino July 31, 1925, and he has tendered his resignation to take effect on that date, declaring his intention to retire to private life. Wegnorl's service was broken for only a brief period in 1905 when O. M. Stevenson was inspector.

Chris P. Jensen, county surveyor of Fresno county, has been granted permission by the supervisors to leave the state between July 20 and August. He will make an automobile trip to Oregon to inspect highway construction, particularly the Columbia river highway.

The proposed sanitary sewer for lower Piedmont, the Grand Avenue and Lakeshore districts will probably be financed jointly by the cities of Oakland and Piedmont. The cost is estimated at \$140,000, of which Oakland will pay \$80,000 and Piedmont \$60,000.

E. H. Cameron, general contractor of Willows, was drowned in an irrigation ditch near Willows, July 15. He is believed to have fallen into a ditch when overcome by heat. He was 49 years of age and is survived by a widow and one son.

Zeth Lane, reputed wealthy lumberman of Coleville, Wash., died at his summer home in the Valley of the Moon, near Sonoma, July 17. Death was due to heart failure. Lane was 66 years old. A widow, son and daughter survive.

Clyde F. Smith has resigned as sanitary engineer of the city of Long Beach, Cal., and on July 1 became resident engineer of Los Angeles sanitation district No. 1 with headquarters at Watts.

The Marin County supervisors have set September 26 as the date to decide the question of issuing and selling bonds of \$1,250,000 to finance construction of a county good roads system.

Charles Spear, resigned as president of the California State Board of Harbor Commissioners, has been installed general manager of the Los Angeles Harbor Commission, with a salary of \$1000 a month.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

RICHMOND BUILDERS' EXCHANGE APPOINTS COMMITTEES

E. H. Higgins, newly elected president of the Richmond Builders' Exchange, has appointed the following committees to serve for the fiscal year 1925-26:

Auditing committee, A. P. Hill, F. A. Mero and Wallace Snelgrove.

Financial committee, J. I. Collins, Wallace Snelgrove and Roy Eakle.

Executive committee, entire board of directors.

Grievance committee, entire board of directors.

Arbitration committee, Roy Eakle, James Walker and A. P. Hill.

Membership committee, P. M. Sanford, B. J. Balentyne and H. J. Capion.

Constitution and by-laws committee, J. R. Cravath, F. A. Mero and R. H. Splersch.

Investigation committee, C. H. Brown, E. A. Marshall and R. W. Timmons.

House committee, A. H. Winchcole, Roy Eakle and Fred Spierson.

Street committee, E. B. Bull, H. D. Baker, and A. C. Burdick.

Subscription and donations committee, P. M. Sanford, W. D. Rihn and E. M. Tilden.

Industries committee, N. P. Bush, Robert Dornan and C. J. Lambrecht.

Insurance and bonds committee, M. A. Hays, E. J. Burg and J. H. Fitzpatrick.

Property assessment and taxation committee, P. M. Sanford, James Walker and M. A. Hayes.

SANTA BARBARA CONTRACTORS PERFECT ORGANIZATION

In historic De la Guerra Plaza last week, about 100 of the men who will have much to do with the actual reconstruction of Santa Barbara, gathered together and organized the Contractors' Association of Santa Barbara, binding themselves as one in adhering to the regulations of the new city building code and offering their cooperation with the architectural board of review and city officials in the plan to rebuild with attractive architectural treatment specially suited to the traditions and setting of the city.

Daniel R. Wagner was elected chairman of the organization. Other contractors on the board are: H. L. Sweeney, plumbing; Burt Fultz, painting; Harry Graham, general contractor; Charles Erickson, plasterer; Thos. Seacrest, brick contractor, and Sherman Smith, electrical contractor.

With the organization of the contractors for the purpose of building a more attractive city, and one which will be structurally strong, all crafts and profession, which will have a big part to play in the reconstruction of the city, are ready to go to the task.

GRAPER TO TOUR EUROPE

Harry Graper, master painter and decorator and a member of the San

Contractor Seeks Correction of Evils in State Lien Law

By E. M. Scofield, of Scofield Engineering and Construction Co., Los Angeles

The California lien law, originally intended primarily for the protection of the laborer, has by repeated amendment come to protect the material man more effectively than it does the laborer. The man who is shy a week's wages can get very little comfort out of his right to lien when the cost in time and legal expense is more than the week's wages, and no more comfort out of his right to lien when he finds that the material man has already pre-empted all the equity.

In the course of time two undoubted evils have grown up around the lien law; first, that it does not afford the laborer a certain and inexpensive method of securing his wages, and second, that it frequently operates to make the unwary owner pay twice for his home or lose it altogether because the irresponsible contractor has walked off without paying the bills.

Both of these matters are evils which ought to be corrected and two principal methods of correcting them have been suggested: first, to license contractor and require all licensed contractors to put up with the State a small bond, say about five thousand dollars, to make good any wages or unpaid bills which he may leave behind him; second, to make the "material and labor bond," which is now optional with the owner, compulsory so that material and labor is bound to be paid for.

In favor of licensing is the fact that it has been applied to real estate agents, lawyers, and doctors, and in some places to engineers, and that only a small bond is required so that the expense is slight, although this expense falls upon the contractor.

Opposed to licensing is the fact that where engineers have been licensed, the system has operated to strengthen the irresponsible and untrained engineer rather than to safeguard the Public against his services. The inexperienced and untrained engineer who, after a more or less perfunctory examination, displays on his stationery and window the fact that he is licensed by the State, is more apt to mislead the unwary client than if he were not licensed. The safe difficulty is likely to arise in connection with licensing contractors. Instead of eliminating the irresponsible, it is apt to strengthen his position. A five thousand dollar bond would be a sufficient safeguard in many cases, but it would be utterly inadequate in many others. If the bond were made adequate to cover the situation at all times, it would become a

serious burden to the young contractor.

Opposed to the compulsory bond is the fact that it involves considerable expense, although not more in proportion than the community has paid for the elimination of unrequited accidents by compensation laws. Out of a total of 230 millions permits in Los Angeles County in 1924, the liens filed were 13,491 in number and approximately 9 million in amount, but there is no information available as to the actual losses sustained because of these. Many of these were undoubtedly friendly liens which did not result in actual loss. The present cost of material and labor bond is $\frac{1}{2}$ of one per cent, but inasmuch as only about thirty per cent of construction is bonded, the compulsory bond would undoubtedly bring down the rate to $\frac{1}{2}$ of 1 per cent, and probably lower still. At $\frac{1}{2}$ of 1 per cent however it involves an annual expense in Los Angeles County, based upon 1924 permits, of approximately \$870,000. The bulk of the large work is bonded anyway. The cost is largely made up of \$30 to \$75 items for the small owner, who, in his effort to get his home as cheap as he can, is apt to leave himself open to the loss of his home altogether. Sound public policy would justify safeguarding this situation, just as it did in the case of compensation.

In favor of the compulsory bond is the fact that it could be done with a minimum modification of the lien law, that it would tend to weed out the irresponsible and crooked contractor, that it would absolutely protect the laborer in his wages and the owner against paying twice for his house, and leave the protection of the material men as great as it is now. The Small Claims Court could be given jurisdiction so far as one week's wage is concerned, so as to secure quick and inexpensive collections of labor claims, which is one of the primary shortcomings of the present arrangement.

There are undoubted evils arising from the present law. There is plenty of room for difference of opinion as to the best method of correcting them. On general principles that method is best which involves the least extension of bureaucracy and the lesser possibilities of bureaucratic interference with business, provided the expense is not prohibitive. The writer believes that the compulsory bond has advantages both in effectiveness and in freedom from bureaucratic possibilities which entitles it to serious consideration.

PLUMBING-HEATING CONTRACTORS AT SEATTLE ORGANIZE

The Heating and Sanitary Engineers Association of Seattle was organized at a recent meeting in that city. Officers elected were: Jas. Canny of the James Canny Corporation, president; C. F. Twist, of Ashwell & Twist, vice president, and Dick O'Connell, of the Globe Heating Co., secretary-treasurer. Weekly meetings will be held in the Chamber of Commerce rooms at Seattle

Francisco Builders' Exchange, will leave shortly for an extended vacation to Europe. Graper will visit the important art centers and places of interest on the Continent to gather new ideas and to enjoy a well earned vacation. Graper will join Mr. A. Quandt and Mr. Chas. J. U. Koenig, also members of the Builders' Exchange who are now in Europe. The three will visit all centers of interest and probably return to the United States together.

FRAME HOSPITALS IN OAKLAND DOOMED BY ORDINANCE

Frame hospital buildings in Oakland must go. This is the edict of Frank Colbourn, city commissioner of Public Health and Safety, who announces an ordinance is being prepared which will compel all frame hospital buildings in Oakland to be abandoned.

The ordinance will provide a reasonable length of time in which to vacate the buildings, but those considered the greatest fire hazards will be required to comply with the ruling first.

Consideration will also be given to the financial condition of the hospitals. Those not in a position to rebuild immediately will be given more time.

In no case, however, will the time be extended over two years, Colbourn declares.

The ordinance will affect every hospital in Oakland except such structures as the Merritt Hospital and the county hospital, which comply with the building restrictions, Colbourn said. The ordinance will require that all new hospitals be of all fireproof construction.

SUB-CONTRACTOR MUST INDEMNIFY HIS OWN CREDITS

Industrial accident insurance carried by a contractor does not cover men employed by a sub-contractor, it has been decided by the State Industrial Accident Commission in the case of John Kavanaugh vs. John Grau and William Childers.

Grau is a contractor who was erecting a building in Salinas in February last and had his men insured. Childers was a sub-contractor on the plastering work and carried no insurance. Kavanaugh, a plasterer employed by Childers, stepped backward off a 14-foot scaffold, injuring his knee and both heels.

After taking testimony the State Industrial Accident Commission dismissed the case as to Grau and ordered Childers to pay Kavanaugh \$141.85, seven weeks' accrued indemnity, and \$29.83 weekly during the period of his disability. In its findings the commission stated that Childers had already paid \$350 on account of Kavanaugh's medical attendance.

The testimony in the case was taken at Salinas before W. N. Britton, referee of the commission.

HIGH COST OF CONGESTION

The towering office building, once the monument of municipal enterprise, is beginning to arouse some misgivings among those who wrestle with municipal problems. Engineers are now urging "that cities be spread out rather than built up."

"Higher and higher buildings," said Harlan Bartholomew, city plan engineer of St. Louis, in an address before the civic development group at the annual meeting of the Chamber of Commerce of the United States, "and ever greater concentration of business are not so much monuments of business enterprises as they are symptoms of economic waste."

"Witness New York's \$500,000,000 expenditure for subways with congestion greater today than ever before. The congestion tax of New York is estimated at \$1,000,000 per day, of Chicago \$600,000."

"We have scarcely begun to explore the field of relation of street space to building content and use."

Extent of Santa Barbara Damage Blamed on Faulty Construction

Editor's Note: Professor Bailey Willis of Stanford University who is president of the Seismological Society of America, a geologist of international repute and regarded as the foremost authority on the continent on earthquakes, has issued the following story unsolicited, following his observations of the damaged area in Santa Barbara, he having been there at the time the shock struck the city.

Santa Barbara will not experience another shock like the recent one for many years, as the earthquake strain is off and it is just now one of the safest places in the United States so far as earthquakes are concerned, Dr. Bailey Willis, professor emeritus of geology, Stanford University, and president of the Seismological Society of America declares.

Dr. Willis, an authority on earthquakes, predicted the Santa Barbara disturbances and was in a suburb of the city during the tremors.

Instead of the heavy losses that resulted from the shock there would have been little damage and the earthquake would have passed simply as an interesting experience if public opinion had supported the officials in a rigid enforcement of the rules of good construction, Dr. Willis said in describing the shock and outlining the causes for serious damage suffered at Santa Barbara.

Area Restricted

"Having been in Miramar, a suburb of Santa Barbara, during the recent earthquake, having twice inspected the damage done in the city, and being familiar with the local geological conditions from which the earthquake sprang," Dr. Willis said, "I make the following statement of facts:

"The Santa Barbara earthquake was a local shock of moderate severity."

"The area within which it was starting was about 60 miles long by 10 miles wide, or one-half of the per cent of the area of California. The area of destructive intensity was limited to a few acres. As compared with the earthquake of February 23 in the Eastern states the area of startling shock was about one-fourth of one per cent and the maximum intensity was probably very similar, but much more narrowly localized."

Two Kinds of Ground

"The city of Santa Barbara is built in a valley surrounded by hills and on two kinds of ground, if we distinguish them by their reaction to an earthquake. The hills consist of solid rock or of well consolidated masses of gravel and boulders. The earthquake vibrations in this material are very rapid, but short, and harmless as a shiver."

"The valley fill is less firmly consolidated, the vibrations are longer and though slower, are more dangerous. This was one principal reason for

the concentration of destruction along State street. The other prime reason was poor design and bad construction. Good buildings stood, poor ones revealed their weakness."

"The California Hotel, a frame structure with brick walls, was stripped of its walls because they were not properly fastened to the frame and all the interior was revealed to view."

"The San Marcos Building, the most conspicuous failure, was of heavy concrete, rather lightly reinforced and not braced diagonally to an adequate degree considering the weight of the walls and arched concrete floors. An older section of the structure formed the corner and it was knocked down by the swaying of the entire building, just as the end brick of a pile will be knocked over. The floors and roof fell in and the walls collapsed on top of them, showing the weakness of the concrete and the lack of rigidity in the structure."

"The damage to the Arlington Hotel appears to have been due to architectural ambition, which led to the construction of heavy brick towers adjacent to a large open rotunda, across which there was no adequate bracing. The brick walls at the back also fell out because they were not tied to the frame."

Precautions Neglected

"This review of the damage done in conspicuous cases shows what the general causes of loss were. Unfortunately, they are not confined to Santa Barbara nor even to California. The fundamental cause of earthquake damage is the general neglect of the precautions necessary to insure ourselves against it."

"Where the ground is of such character that the vibrations are bound to be dangerous, we may protect ourselves by sinking foundations ten feet or more, constructing the foundation walls with wide footings, or putting the structure on a reinforced slab, so that it will move as a unit."

"The responsibility really comes back to technical men and public opinion. If the engineers and architects had insisted in adequate building laws embodied in a proper code of regulations, and if public opinion had supported the officials in a rigid enforcement of the rules of good construction, this moderately severe earthquake would have passed simply as an interesting experience."

WHEN A CATALOGUE IS NOT A CATALOGUE

A catalogue, according to the Post Office Department's interpretation of the new postal rates, is not a catalogue when it contains less than twenty-four pages. And not being a catalogue it is not entitled to the rate of 1¢ per 2 oz. but must bear a rate of 1½¢ per 2 oz.

The effect of this ruling, as brought to the attention of the Department of Transportation and Communication of the Chamber of Commerce of the United

States by various business organizations, has been that many business houses are increasing their catalogues to 24 pages with a tendency to break down well-established trade standards of paper size, printing and folding.

Some have discovered that by attaching a circular, on which the rate is 1½¢ if mailed alone, to a 24-page catalogue, the whole can be mailed for 1¢.

These and other effects of the new postal rates will be considered by the Joint Subcommittee of Congress at hearings to begin at Washington July 20.

FIRE COST \$1044 A MINUTE

America's bill for fire waste last year, 1924, was \$1044 a minute, an annual loss of \$548,000,000, exceeding all previous high records. These are the figures of the Actuarial Bureau of the National Board of Fire Underwriters quoted in a bulletin issued by the Insurance Department of the Chamber of Commerce of the United States and the National Fire Waste Council.

The total amount of property destroyed during the year was equivalent to more than half the annual interest on the national debt.

Much of this enormous loss is preventable waste. Although the fire losses of the United States continue to mount," says the bulletin, "it is not necessarily an indication that they cannot be reduced. The experience of the 1924 Inter-Chamber Fire Waste Contest shows that losses in the reporting cities were reduced to the extent of \$4,000,000 over their average for the preceding five years coincident with the activities undertaken by local fire prevention committees. The per capita loss in these communities was \$3.10, as compared with the national average of approximately \$5.00.

"What has been done in some cities might well be duplicated in others through energetic fire prevention programs carried on under the auspices of local chambers of commerce and similar organizations. Although fire waste is a national problem, it can only be solved through the combined endeavor of all communities."

PRaises CALIFORNIA HIGHWAYS

"I came to spend several weeks and stayed two months." This was the answer of C. J. McKenzie, highway engineer of New Zealand and a member of the Public Works Department of that country, when asked his opinion of California state highways following the completion of his recent investigation.

Mr. McKenzie is on a tour of the United States and Great Britain, inspecting highway construction for New Zealand where an extensive highway building program is contemplated. He has planned a comparatively short stay in California, but found so much of interest that he remained more than his allotted time.

Mr. McKenzie visited all parts of the state, investigating every phase of the department's activities, discussed construction methods with the engineers, and went away with the highest praises for California's highways.

ENGINEERING COURSE PLANNED FOR U. OF C.

The engineering department of the University of California Extension Division is repeating five of its popular courses this fall in Oakland:

Advanced blueprint reading and estimating; Beginning Thursday, September 3, 7 o'clock, 10 McClymonds High School, Myrtle street near 26 street, W. J. Huston, instructor.

Blueprint reading (elementary): Beginning Wednesday, September 2, 7 o'clock, 10 McClymonds High School, Myrtle street near 26th street. Grover C. Polson, instructor.

Diesel engines: Beginning Friday, September 4, 7:30 o'clock, 221 City Hall, Fourteenth street. Carl G. A. Rosen, instructor.

D. C. and A. C. electricity: Beginning Thursday, September 3, 8:30 o'clock and 7:30 respectively, 221 City Hall, Fourteenth and Washington streets.

British Interested in U. S. Simplification of Clay Bricks

Simplification of clay bricks in this country is being watched with considerable interest by the clayworking industry in Great Britain, according to information reaching the Division of Simplified Practice, Department of Commerce, under whose auspices the American clay industry reduced 29 sizes of rough face brick to 1, 36 sizes of smooth, face brick to 1, and 44 sizes of common brick to 1.

The British brick industry, it is indicated, is in much the same position as was the American brick industry when simplification was undertaken. While nominal standards were adopted two decades ago, there has been a lapsing of adherence to such standards, and today a number of variations in dimension are found — particularly in the thickness of bricks produced in various districts.

The "British Clayworker" in a recent issue, has this to say about the problem:

"In America, ideas as they present themselves in important industries, are followed up by means of investigation, with a view to increasing production and sale, and reducing, and the matter of standardization is receiving close attention in all classes of manufacture.

"Within the last few years road paving bricks have been under scrutiny and by the efforts of the National Paving Brick Association manufacturers have been brought into line with the effect of reducing 66 varieties down to five. Facing bricks have similarly been reduced from 36 varieties to one class, and variations in dimensions have been ruthlessly ruled out.

"So important is the necessity for economy in production in these days that we should all look round to see if action of this kind would not benefit the brick trade as much as it has undoubtedly benefited the motor trade, and will, it is claimed, simplify the housing problem. * * *

"We have London stocks, wirecuts, pressed bricks, sand faced facing bricks, smooth facing bricks, and lime sand bricks, produced in different districts by different methods from different raw materials. Where we are, however, inconsistent, is in the dimensions or rather one dimension of the bricks made, and in this direction standardization would have been of immense value during the last two years, and would be during all the period of intense production and large demand.

"It is impossible for the qualified observer to understand why bricks should be produced in varying thickness in various districts. We have the standard of 2 1/2 inches, fixed some 29 years ago by the efforts of the Insti-

tute of Clayworkers in conjunction with the Royal Institute of Brick Architects, and yet we find bricks in the Midlands and North made in 2 3/4, 3, and 3 1/4 inches in thickness and in Scotland 3 1/2 inches. No one can explain why these differences arose and why they are so stubbornly maintained.

"There is no advantage that can be advanced for the greater thicknesses than the agreed standard, and every possible reason why the standard should be universally adopted.

"When we compare the English sizes with those adopted in other countries, the anomaly is made still more striking, because we were among the earliest makers, and have increased sizes, while they, in following in our footsteps, have reduced them. * * * Brickwork is cheaper in all these countries than in ours, so it is evident that thickness does not spell cheapness of building. The bricklayer prefers and welcomes smaller brick and does more work with it. The brick manufacturer has his drying and burning problems simplified, besides the greater ease of handling. Waste is also reduced. * * *

"The present time is one when standardization of brick sizes throughout the country would be an easy matter. It would give satisfaction to everyone, and dissentients would be forced into line with all others by the imperative necessity of buying what was offered, if they wished to continue in business. The benefit to the trades concerned would be great from an economic standpoint, and from an aesthetic standpoint the improved appearance of brick work generally would be of great value. * * * Let us then take the opportunity and standardize so that all bricks in the country are of one uniform size."

Recent surveys by the Division of Simplified Practice in the brick industry of the United States indicate that there is a very general adherence to the simplified sizes in this country, except in a very few isolated cases where brick yards are producing for special demand in addition to their filling of orders for the recognized sizes.

It is further indicated that the clay brick industry is stimulated to a closer adherence to the simplification program by the fact that other brick materials have been brought under Simplified Practice to adopt a single size, which makes for a keener competition as to quality, service and price, and which also makes it incumbent upon brick manufacturers to safeguard the benefits of simplification by not breaking away from the recognized sizes.

UNITED LUMBER YARDS TO ADD TO PRESENT CHAIN

Announcement has been made of the consolidation of the Kevin Lumber Company with the Sacramento Lumber Company forming a chain of retail lumber yards to be known as the United Lumber Yards.

The new company intends to add several other lumber yards to its chain within the near future. Towns that are now being served by the United

Lumber Yards, Inc., are Sacramento, Modesto, Oakdale, Ripon, Empire, Waterford, Riverbank, Hughson and Denair.

T. H. Kewin of Modesto will remain as president of the new company. George P. Thompson of Minneapolis will be vice-president and general manager. Thompson was formerly president and manager of the Thompson Yards, Inc., of Minneapolis. In that vicinity in six years he built up a chain of 184 yards.

TRADE NOTES

The Certain-Teed Products Company is preparing to put on night shifts at its Pacific Coast plants to take care of new business growing out of the earthquake at Santa Barbara where roofing and building products are in extensive demand. On the basis of the full year's schedule officials of the company estimate 1925 profits will be more than double last year.

Merrill Y. Stoddard, for ten years engaged in the vicinity of Quincy, Plumas county, Calif., as a lumber operator has left for Reno, Nevada, where he has completed arrangements for the establishment of a lumber re-manufacturing plant.

The gravel and sand pit of the Decoto Sand and Gravel Co., at Decoto, Alameda county, will start operations July 20. Joseph Costello, owner of the San Leandro quarry, is president of the company.

Damage estimated at \$500,000 resulted when fire swept the planing mill of the Western Oregon Lumber Company and the entire Beaver Linton mills at Linnton, a small community northwest of Portland, Ore.

The rock plant of Hein Bros. of Napa, on the San Rafael road, south of Petaluma, has started operations. Three rock crushers are operating. The plant represents an expenditure of \$80,000.

K. C. B. Electric Manufacturing Company plans a \$10,000 addition to the present plant at Forty-second St. and Fourteenth Ave., Sacramento, according to announcement of R. E. Harris, president of the company.

E. U. White Lumber Company, capitalized at \$50,000, has been incorporated in Santa Rosa. The directors of the company are: E. U. White of Santa Rosa and E. M. Chapman and I. G. Porter of San Francisco.

The Link-Belt Meese & Gottfried Co. of San Francisco has opened a new branch office at Fresno. This office will be in charge of Ralph L. Elrod, 215 Brix Bldg.

E. K. Peck has been named manager of the Corcoran Hardware Company at Corcoran in Kings County.

REINFORCING STEEL AWARD

Badt-Falk & Company of San Francisco, have been awarded contract by the A. J. Crocker Co., San Francisco, and Robinson, Roberts & Kohl, Oakland, to install all of the reinforcing steel to be used in the construction of the estuary subway for Alameda County.

Approximately 5000 tons of reinforcing steel will be used in the structure. This is probably the largest single contract for reinforcing steel that has ever been let in this section of the country. The steel is being manufactured by local steel mills. Work is to start immediately on the Oakland approach and subway, and construction will probably be finished by the end of 1926.

Year's Building Activity May Surpass Previous Records

Despite the extraordinary rate of construction which has continued without interruption since 1922, and the growing evidence that in many sections the shortage of building space has been largely, if not entirely, removed, current reports indicate that this year's activity will approximate and perhaps surpass, even the record figures of recent years, states the current issue of the "Guaranty Survey," published by the Guaranty Trust Company of New York.

Building contracts awarded last month in 36 States, as reported by the F. W. Dodge Corporation, represented a total value of \$496,024,100. The figures for these States are believed to include about seven-eighths of the entire construction of the country. The May total is the highest ever recorded in the history of the industry, with the exception of that for the preceding month, which was \$546,970,700. As compared with the value of contracts awarded a year earlier, the May figure shows an increase of 18 per cent.

Contracts awarded during the first five months of the year had a value of \$2,935,644,100, which is nearly 10 per cent larger than the 1924 figure and 22 per cent above that for 1923. The area of floor space represented by this year's contracts, however, is slightly smaller than that of a year ago.

Decline in N. Y. District

The large volume of work begun this year is especially striking in that it has been achieved in spite of a drastic decline in the New York district, which includes New York State and northern New Jersey. In January and again in May, this year's valuations in this district exceeded slightly those of last year. But in the intervening months the 1925 figures were much lower, and in March the total was less than one-half that of a year earlier. For the first five months of this year the aggregate is 24 per cent lower than that of the corresponding period in 1924.

In drawing these comparisons, however, it must be remembered that last year's activity was strongly influenced by the tax-exemption privileges in New York which expired in the spring of 1924, the "Guaranty Survey" continues. With this impetus removed, it was expected that this year's building would show somewhat smaller totals. Nevertheless, the abrupt decline in February, after the sustained high level which continued throughout last year, suggests that the reduced activity of recent months may have a deeper significance.

The gains over last year's activity are fairly evenly distributed throughout the country. With the New York district eliminated, the total for the 36 States is 27 per cent larger than that of a year ago. Except for the Northwest, where is very slight decline is reported, every district shares in the gain. The increases range from 7 per cent in the southeastern states to 55 per cent in the Pittsburgh district, which includes western Pennsylvania, West Virginia, Ohio and Kentucky.

Tendency Toward Stability

As regards costs, the industry is apparently in a more stable condition than at any other time in recent years. Both in the building industry itself and in the manufacture of building materials, operators have gradually become better adjusted to the unpre-

cedented rate of activity of the last three years. Most of the labor contracts signed this year embody renewals of existing wage rates. Although the average level of building wages has continued to rise slowly, the advances in recent months have been due to the making of new agreements in which old rates have been raised to the levels now generally prevailing. The critical period of contract renewal this spring was passed with a gratifying absence of serious disturbances.

More recently, however, the country's building program has been threatened by the outbreak of an old controversy between two labor unions over the question of jurisdiction. Representatives of the organizations involved have been in conference with the Secretary of Labor this month, in the effort to avoid an interruption of building operations estimated to amount to \$100,000,000.

Cost Changes

The index of building costs compiled by the Federal Reserve Bank of New York indicates that the average expense of building this year has been slightly higher than a year ago, while the cost index of the "Engineering News-Record" reflects a decline of more than 5 per cent. The marked disparity between these two indexes is probably due to the varying importance assigned to the different materials entering into the averages. The index of the Federal Reserve Bank is based on the wholesale price index of building materials published by the Department of Labor, which gives great weight to the price of lumber, and very little to the price of structural steel. On the other hand, this index is considerably more inclusive than the other, which is based on prices of only a few of the most important materials. The two indexes ascribe about the same importance to the cost of labor—approximately 40 per cent of the total.

Some light is thrown on the question of comparative costs by a consideration of the area and value represented by contracts awarded. The average value per square foot of floor space during the first five months of this year and the corresponding period last year, by classes of building, is as follows:

Classification	1925	1924
Commercial	\$5.39	\$5.17
Educational	6.61	5.77
Hospitals and institutions	7.92	6.83
Industrial	6.91	6.78
Military and naval	7.68	6.86
Public buildings	8.63	7.44
Religious and memorial	4.87	4.68
Residential	8.22	5.62
Social and recreational	5.47	\$5.06

It will be noted that the average cost per unit or area is materially higher this year in every group except military and naval buildings, which form only a very small proportion of the total. The average increase in unit cost is about 8 per cent. This rise does not by any means measure the advance in average building costs during the year, but it does provide some basis for the contention that an advance rather than a decline, for the country as a whole, has taken place.

Outlook Promising

The probable trend of building operations even for the near-term future, is a matter of mere conjecture. The experience of the last few years has

been such as to discourage predictions regarding the future of the industry. Although evidence is not lacking that great inroads have been made on the building shortage accumulated during the war and the post-war depression, many districts continue to report a dearth of housing space.

It seems probable that, under favorable conditions, building activity will remain high throughout this year, and that next year's operations will be well above the average. But the industry is well known to be highly sensitive to adverse influences. A marked advance in interest rates, a sharp decline in general business activity, a disappointing crop season, or any one of numerous other developments might bring about a considerable slackening of pace in the building industry. None of these things is in immediate prospect, however, and it is reasonable to suppose that construction will proceed at a gradually diminishing rate until the country as a whole shall have overtaken its normal building program.

BIG IMPROVEMENT IN PATENT OFFICE CONDITIONS

Decided improvement in the status of work at the Patent Office is shown in the first detailed report submitted to the Secretary of Commerce since the Office was transferred to the Commerce Department on April 1 last.

Despite the receipt of 190,000 new applications and 20,000 more amendments than during the previous year, Commissioner of Patents Robertson in his statement to Secretary Hoover, reports that the close of the last fiscal period found the Patent Office with 16,000 fewer cases awaiting official action than a year ago.

There were only 43,000 cases pending on June 30, last, against 59,000 a year ago; 72,475 on June 30, 1923; and 67,608 at the end of the fiscal year 1922.

A year ago but one examining division had its work less than three months behind. There are now 5 under 2 months and 14 under 3 months.

Thirty-six divisions have succeeded in reducing their work to a four-months basis against only 2 in this class last year, while 48 others have gotten their work to a 5 months basis against only 8 in this class a year ago.

Last year at this time there were 40 divisions over 5 months, 26 over 6 months, 9 over 7 months and 2 over 8 months. Now there are only 5 divisions over 5 months and none over 6.

According to the Patent Commissioner's report, during the year just closed his Office has decreased the average time that application must await official action by 2 months in new work and 1 month in old work so that the average time that a new application must await to receive official action has been reduced from 5 months to 3, and the average time an amended application must await official action has been reduced from 3.4 months to 2.3 months.

In the absence of Secretary Hoover, Acting Secretary Stephen Davis expressed much satisfaction over the improved conditions.

SAMPLES WANTED

B. S. Hayne, Architect, 110 Sutter St., San Francisco, desires to receive samples or catalogues of genuine or imitation slate for roofing a school building.

Europe's Greatest Movie House Puts Heating Boilers on the Roof

Radical improvements in heating and ventilating design have been effected in the recent construction of the famous Capitol Theatre of London, generally regarded as the most luxurious and perfectly equipped motion picture house in Europe.

The entire system, which is fired by city gas, is put into operation simply by turning on and lighting the gas in the tubular gas boiler, and starting the pumps and fans. The engineer requires no additional man to assist him to run the plant, as the gas boiler needs no further attention once it is lighted, and involves no stoking.

This system has received the special commendation of the local government authorities, whose approval of heating and ventilating systems in such buildings must first be obtained. The tendency of the government is to encourage those installations in which efficient heating can be obtained only in conjunction with suitable mechanical ventilation.

By using gas, the theatre has also aided the "Brighter London" movement to eliminate the smoke nuisance.

Another interesting feature of the system is the fact that the gas boilers

are placed on the roof where they are entirely out of the way. Instead of using the basement and part of the first floor for the housing of heavy boilers, these valuable portions of the building are used for other and more remunerative purposes. The gas, of course, requires no mechanical device except piping, to deliver it to the top of the building.

Had solid fuel been used, space would have had to be provided for the storage of fuel and ashes. In addition to which the labor required for stoking and tending the boilers' and the removal of ashes was estimated to amount to half of the time of two men.

Had oil been used, storage space for the oil would have been required, and it is estimated that 25 per cent of two men's time would be involved in the running of the boiler and the handling of the oil. Further, the boilers and oil storage room could have been situated only in the basement or on the ground floor.

With gas, the supply of fuel is automatic, as is also the working of the boilers, and the engineer requires no additional man to help him in running the plant.

"Fire Proof" Term is Taboo

It has been contended for years by qualified engineers that there is no such thing in common residential building practice as "fire-proof" construction. No doubt many thousands of American families are today living in so-called "fire-proof" homes under the delusion that they are immune to the hazards of fire. Such stress has been laid upon the "fire-proof" quality of certain building materials, that the Committee on Building Construction Specifications for Private Residences of the National Fire Protection Association, has made the following notation in its recent report:

"The use of the term 'Fireproof' is recommended to be discontinued. This general term has been erroneously applied to buildings and materials of a more or less fire-

resistive or incombustible nature. Its indiscriminate use has produced much misunderstanding, and has often engendered a feeling of security entirely unwarranted."

The term "fire-resistive" may be applied to any standard building material when correctly used. The fact that the material itself is incombustible does not mean necessarily that a structure of which it is the major part is fire-proof or fire safe. The arrangement and protective features of construction are of paramount importance. Any construction which will pass a fire test made in accordance with the tentative specifications of the American Engineering Standards Committee for Fire Tests of Materials and Construction is "fire-resistive," whether of stone, steel, concrete, lumber, or brick.

INSULATED HOMES BRINGS GAS HEATING FOR ALL

That home owners, by insulating their houses, can have the convenience of city gas instead of coal for all heating purposes at a cost even less than coal is being demonstrated in the construction of a model home in Chicago which both gas men and architects are watching with the greatest interest.

The house is being built on the corner of Algonquin and Tahoma Streets, and a bus line has been opened to carry all those who wish to examine its construction.

On account of the heat retaining qualities of the insulation, the gas-fired heating plant will be of a size usually used for gas-burners declare that this will be ample to keep the house at a comfortable temperature during the coldest weather, with the added advantages of maintaining a more even heat than it is possible to do with a coal furnace and of eliminating dirt, smoke and the nuisance of shoveling coal, shaking down the fire and carting out the ashes.

It is estimated that the cost of heating the house with gas under these

conditions will be less than \$125 a year, and that the saving in the cost of the heating plant over what would be required if the house were not insulated will probably pay for the cost of the insulation.

FRESNO BUILDING WAGE PACT RECEIVES APPROVAL

The Fresno Building Trades Council, representing the building unions of the city, adopted the wage contract and working agreement submitted by the committee of five delegates to the Fresno Joint Labor Board after a thorough discussion of the 14 provisions of the pact.

The agreement, it is understood, is virtually the same as the one adopted last year, and is the third annual agreement successfully negotiated by the unions with the employers.

This pact was drawn up by committees representing the Fresno Builders' Exchange, representing the employers, and the trades council representing the workers.

The only change in the agreement from last year was in the matter of the union label on planing mill work.

Building News Section

APARTMENTS

To Be Done by Day's Work.
APARTMENTS Cost, \$20,000 ea.
SAN FRANCISCO, Bay and Larkin
Streets.
Two three-story and basement frame
and brick veneer apt. bldg. (12, 3- and
4-room apts.).
Owner—Axl A. Johnson, 632 Belvedere
St., San Francisco.

Bids Being Taken.
APARTMENTS Cost, \$60,000
SAN FRANCISCO, NW Shrader and
Fell Sts.
Three-story and basement frame and
brick veneer apt. bldg. (12, 3- and
4-room apts.).
Owner—O. M. Oyen.
Architect—Baumann & Jose, 251 Kear-
ny St., S. F.

Contract Awarded.
APARTMENTS Cost, \$125,000
SAN FRANCISCO, Larkin near Geary
Streets.
Five-story class C reinforced concrete
apartment building (40 2-room
apts.).
Owner—Mrs. A. West.
Architect—Frank S. Holland, 137 9th
Ave., San Francisco.
Contractor—G. P. W. Jensen, 320 Mar-
ket St., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$15,000
SAN FRANCISCO, SE Cor. Union and
Webster Streets.
Two-story frame and stucco apart-
ments (4 apts.).
Owner—Samuel H. Levin, 2055 Union
St., San Francisco.
Architect—Reid Bros., 105 Montgom-
ery St., San Francisco.
Contractor—J. E. Pasquelli, Hum-
boldt Bank Bldg., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$24,000
BERKELEY, 2225 Hearst Avenue.
Three-story frame (6) apartments.
Owner—Mr. and Mrs. M. F. Williams,
1428 Franklin St., Oakland.
Plans by Contractor.
Contractor—Harry C. Knight, 1428
Franklin St., Oakland.

Sub Figures To Be Taken This Week.
APARTMENTS Cost, \$100,000
SAN FRANCISCO, NE Fillmore and
Haight Sts.
Four-story reinforced concrete apart-
ment and store building (30 2-rm
apartments).
Owner—W. J. Sandell.
Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.
Contractor—W. S. King, 215 Hearst
Bldg., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$90,000
SAN FRANCISCO, SW Page and
Steiner Sts.
Three-story and basement frame apart-
ment house (72 rooms, 30 apts. in
all).
Owner—Dr. Bodkin.
Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.
Contractor—W. S. King, Hearst Bldg.,
San Francisco.

To Be Done by Day's Work.
APARTMENTS Cost, \$12,000
SAN FRANCISCO, S Pine St. 173 E Di-
visadero St.
Three-story and basement frame (12)
apartments.
Owner—Geo. Valencia, 2356 California
St., San Francisco.
Architect—Kerr & Pleacher, 613 Postal
Telegraph Bldg., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$16,000
SAN FRANCISCO, NE Clayton & Grove
Streets.
Two-story and basement frame (10)
apartments.
Owner—Emma L. Moulthrop, 1992
Grove St., San Francisco.
Architect—Evans & Co., Pacific Bldg.
San Francisco.
Contractor—C. F. Parker, 251 Kearny
St., S. F.

HAYWARD, Alameda Co., Cal.—J.
Lustig, local furniture dealer, will
have plans prepared for a three-story
apartment house at the corner of
Watkins and A streets. Will probably
be brick construction. Estimated cost,
\$35,000.

LOS ANGELES, Cal.—Winter Con-
struction Co., 2400 W. 7th St., award-
ed contract at \$422,432 for all work
complete for completing the San Ja-
cinto Dwellings apartment house at the
northwest corner of 6th and Caron-
delet Sts., for Southern States Realty
Co.; Russell & Alpaugh, 1105 Story
Bldg., architects. Concrete frame 18
at present completed up to 9th floor;
240 rooms, 104 apartments; 100x150 ft.,
reinforced concrete construction,
stucco exterior, cast stone, ornamental
iron, hardwood floors and trim, tiled
baths, 2 electric passenger elevators,
refrigerating system, heating system,
2-story concrete garage, 50x100 feet.

LOS ANGELES, Cal.—Harley S. Brad-
ley, 1013 Hollywood Guaranty Bldg.,
has compl. plans for 4-story and base-
ment, H-shape, own-your-own apt.
bldg. with 32 3-rm. and 4-rm. apts.,
at cor. 2nd St. and Lafayette Park, for
Ridgely Wilson; brick constr., struc.
steel, cem. plas. and art stone facing,
tile baths and drainbds., cork flrs. in
kitchens and breakfast rms., hwd. flrs.,
pine trim, comp. and tile fl., wall
beds, built-in refrig., central refrig.,
plant, steam hgt. sys., aut. storage
water htr., sound deadening, inciner-
ator, 2 aut. elevators, brick garage;
day wk. by owner; \$200,000.

SANTA MONICA, L. A. Co., Cal.—
Frank Webster, 922 Hollywood Guar-
anty Bldg., is taking bids from se-
lected list of bidders for 2-story, 12-
at. bldg. with 3 rms. ea. on Ocean
Front, Santa Monica for E. W. Boehme;
fr. and stucco, tile fl., hwd. flrs.,
hwd. and pine trim, tile baths and
drainbds., wall beds, unit sys. hgt., aut.
water htrs., wr. iron, built-in refrig.,
garages; \$50,000.

BONDS

BURLINGAME, San Mateo Co., Cal.—
Election will be called shortly to vote
bonds of \$75,000 to finance erection of
new public library.

E. T. Thurston

Mem. Am. Soc. C. E.
Consulting Construction
Engineer

57 POST STREET

Kearny 6757

Twenty-five years' experience as
engineer and general contractor.

EUREKA, Humboldt Co., Cal.—Bids
will be asked at once by supervisors
for purchase of \$5,000 bond issue of
Klamath School District; proceeds of
sale to finance school improvements.

CHURCHES

Plans Being Figured.
ADDITION. Cost, \$30,000
HANFORD, Kings Co., Cal.
Addition to present frame and brick
church.
Owner—First Methodist Church, Han-
ford.
Architect—Wythe, Elaine & Olson, 1800
Telegraph Ave., Oakland.

Plans To Be Figured in About Three
Weeks.
CHURCH. Cost, \$60,000
RENO, Nevada. West and First Sts.
One and two-story brick church build-
ing with tile roof.
Owner—Methodist Episcopal Church.
Architect—Wythe, Elaine & Olson,
1800 Telegraph Ave., Oakland.

Bids Being Taken.
CHURCH. Cost, \$25,000
EL CERRITO, Contra Costa Co., Cal.
Church (Sunday school, club rooms,
kitchen, etc.).
Owner—Methodist Episcopal Church,
El Cerrito.
Architect—Wythe, Elaine & Olson, 1800
Telegraph Ave., Oakland.

PASO ROBLES, San Luis Obispo Co.,
Cal.—Arthur G. Lindley, 800 American
Bank Bldg., Los Angeles, is compl. wk.
plans for 1-story frame and stucco
church bldg. at Paso Robles, for the
Paso Robles Methodist Episcopal
Church; auditorium to seat about 500,
Sunday school depts., kitchen; tile and
comp. fl., hwd. and pine flrs., pine
trim, art glass, organ grille, pipe or-
gan; will be ready to take bids latter
part next week.

HANFORD, Kings Co., Cal.—Bids
will be asked at once by First Meth-
odist Church to remodel the present
church building and make addition of
one 40x60 ft. frame Sunday School
building with Kellastone exterior.
Plans were drawn up by Architect
Wythe, Elaine & Olson, 1800 Telegraph
Ave., Oakland.

FACTORIES & WAREHOUSES

Contract Awarded.
OFFICE AND WAREHOUSE.
Cost, \$75,000
OAKLAND, corner of E 14th St. and
5th Ave.
One-story brick and steel office and
warehouse building.
Owner—Willis-Overland Pacific Co.,
1299 Bush St., San Francisco.
Architect—None.
Contractor—The Austin Co., of Calif.,
244 Kearny St., San Francisco.
(60162) 1st report May 16, 1925.

Contract Awarded.
WAREHOUSE. Cost, \$16,000
OAKLAND, NW 16th and Poplar Sts.
One-story brick warehouse.
Owner—Grove Investment Co., 1225
Washington St., Oakland.
Architect—None.
Contractor—John M. Bartlett, 354 Ho-
bart St., Oakland.

Contract Awarded.
ADDITION. Cost, \$13,603 each
OAKLAND, 47th Ave. and E-10th St.
Two additions to lead mill.
Owner—National Lead Co. of Cal., 485
California St., San Francisco.
Contractor—Barrett & Hlip, 354 Hobart
St., Oakland.

Contract Awarded.
MFG. PLANT. Cost, \$—
SAN FRANCISCO, 26th and Kansas St.
 Manufacturing Plant.
 Owner—R. P. Schwann & Asso.
 Designer and engineer, C. H. Snyder,
 251 Kearny St., San Francisco.
 Contractor—George Wagner, Inc., 181
 S Park St., San Francisco.

Bids to be Called For Shortly.
1-11 BLDGS. Cost, \$200,000
SOUTH SAN FRANCISCO.
 Group of six mill buildings (1 unit
 to be 90x100 ft.)
 Owner—Western Pipe & Steel Co. of
 South San Francisco.
 Engineer—W. W. Brelite, 601 Clunie
 Bldg., San Francisco.
 Plans will be out for figures about
 August 15th.

Contract Awarded.
WAREHOUSE ETC. Cost, \$18,000
SAN FRANCISCO, E San Bruno Ave.
 1020 S Army.
 Owner—Consolidated Milling Co.
 story frame mill.
 Owner—Consolidated Milling Co.
 Engineer & Contractor—J. H. Hjul, 128
 Russ Bldg., San Francisco.

PETALUMA, Sonoma Co., Cal.
 —Upland citrus sugar refinery. Re-
 fining Co. are conferring with Cham-
 ber of Commerce regarding the erec-
 tion of a modern beet sugar plant. It
 is proposed to have construction
 started on the first unit of a 600-ton
 plant before October of this year.

JPLANDS, San Bernardino Co., Cal.

ery St.

SNAPPY SHOTS

By Denis McCarthy

CLARENCE P. PRATT.
Sand, Rock and Gravel.

We know a delicious bughouse fable and while you're waiting for your
griddle cakes, we'll tell it to you.

Here it is:
"Well, Sandy," greeted a short, rather bow-legged newspaper man, "You
wouldn't object to having a little sketch and a writeup in the—"
"Absolutely nothing doing!" cried Sandy, with tremendous sincerity.
"Why, that's publicity and I'm opposed to it!"

That, in short, is — well, where the Bunker monument rests.
Now that you've met Sandy we'll tell you where he was born and how he
got sand in his eye and gravel in his shoes and rocks in his pockets.

He was born in Tulare. (It's in California, we believe.) And didn't achieve
fame as a circus ticket seller, inasmuch as he seriously entertained the am-
bition for months.

And with this great grief in his heart he sank into obscurity and didn't
emerge until along about 1906, where we find him teaching school in Tulare.

Then for a while he sold school and church furniture and in 1907 came to
San Francisco and got sand in his eyes.

And it couldn't have been very annoying because Sandy is still in sand.
He is an Islam Temple Noble and a Rotarian and we hope the gay chaps
of Rotary smack a wholesome fine on him at today's luncheon because of
this publicity.

DENIS MCCARTHY is an artist.

AND A special writer.

ON THE Examiner.

AND THE above essay.

APPEARED IN the Examiner.

ON JULY 21st, 1925.

DENIS IS a clever writer.

AND WHEN he draws.

HE THROWS a wicked pen.

SANDY HOPES.

DENIS DOES well.

NOW ABOUT the circus stuff.

IN THE above Examiner story.

SANDY PRATT, President.

OF THE Pratt Building Material Co. "I THANK you."

YOU MAY BE NEXT.

WHEN A boy.

AT TULARE City.

WANTED To travel.

AND SELL tickets.

WITH THE circus.

AND IF Barnum or Bailey.

HAD PERSONALLY asked Sandy.

TO LEAVE home.

AND THOSE near and dear.

TO HIM.

SANDY WOULD have traveled.

SELLING TICKETS.

LIVED THE "sawdust" life.

AND SANDY'S greatest ambition.

WAS TO return.

TO HIS home town.

AND MAKE all the kids.

BUY TICKETS from Sandy.

Official Proposals

NOTICE TO CONTRACTORS

(Technical School—Fresno)

Pursuant to an order of the Board of Education, Fresno City High School District, duly made and entered in its minutes this 10th day of July, 1925, the Secretary was authorized to advertise for and receive bids or proposal for the following:

Reinforced Concrete Work; Sheet Metal Work and Plumbing; said work to be done in the alteration and fire proofing of the Fresno Technical School building, located Stanislaus Street, between Tuolumne and Stanislaus.

Plans and specifications on file with Trewitt-Shields Company, Pacific-Southwest Building, Fresno, Calif.

The bids must be made on forms to be furnished by said Trewitt-Shields Company.

A certified check made payable to the Board of Education in the amount of 10 per cent of the bids must accompany each bid, all bids to be sealed and delivered direct to the Secretary of the Board, 2525 Tuolumne Street, Fresno, California, before 5 P. M. on the 24th day of July, 1925.

The Board reserves the right to reject any and all bids.

Bids to be opened at 8 o'clock P. M., July 24, 1925, at the office of the Board of Education, 2525 Tuolumne Street, Fresno, Calif.

Order Board of Education—Fresno City High School District.

L. L. SMITH, Secretary.

NOTICE TO BIDDERS

(Women's Dormitory—Reno—Plumbing and Heating)

The Board of Regents of the University of Nevada will receive bids for Plumbing and Heating in the Women's Dormitory at the University of Nevada according to official drawings and specifications now on file.

Drawings and specifications may be secured at the office of Architect, F. J. DeLongchamps, Gazette Building, Reno, Nevada.

A deposit of ten dollars will be required for each set of drawings and specifications taken from the Architect's office.

Bids shall be file at the Office of the Comptroller of the University of Nevada, not later than 9 A. M., July 31, 1925.

All bids to be sealed in opaque envelope and addressed "Board of Regents, University of Nevada," and marked "Bid for Plumbing and Heating for Women's Dormitory."

Each bid shall be accompanied by a certified check amounting to at least five per cent of the amount bid.

The Board of Regents reserves the right to accept any bid or to reject all bids.

NOTICE TO CONTRACTORS

(Turlock Union High School District)

Notice is hereby given that Sealed Bids will be received and opened by the Board of Trustees of the Turlock Union High School District, Stanislaus County, State of California, in the High School Building, Turlock, California, at 8:00 o'clock P. M., August 3, 1925, for the Drapes and Stage Equipment, Electric Fixtures, Window Shades and Linoleum Work in connection with the Auditorium Building of said High School, in accordance with plans and specifications made for the same by W. H. Weeks, Architect, 369 Pine Street, San Francisco, and 1924 Broadway, Oakland, California, with their several propositions.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

Plans and specifications may be seen at the Offices of the Architect before mentioned, and at the office of the Clerk of the Board of Trustees, Mr. A. G. Crowell, Turlock, California.

Each bid must be accompanied by a certified check on some responsible California Bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to A. G. Crowell, Clerk of the Board of Trustees of the Turlock Union High School District; said check to be forfeited to the School District if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract.

Each bid must be enclosed in a sealed envelope which is endorsed "Proposal for 'Drapes and Stage Equipment,' 'Linoleum,' 'Electric Fixtures,' or 'Window Shades,'" and must be delivered to A. G. Crowell, Clerk of the Board of Trustees, Turlock, California, prior to the date and time set for the opening of bids.

Owner reserves the right to reject any or all bids.

A. G. CROWELL,
Clerk of the Board of Trustees, Turlock Union High School District.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on August 17, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Sonoma County, a reinforced concrete girder bridge, 30 feet wide, across Willow Brook about 3 miles north of Petaluma (IV-Son-1-C), consisting of one 34 foot and two 40 foot spans on concrete pile bents.

Yolo County, an undergrade crossing having a 30 foot roadway and a 5 foot sidewalk, under the Sacramento Northern Railroad near Sacramento (X-1).

QUANTITY SURVEYOR

Valuation Engineer

ARTHUR PRIDDLE

693 Mission Street, at Third St.

San Francisco, Calif.

Telephone Douglas 4-4-9-1

General Valuation Bureau

Architect's Preliminary Estimates

Vol-6-C), consisting of a 35 foot girder beam and concrete deck span on concrete abutments and wing walls, and the approaches to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS J. WARDENBURG,
N. T. EDWARDS,

California Highway Commission.

R. M. MORTON,

State Highway Engineer.

W. F. MILTON, Secretary.

Dated: July 20, 1925.

(July 24-31, Aug. 7-14)

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned at 2:30 P. M. on July 29, 1925, for constructing a portion of the state highway system in Washoe County, between Sparks and Vista, length 2.54 miles, work consisting of grading, construction of culverts, excavation of drainage ditches and removal of obstructions in Truckee River.

Plans may be secured in form of proposal, contract and specifications secured in the office of the undersigned; also may be examined in the county clerk's office at Reno; the Vegetation Office at Elko, Reno, and the Vegetation and the district office of the Bureau of Public Roads, Bay Building, San Francisco. For copy of each set of plans, undersigned requires deposit of Fifteen Dollars (\$15.00), which will be refunded upon return of plans in good condition within thirty (30) days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of five per cent (5%) of bid.

Each bidder must accompany his bid with certificate from a surety company duly authorized to do business in Nevada, stating that such surety company will provide said bidder with bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3 3 4 0

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

Building & Engineering News

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

Typewriters Rented

Lumber Situation Analyzed

(Special Correspondence)

Wilson Compton, secretary and
 manager of the National Lumber
 Manufacturers Association, in a state-
 ment to the Consolidated Press Asso-
 ciation upon the status of the lumber
 manufacturing industry and outlook
 for the next few months, said:

"Lumber sentiment in the East,
 South, and North is distinctly hopeful.
 I have just returned from a trip
 through these sections. There has been
 a noticeable rebound in both softwoods
 and hardwoods in the past three weeks.
 The volume of softwood consumption
 in the Atlantic Coast territory is tre-
 mendous, and outside of New York is
 greater than for last year. Building
 contracts awarded for the first five
 months are ten per cent ahead of last
 year and show greater construction
 activity in all sections East of the
 Rockies, except in the Northeastern
 States.

"Retail yards and industrial buyers
 are reported as almost universally de-
 manding immediate delivery. This
 manifestly means unusually small
 stocks at consuming points and com-
 plete dependence upon speedy and
 regular deliveries for sawmills. Extra
 dry weather throughout the East and
 South since January has given un-
 usual stimulus to log production, but
 this is not a continuing condition and
 its most conspicuous effect has been to
 cause some discontinuance of small
 mill operations in the South making
 so-called No. 2 Common and Better
 Dimensions and Boards on account of
 unprofitable prices.

"Eastern dealers report a recent in-
 crease in western transit cargoes,
 also somewhat greater ease in dis-
 posing of them. The rate of softwood
 production in the South, as a whole,

has declined during the past six weeks
 about 8 per cent of the total forest
 products. Rail shipments so far this
 year are exactly one per cent greater
 than for last year. The total car
 loadings amounted to one million cars
 last week. This is the largest week's
 loading this year and indicates great
 industrial and commercial activity
 everywhere.

"Fundamental conditions are just as
 sound as they were eight months ago.
 Speculative building is falling off
 somewhat, which is a good symptom.
 Construction costs generally are as
 low as any month during the past two
 years, 10 per cent higher than three
 years ago, and 20 per cent lower than
 five years ago, which is another evi-
 dence of increasing stability.

"Reports from three hundred credit
 men show the next six months general
 business prospects as follows:
 'Seventy-six per cent better, 20 per cent
 stationary, and 4 per cent poorer.'
 Four facts are outstanding in the lum-
 ber situation: first, lumber is being
 crowded onto the market too fast; sec-
 ond, too much green lumber is going
 on the building job; third, retailers and
 consumers do not have to and there-
 fore will not carry large stocks; fourth,
 consumption of building materials has
 passed its peak for this year.

"These facts point to self evident
 conclusions. The Department of Com-
 merce advises lumber export pros-
 pects for continuing moderate volume.
 I believe lumber manufacturers would
 benefit from a monthly nation-wide
 survey of lumber conditions and pros-
 pects, plans for which will be sub-
 mitted at the meeting of the National
 Board of Directors at Portland later
 this month."

Klamath Timber Holdings Sold

Negotiations are reported under way
 in Portland, Ore., for transfer of 500-
 000,000 feet of pine timber and other
 property on the Klamath division of
 the Southern Pacific railroad from L.
 B. Menefee to the Forset Lumber Com-
 pany of Louisiana for a consideration
 of \$1,000,000.

The Forset company is owned by
 R. B. White and associates of Kansas
 City. The company is represented in
 Portland by C. C. Shepherd, manager
 of its lumber operations.

The tract included in the deal be-
 longs to the United States govern-
 ment, and is under contract of sale
 to the Modoc Pine Company, organized

a few years ago by J. O. Goldthwaite.
 He afterward sold it to Menefee.
 Goldthwaite recently obtained an
 option for purchase of the property
 from Menefee.

In addition to the timber, forty miles
 of logging railroad, a mill site, planing
 mill, dry kilns and a quantity of log-
 ging equipment are included in the
 transfer.

The transfer of the mill property
 may be followed by immediate con-
 struction of a sawmill at Aspgrove.
 The L. B. Menefee Company had pre-
 pared plans for a two rig mill, but
 construction was delayed until the
 affairs of the Modoc concern could be
 straightened out.

DANDIE

Light Mixer

Dandie Light Mixer

7 cu. ft. mixed Concrete. Two or four cylinder gasoline engine. Power charging skip, or low charging hopper and platform. Rubber tired steel disc wheels or steel rimmed wheels.

Send back the coupon

VALUE
—Such as Never Before
Seen in the Light Mixer Field!

STILL within the price range for light mixers, this 7 ft. Dandie Model offers extraordinary values!

A heavy duty, four cylinder, radiator cooled gasoline engine, completely enclosed in a steel housing.

Completely enclosed transmission always running in an oil bath, and mounted on shaft revolving in roller bearings. Steel disc wheels with rubber tires or regular steel rimmed wheels. Beveled edge, chilled drum rollers, pinned to shaft which turns in big bearings! Koehring double gear drum drive!

In every bearing—every detail—you'll find the reliable Koehring construction the surest insurance of reliability and long, trouble-free service life!

Light Weight—just the balanced light weight to be hauled on its rubber tires behind your car or truck and to lose no time between job and job.

This Dandie Model has been tested and tried by *overwork* and abuse—and it's more than worthy of the Koehring name.

For high speed operation—solid, substantial construction and light weight portability—this Dandie has established new values and standards in the light mixer class.

S. F. LEADS IN FOREIGN TRADE

San Francisco's foreign trade is almost equal to that of all the other Pacific Coast ports combined. It is more than double that of its nearest competitor Seattle, and shows a larger growth than any other customs district in the West. Customs receipts for the fiscal year ending July 1, in San Francisco, were \$12,336,686.35, an advance of nearly a million and a third dollars over the previous twelve months. In fact, San Francisco's gain is greater than the combined growth of all the ports, as some of them show a loss. The net gain in customs revenues for all the Coast is \$1,316,258.50. The annual statement of John J. Deane, Comptroller of Customs, shows the following receipt of Pacific Coast customs districts:

District of	1924	1925
San Francisco	\$11,039,520.00	\$12,333,686.35
Washington	5,812,098.71	5,517,272.98
Los Angeles	4,537,444.42	4,596,048.51
Oregon	1,249,351.60	1,193,618.73
Utah & Nev.	52,183.91	56,496.83
Alaska	48,582.93	47,823.86
Hawaii	1,543,911.06	1,854,403.87
Total	\$24,283,092.63	\$25,599,351.13

URGES TESTS TO ELIMINATE INFERIOR MATERIALS

Criticism of the governmental system which does not provide for a testing engineer who would pass on all material used in city work, was voiced by George H. Lichthardt, state testing engineer, in his address before the Sacramento Scouts at their weekly luncheon meeting at the Hotel Sacramento.

Failure of the city to maintain such an engineer has probably resulted in building materials discarded or refused by the state because of low quality, being used in buildings or in street work, Lichthardt said.

The State of California maintains a system of close scientific testing and examination of all materials used, whereas municipalities, including Sacramento, the engineer said, do not observe such rigid rules.

Lichthardt also expressed doubt as to the quality of copper-covered steel pipes at the city filtration plant, and hazarded a guess that the cement used in the construction of the Memorial auditorium and the Junior college will not measure up to the quality of the cement used by the state in its building construction.

Too often, Lichthardt said, when a building is being erected materials are accepted simply because they are produced by prominent companies and not because they have passed a rigid test by the city.

"The state now tests all materials both before and after they are placed in the building structures," he said. "In testing paving or highway cement the state takes a cylinder test before the paving is laid and again takes a similar test after it has been installed.

"When a bin of cement is refused by the state it is not thrown away, but is probably sold for use in putting up buildings or installing pavements here and elsewhere, and it gets by because the municipalities do not have a sufficiently rigid system of testing, and does not see that materials meet a proper standard before they are accepted."

"The day of the testing engineer is coming," Lichthardt said. He cited the buildings at Santa Barbara ruined by the recent earthquake as showing the need of official testing of materials.

BANNER YEAR FOR CEMENT

Production of portland cement for the month of May, 1925, is the greatest on record, while shipments are the highest yet recorded for any May and have been exceeded in only three other months. Total production in May was 15,503,000 bbl. as compared with 13,777,000 bbl. for May, 1924, and 13,807,000 bbl. in April, 1925. Thus there was an increase in production for the month of 1,696,000 bbl. over April and 1,726,000 bbl. over May, 1924. Shipments for the month totaled 16,735,000 bbl. as compared with 14,394,000 bbl. for April and 14,551,000 bbl. for May, 1924, thus showing an increase of 2,341,000 bbl. over April and 2,184,000 bbl. over May, 1924.

LUMBER TRADE REASSURED

California lumber exporters who have been worrying recently over alleged competition from Siberia need have no fear, according to the Bureau of Foreign and Domestic Commerce. A survey of the situation made by Axel H. Oxholm, chief of the Department of Commerce's lumber division, telegraphed to San Francisco from Washington, stating that the Siberian competition has been vastly overrated.

California ships a great deal of lumber to Japan. In May, exports fell 40 per cent. Reports stated that Siberian lumber was replacing the American variety. Pacific Coast exporters, among them the Douglas Fir Association of Lumbermen, took the matter up with Oxholm when he was in San Francisco a few weeks ago on his way back to Washington from the foreign trade convention in Seattle.

He submits figures showing that the United States furnishes Japan with 90 per cent of its import lumber, Canada furnishes 5 per cent and Siberia 3 per cent Oxholm's dispatch says:

"The drop in our exports during May was not caused by Siberian competition, as alleged, but was wholly due to the unsatisfactory financial condition in Japan. The report that 100 large sawmills had been recently established in Siberia by Japanese capitalists lacks foundation. Existing conditions in Japan would not warrant the expenditure of millions of dollars on such enterprises in Siberia, as severe losses were sustained only a few years ago by leading Japanese lumber men operating Siberian concessions. Siberian lumber is not of sufficient high grade to compete with the American product in Japanese markets. Japanese work their own forests on the basis of perpetual yield, and it is not economically possible for them to increase their present lumber production under the plan of cutting."

ARCHITECTURAL PRIZE AWARD

The medal of the "Societe des Architectes Diplomes par le Gouvernement Francais," the prize most coveted by the great architectural schools of the country, has been won by the Architectural Department of the Catholic University of America, Prof. Frederick Vernon Murphy, head of the department, has just been informed of the honor.

More than thirty leading universities of the country were entered in the competition, including Harvard, Princeton, Yale, Massachusetts Institute of Technology, Cornell, Columbia, University of Pennsylvania, Armour Institute of Technology, and many other smaller institutions. Contestants were from all part of the country, as far west as the Pacific Coast and as far south as Florida.

BAR PATENTED PAVEMENTS

The San Mateo city trustees when asking bids on future street improvements will specify plain concrete or asphalt concrete. Patented types of pavement are barred.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Los Angeles' building total for July, 1925, will probably equal if it does not exceed that for the same month last year unless there should be an unexpected slowing up of operations during the last ten days of the month. Up to and including the 21st the number of permits issued was 2400 with an estimated valuation of \$8,375,647. For the corresponding period in June the number of permits was 2642 with an estimated valuation of \$12,154,535, while for the first 21 days of July, 1924, the number of permits was 2352 and the estimated valuation was \$7,729,161. For the current year up to and including July 21st Los Angeles' building total was \$91,551,101 as compared with \$86,557,809 for the corresponding period last year.

At a recent meeting of the Executive Committee of the Highway Research Board of the National Research Council it was decided to hold the Fifth Annual Meeting of the Board at Washington, D. C., on December 3 and 4, 1925. Progress reports received from the chairmen of the Research Committees showed that they are conducting important studies on almost every phase of highway development, including finance, design, construction and maintenance, thus assuring a successful annual meeting. The program for the Fifth Annual Meeting is now being prepared and will soon be announced.

A \$1,500,000 water bond election will be held in the Marin Municipal Water District, Marin County, October 29. Should the issue carry the proceeds of the sale of the bonds will finance the construction of additional reservoirs, repair of the present system and establishment of new pipe lines that will provide additional water supply for the entire district. The directors say an additional supply is imperative.

More common laborers are leaving than are coming into the United States since the recent immigration law became operative. There were only 27,908 common laborers admitted from July, 1924, to April, 1925, as against 27,886 during the same period a year previous, but 44,750 left the country during the same time, making an actual deficit of 16,842.

Roy O. Long Co., Berkeley realtors, represent interests contemplating the erection of a \$1,500,000 hotel and office building on portions of property owned by the Southern Pacific Company at University and Shattuck avenues, Berkeley. This will be one of the largest building projects undertaken in Berkeley in recent years.

Construction of steel frame work will be revolutionized if an experiment being carried out by the Austin Co. on a job now being built by them for the Pittsburgh Transformer Co. is a success. On a part of the crane rail, electric welding is being done instead of the usual riveting of members.

June sales of fabricated structural steel based on reports from the principal makers totalled 216,759 tons against 200,100 in the preceding week, and 161,182 in the same month, of last year.

Construction of the proposed \$1,000,000 bridge over the American River, near the mouth of the Sacramento River, was unofficially approved at a recent meeting in Sacramento of representatives of civic organizations, city and county officials and representatives of the Southern Pacific Railroad. A bond issue is proposed to finance the project which will be 200 feet long, 30 feet wide with a causeway approach at north end of span 1800 feet long. The approach will be constructed on concrete piles, according to preliminary plans submitted by Chas. Deterding Jr., Sacramento county engineer.

Conditions in the steamfitting trade are more stable now than at any time since the War states the Heating & Piping Contractors National Association. The organization has just completed a survey of conditions in 154 cities. In only 11 cases were wages of journeymen changed this year, 9 cities reporting increases and 2 cities decreases. The wages of helpers show more fluctuations, 19 cities reporting changes, 11 having increased the helpers wage and 8 having affected a decrease. The medium wage for journeymen is \$1.12½ per hour.

Plans to raise \$100,000,000 through 100,000 subscriptions of \$1000 each to "create the most magnificent and comprehensive park system in Los Angeles county of any place in the world" were laid before the Hollywood Chamber of Commerce by James B. Bristol, representing the California State Parks Association. The plan will be considered by the directors of the Hollywood Chamber of Commerce and if found feasible taken up throughout the county with other chambers of commerce.

Net income of the Bethlehem Steel Corporation for the second quarter of 1925 amounted to \$2,422,151, compared with \$4,071,516 in the first quarter of the year and \$1,278,277 in the corresponding period of 1924. The earnings were equivalent to \$1.31 a share on the common stock, contrasted with \$1.66 in the preceding quarter and 11¢ a share in the second quarter last year.

Construction of a turbine generating plant to cost \$1,250,000 is expected to begin at The Geysers within a month or two, according to officials of The Geysers Development Company at Santa Rosa. Power developed at the Geysers will be carried by direct wire to Santa Rosa, where it will be delivered to big existing power corporations for resale.

William H. Black, county surveyor of San Luis Obispo County, is seriously ill at the Government Hospital at Palo Alto, as the result of several exposures to gas, as well as shell shock, during the World War. Slight hopes are held out for his recovery.

Peter Anderson, general contractor of Roseville, Calif., ended his life with a shot gun, July 21. Ill health is believed to have been the motive. His widow and several brothers and sisters survive.

ALONG THE LINE

Los Angeles harbor commission appointed under the new charter organized with Walter B. Allen as president and Frank Melaine as vice-president. Charles Spear, who has been president of the state board of harbor commissioners at San Francisco, was appointed manager of the board at a salary of \$12,000 a year. R. G. Starr was reappointed secretary at a salary of \$350 a month, and Bert Edwards was appointed controller at a salary of \$400 a month. Port Traffic Manager S. S. Sandberg and the engineering, legal and other department heads will be continued in their respective positions.

Word has been received at Oroville from Washington that D. N. Bebb, representing the Federal Power Commission, will make an inspection of the Feather River power projects early in August. The inspection will include not only the plants now erected, but proposed plants for which federal power permits have been asked. Bebb is one of the chief engineers of the Federal Power Commission, and it is stated, plans to make a study of the hydro-electric situation in California generally.

A. E. Patterson, for ten years an engineer with the Southern Sierra Power Company, and a graduate of the University of California, has been appointed by the Berkeley city council to supervise the filling of sewer trenches and resurfacing of streets in Berkeley.

The city trustees of Pacific Grove, Monterey County, desire to receive plans, specifications and estimates of cost for additions to the Public Library Building. Further information obtainable from C. S. Olmsted at Pacific Grove.

Judgment of \$2000 on two unsecured promissory notes with interest totaling \$805 was given by Superior Judge H. V. Alvarado, of Contra Costa County, to the First National Bank of Walnut Creek in a suit against M. I. Diggs, Oakland architect.

J. D. Galloway, consulting engineer of San Francisco, and D. C. Henny, consulting engineer of Portland, Ore., have been retained by Los Angeles county supervisors to determine the best location for the proposed flood control dam in San Gabriel canyon.

Mrs. Florence A. Hammond, wife of Andrew B. Hammond, pioneer west coast lumberman, died in San Francisco, July 26. Mrs. Hammond had been a resident of San Francisco for twenty years, and has been active in social circles and charitable work.

Architect Willis C. Lowe, formerly of the Monadnock Bldg., San Francisco, is now located at the Builders' Exchange, 354 Hobart St., Oakland.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

FIVE-DAY WEEK VOTED

Almost unanimous approval of the five-day week for union painters in San Francisco was voted by Painters' Union Local No. 1158 at a special meeting held for that purpose, it is announced by T. J. O'Connor, secretary.

"If our vote is any indication of the general attitude of painters in the bay section on the question, the proposal will be approved by each of the ten locals comprising the District Council of Painters," O'Connor said. "The painters favor the five-day week for two main reasons. It gives more men an opportunity to work, and is better for their health. Another advantage is that the Saturday half day is cut out. Of course, there will be no slowing up of painting jobs."

BRICKLAYERS INCREASE

Official figures recently given out by the B. M. and P. I. U. show that the number of journeymen and apprentices in this trade is rapidly increasing. This is undoubtedly largely the result of the concerted effort on the part of contractors during the past few years along the lines of adequate apprentice training. Following are the figures: July 1921, 83,634 journeymen; 1437 apprentices; July, 1922, 85,000 journeymen, 3623 apprentices; July, 1923, 97,300 journeymen, 7263 apprentices; July, 1924, 108,484 journeymen, 10,656 apprentices; June, 1925, 111,304 journeymen, 11,516 apprentices.

OAKLAND PLUMBERS ELECT

W. H. Picard has been elected president of the Master Plumbers' Association of Oakland, Alameda and Berkeley. Other officers elected are: Carl Doell, vice-president; J. P. Morse, secretary; A. H. McKown, (re-elected) treasurer; F. H. Blake, sergeant-at-arms.

BUILDERS ELECT

Ed. Simpson of Pacific Grove, has been elected president of the Monterey County Builders' Association. W. H. McConnell of Monterey has been re-elected secretary of the organization. Directors chosen are: C. W. Allair, L. E. Gottfried, H. A. Prince, H. W. McConnell and Ed. Simpson.

NAMED VICE-PRESIDENT

L. J. Kruse, retiring head of the Master Plumbers' Association of Oakland, Alameda and Berkeley, has been elected vice-president of the California Sanitation and Development League. Kruse has been president of the East Bay organization for three years.

"Do not worry; eat three square meals a day; say your prayers; be courteous to your creditors; keep your digestion good; exercise; go slow and easy. Maybe there are other things that your special case requires to make you happy, but, my friend, these I reckon will give you a good lift."—Abraham Lincoln.

Steel Construction Institute Outlines Progress and Aims

At a meeting of the American Institute of Steel Construction held in Boston on the evening of June 24, members of the building professions and others interested in the use of structural steel heard what the Institute has already accomplished, and what it hopes to accomplish as a result of its campaign to benefit both the fabricator and the public by securing the general adoption of its new standard specification of unit stress, and by the further introduction of construction economies together with better business methods among the fabricators of structural steel.

Preceding the meeting in the evening there was an afternoon session which was attended by fifty-five fabricators of the New England district. At this session Charles F. Abbott, Executive Director of the Institute, after outlining in detail what has been accomplished in the first year and a half of the campaign, stated that the application of the Institute's Standard Code of Practice has proved so successful that it is being widely copied by other industries. He also stressed the importance of better selling methods in the industry, saying that structural steel should be sold on the basis of so much per pound or ton.

The Honorable Frederic W. Cook, Secretary of State for Massachusetts, acted as toast master at the evening meeting at which two hundred architects, engineers, and municipal officials from all parts of New England were present. Lee H. Miller, Chief Engineer of the Institute, was the principal speaker. Other speakers were Dwight L. Hoopingarner, Director of the American Construction Council and the New York Building Congress; Charles F. Abbott, the Executive Director of the Institute; and Building Commissioner J. H. Mahoney, of Boston, who spoke briefly of the successful application of the Institute's specifications as incorporated in the City of Boston's building code.

The subject of Mr. Miller's address was the new standard specification of 18,000 pounds per square inch which was developed by a committee of architects and engineers headed by Professor George F. Swain, of Harvard University. "Since about 1885," said

Mr. Miller, "when structural steel was first used as a building material, a working stress of 16,000 pounds has been prevalent in building construction. This figure has no authoritative basis. It was evolved from the rule of thumb methods, proportioned by safety factors used on ultimate strength; following the custom developed in the application of rational design to masonry and timber structures.

"Open hearth steel with its more uniform characteristics, has almost entirely supplanted the Bessemer steel used in structural shapes in the late 80's and early 90's. The quality of steel has steadily improved, but in many sections of the country the unit stress of 16,000 pounds is still incorporated in the building codes. However, due to the educational work of the Institute, some forty large cities throughout the United States have now revised their codes to permit the use of the 18,000 pound unit stress.

"The successful operation of the codes using the new unit stress has resulted in great economies for the individuals, builders, and taxpayers of the cities where the new specification has been adopted. The saving made possible by the use of the 18,000 pound unit stress is estimated at from ten to twelve per cent of the cost of steel entering into the structure. The general adoption of the new unit stress will mean an annual saving of not less than \$30,000,000 to the country at large."

With its new standard unit stress steadily gaining ground, and with the code of Standard Practice proving its value, the Institute is ready to enter upon its comprehensive program for the years immediately ahead. A Standard Manual to facilitate the work of the designer and the draftsman in the execution of the contract after it has been secured is now in the course of preparation. A Bureau of Technical Research is being formed. The campaign to bring out the advantages of structural steel and to secure the wider adoption of the 18,000 pound unit stress is being vigorously pressed. Finally, work with students at universities and technical schools is being planned for in the near future.

Building Chiefs' Conference is Set for Seattle, Sept. 28-30

The second annual Pacific Coast Building Officials conference is to be held in Seattle September 28th, 29th and 30th.

Building officials from the principal cities of Arizona, California, Oregon and Washington are expected to be present and previous to the September conference there invitations will be set to officials of Idaho and other Western states.

One of the principal objects of the annual conferences of those who draft the construction ordinances, pass on plans for new work and inspect that

work while in progress is to ultimately agree on a uniform building code for Western cities.

Robt. Proctor, city superintendent of buildings at Seattle, has begun the preparation of a program for the conference and states that several constructive papers will be read. He is at present also arranging the entertainment program which will include a trip to Mount Rainier or to Victoria. While details have not been worked out as yet it is considered likely that the conference sessions will be held at the Olympic Hotel.

"FALLEN BUILDING" AS REGARDS INSURANCE POLICIES

Effective August 1, 1925, a new ruling affecting fire insurance policies, where these are involved in bond issues, is announced by Edwin M. Dougherty, State Corporation Commissioner. The ruling was made for the protection of bond investors and relates to the so-called "fallen building" clause in policies. On and after August 1, Commissioner Dougherty announced, the department will insist that this clause be eliminated from insurance policies covering buildings upon which bond issues are floated in California.

"Experience shows that in cases of explosions, earthquakes and similar occurrences, fire frequently attacks buildings after these buildings or substantial portions of them have been raised by the shock," said the Commissioner. "The so-called 'fallen building' clause in fire insurance policies has the effect of terminating the insurance protection the moment a wall or substantial portion of the building falls and fire follows. That means, in the event of a disaster large or small, if a wall falls and a fire results the insurance gives no protection."

"We believe the investing public who place their money in bonds are entitled to protection on account of fire hazards which so frequently follow in the wake of a collapse of buildings from any cause. It is for this reason that the rule was made."

The "fallen building" clause, which is to be found in the general laws of California, reads as follows:

"Unless otherwise provided by agreement endorsed hereon or added hereto, if a building or any material part thereof falls, except as the result of fire, all insurance by this policy on such building or its contents shall immediately cease."

CONDITIONS IN BUILDING TRADES THROUGHOUT U. S.

Outside of the few cities where there are strikes, because of the controversy between the bricklayers and plasterers, conditions are fairly quiet at this time. The recent threat of the Chicago Building Trades Council to enforce unionization of the industry in that city has not resulted in any action as yet and the only jobs tied up are those affected by the dispute between the two trowel trades.

An attempt to call a general strike on \$25,000,000 worth of work in Cleveland to force contractors to discharge common laborers affiliated with local No. 66 in favor of members of local No. 10 was blocked by the Building Trades Employers Association on June 24, when a temporary restraining order was issued in the Common Pleas Court.

The hod carriers strike still continues in Pittsburgh with the contractors standing firm on their offer of \$1.06½ per hour and the union holding out for \$1.12½. A strike of sheet metal workers in Kansas City, which lasted two weeks, ended recently when the men voted to return to work at the old rate of \$1.12½. The strike was called when employers refused to accede to a demand for an increase of 12½ cents an hour.

A general strike of all the building trades in Boston scheduled for July 1st to assist the common laborers in getting an increase was called off. This action was taken by representatives of the United Building Trades Council after a conference with conciliators of the United States Department of Labor.

For and Against The Road Gas Tax

Editorial in Chicago Journal of Commerce

Gasoline tax legislation is dead for this session of the Illinois legislature. It will be revived at the next session. Before that time comes, the entire question of gasoline taxation should receive thorough discussion.

In the first place, the taxation of gasoline is in line with a tendency away from the old American habit of taxing tangible assets. Such taxation becomes the practice at a time when virtually all assets that men had were visible. A man could not hide his land nor his house nor his wagons nor his horse.

But in modern days, so much property is practically invisible that the old method of taxing assets seems no longer fair. There is a strong tendency now to place taxation on production, income and expenditures.

Taxes on production should be discouraged; and the reason is that they discourage production. If a thing is worth making, we should avoid using the tax weapon against the making of it.

Taxes on income are less objectionable. The chief argument against them is their unfairness in practice. Nearly all farmers escape paying income taxes.

Taxation of expenditures is the best of the forms of taxation under consideration here. Such taxation promotes thrift. The only thing that is penalized is the consumption of products. But it is at once evident that this form of taxation may be terribly misused. When expenditures for one product or a few products are taxed, and expenditures for all other products escapes taxation, the injustice is obvious. Or when the expenditure-tax on one product is piled far higher than is the tax on other products, the injustice is again obvious.

It is because of such injustice that there has been so much protest in Illinois against proposals for a gasoline tax. Although the theory of such a tax is in accord with the principles of the expenditure-tax, the practice

has been extremely abusive of the oil industry and of the motoring public.

For one thing, the taxation has often been enormously high. There have been instances in which the combined state and city taxes on gasoline have amounted to 6 ct. a gallon, which is as much as the entire price of gasoline at the refinery has been at some times during which these taxes have been imposed.

For another thing, the money derived from gasoline taxation has often not been used for roads as it should have been, but has gone into a state's general funds or has been used for school purposes.

Again, the oil industry has usually been made to install costly systems for collecting the tax. And not content with this, companies have been required to supply bonds that the tax would be paid; and the companies have had to pay the cost of the bonds.

Moreover, the politicians have used the gasoline tax as an excuse for forming new payroll brigades. Inspectors, supervisors, and spies of various sorts have been employed to supervise the collection and payment of the taxes. It has been to the interest of this politically powerful brigade to agitate for increases in gasoline taxes so that its own salaries might be raised.

The proposed gasoline tax in Illinois has been opposed because it promised unfairness in a number of respects. The leading measure, the Cuthbertson bill, was sponsored by the Illinois Agricultural Association. The aim was to impose a 2 ct. tax on each gallon of gasoline, almost entirely for the construction of roads in obscure rural communities. Not only the gasoline industry, but motorists living in cities and towns, have seen in this bill an indication that the gasoline tax would later be increased for the benefit of rural communities having a disproportionate power in a legislature in which Illinois citizens no longer have equal representation.

Slate Sales in 1924

Final returns on slate produced in the United States in 1924 as submitted by the producers show sales of approximately 728,000 short tons, valued at \$11,776,016, it is announced by the Bureau of Mines, Department of Commerce. This represents an increase of about 3 per cent in quantity but a decrease of about 2½ per cent in value.

The slate industry falls into three groups, roofing slate, milled stock, and crushed slate for granules and "flour." The first two groups are closely connected and a strike in some of the quarries in the Pennsylvania district in 1924 materially decreased the sales of both these classes of products. Sales of crushed slate granules, on the other hand, continued to increase as they have done since the beginning of trade in that product.

Sales of slate for roofing amounted to 469,392 square, valued at \$4,626,611, a decrease of 7½ per cent in quantity and an increase of nearly 1 per cent in value. The average value a square was \$9.63 in 1923 and \$9.86 in 1924.

Sales of mill stock, which includes

slate for electrical, and structural and sanitary uses, for vaults and cover blackboards, bulletin boards, billiard table tops, and school slates, amounted to 10,011,180 square feet, valued at \$3,922,828, a decrease of nearly 10 per cent in quantity and 6 per cent in value. All these milled products decreased in quantity in 1924, except the sold for vaults and covers. The decreased sales of electrical slate were said to be due, aside from the strike in part to substitution of manufacture material and in part to the use of stone imported for this purpose. Nevertheless the shortage caused by the strike was responsible for increase in the imports of foreign stone.

Sales of slate roofing granules for the surfacing of prepared roofing, and of slate "flour" used as a filler, amounted to 512,810 short tons, valued at \$178,454, an increase of 11 per cent in quantity and a decrease of less than 1 per cent in value.

Sales of slate were also reported for flagstones and stepping stones, as small quantities for tombstones, and other uses.

TRADE NOTES

"With the formation of a \$30,000 corporation, the planing mill of L. L. Howard at McKinley and Fresno Avenues, Fresno, has been taken over for the manufacture of adjustable door and window jambs, perfected by Arthur Young, a carpenter in the Fresno Fire Department. According to the inventor a carpenter can hang sixteen of the new adjustable doors a day instead of eight as at present. The plant of the new concern is expected to be in full operation by August 1st.

Plans for the construction of two new lumber alleys, with storage for from 1,000,000 to 1,500,000 feet of lumber, are announced by J. M. Bedford, manager of the Wheeler-Olmstead mill at Klamath Falls, Ore. Nearly a mile of additional trackage will be required for the new alleys, in the estimation of Superintendent Horbelt of the mill. The alleys will run parallel to those already established, between the present alleys and the mill, each with a length of approximately 890 feet.

The Pacific Portland Cement Company, through H. M. Power, superintendent of the Redwood City plant, has installed an exhibit in the Redwood City Chamber of Commerce rooms showing the various stages in the manufacture of Portland cement from the raw product (oyster shells) dredged in the bay off Redwood harbor to the finished material. Photographs are considered to the display.

Johnson and Christie have opened a sheet metal contracting business at 492 Twenty-third Street, Oakland. T. E. Johnson was formerly connected with that craft in the East Bay District and E. D. Christie was formerly business representative of the Sheet Metal Workers' Union. The firm is equipped to handle all type of sheet metal work.

Plant of Califelt Insulation Manufacturing Company in Los Angeles suffered fire loss of \$100,000 on July 25.

HUGE LUMBER DEAL CLOSED

Purchase of the Pope and Talbot Lumber interests in the state of Washington by the Charles R. McCormick Lumber Company, a \$20,000,000 deal, is announced.

The purchase includes about 80,000 acres of timber land, together with the sawmill plants of the Puget Mill Co., one at Port Gamble, the other at Port Ludlow. Cargo shipping facilities, rail connections with transcontinental lines, hotels and other property go into the deal.

A new sawmill plant at Port Gamble involving expenditure of approximately a million and a half dollars, will result from the deal, the McCormick Company announcement said.

The McCormick Company recently consolidated and absorbed McCormick interests at St. Helens, Ore., Los Angeles, Riverside, San Bernardino and San Francisco, bringing eight companies into one.

Estimated annual production under the purchase just made will be 250,000-300 board feet of lumber.

The Pope and Talbot interests, which date back to 1853 with establishment of a Port Gamble sawmill by Captain W. C. Talbot, become stockholders in the McCormick Company through the transaction.

Spotting the Day Labor Job From the Spectator's View Point

(Reprint from Engineering and Contracting)

Whenever you see a construction gang at work, watch it for a few minutes, noting particularly the degree of celerity with which the men move. You will not have studied many jobs before you can distinguish the average day-labor job from the average contract job at sight. No stop watch is needed to tell you that men on the average day-labor job are moving much slower than on the average contract job.

Then, when you can readily classify construction job efficiency by the relative speed of the workers, habituate yourself to counting the number of men performing a given kind of work, such as wheeling materials to a concrete mixer. You will soon be able to "spot" inefficiency by the excessive number of workers on job.

Finally, study the movements of the foremen. When a foreman acts as if he had been up late the night before, and is still dreaming, set it down that his dreams are not of increased salary as a result of getting his gang to work harder, for he is probably working for the public. The public, you know, is everybody in general, and yet nobody in particular. The public never walks up to a foreman and says: "Bill, you made a great record last month. You will find an extra ten spot in your pay envelope hereafter—and there's more where these tens come from."

Anyone who has ever been paid a salary by the public will bear the editor out in the statement that the public is a good paymaster but a very unappreciative employer. Work your head off. Get your gang to do like-

wise, and what is your reward? The enmity of the gang and indifference of your boss—the public. So why worry? Your pay will come regularly, and be as regularly unchanging whether you work hard or you loaf, for the public.

It is often argued that the public can as readily hire good foremen as does a contractor. Perhaps it might, but is usually doesn't. To the public all foremen look pretty much alike; to a contractor, no two foremen are alike, and it is his constant business to eliminate the poorer ones, and to retain the better ones by paying them in proportion to their performance.

One of the fundamental laws of management is to make "payment proportionate to performance." If the public has ever heard of this law it shows no evidence of belief in it. Witness the threatened strike of 600 engineers in the city departments of Chicago, because the public has forgotten that there was a war and a doubling of living expenses, and has made no corresponding increase in engineering salaries. The 3000 municipally employed engineers in New York City protest that they are as badly off as those in Chicago.

Probably the Chicago and New York public think that their city engineers are the men who run the engines and boilers. Yet there are some city engineers who still argue that the public can "save the contractors' profits" by doing all construction by day labor. When has Ignorance ever saved anything in competition with Knowledge?

Production of Clay in 1924

The output of clay mined and sold as clay in the United States in 1924 amounted to 3,676,720 short tons, valued at \$11,478,756, or \$3.12 a ton, according to Jefferson Middleton of the Bureau of Mines, Department of Commerce. These figures show an increase of about 7 per cent in quantity and 3 per cent in value, as compared with those of 1923. They represent only clay sold as clay, or mined under royalty, and do not include the much greater quantity of clay that was burned into clay products by the producers themselves from their own property. The data were collected by the United States Geological Survey in co-operation with State geological surveys of Alabama, Florida, Georgia, Illinois, Iowa, Maryland, Michigan, Missouri, New Jersey, New York, North Carolina, Virginia, Washington, and Wisconsin before the transfer of the Mineral Resources Division of the Geological Survey to the Bureau of Mines.

The output of kaolin, the clay that is used in making high-grade pottery and porcelain as well as paper, oilcloth, and other products and is generally considered the highest grade of clay, amounted to 326,602 tons, valued at \$2,923,965, a decrease of 3 per cent in quantity, as compared with 1923, with practically the same value as for

1923. The clay of largest production and value is fire clay. The output of fire clay was the largest ever recorded—2,429,320 tons—and was 6 per cent greater than that of 1923 and 3 per cent greater than that of 1917, the year of largest output previous to 1924. The value of the fire clay output of 1924 was \$6,708,283, an increase of 2 per cent as compared with 1923, but a decrease of 5 per cent as compared with 1920, the year of greatest value of fire clay. The output of clay of every kind decreased in quantity and value in 1924 except fire clay and miscellaneous clay, which consists largely of clay used for heavy clay products such as building and drainage materials.

The imports of clay increased in quantity and value in 1924, as compared with 1923, and the exports decreased in quantity but increased in value. The imports of clay amounted to 444,100 short tons, valued at \$3,976,040, an increase of 13 per cent in quantity and 8 per cent in value. Exports of clay in 1924 amounted to 72,755 tons, valued at \$732,716. This was a decrease of 14 per cent in quantity and an increase of 16 per cent in value, as compared with 1923. Kaolin, or china clay, constituted 80 per cent of the total imports in 1924. Fire clay, the principal clay exported, amounted to 57 per cent of the total.

BEVERLY HILLS, Los Angeles Cal.
Cal.—Architect W. Asa Hudson, 141 E. Burton Way, Beverly Hills, is completing plans and will take bids soon for 3-story apartment hotel with 28 rooms in Beverly Hills for H. C. Brick and 150x150 ft. structural steel, brick walls, stucco facing, staff work, tile and composition roof, hardwood floors, pine trim, tile baths and drainboards, built-in ice boxes, marble work, radiators, automatic storage water heater, wall beds.

LOS ANGELES, Cal.—Arch. S. Chas. Lee, 329 Douglas Bldg., is preparing working plans for 4-story class C store apt. and hotel bldg. on s side of 8th St. bet. Fedora St. and Kenmore Ave., for Obchdorff Bros; 6 stores, lobby, and 100 rms., 135x100 ft., brick walls, pressed brick and terra cotta facing, plate glass, cop. store fronts, marble work, ornam. iron, fire escapes, struc. steel, comp. fr., pine trim, tile baths and sinks, steam hg., wall beds, elevators, hwall, pine and cem. flrs., built-in refriger.; \$200,000.

LOS ANGELES, Cal.—Rudolph Meier, 526 Title Insurance Bldg., has prepared preliminary plans for Class A apartment building at the corner of Sunset and Hollywood, for H. T. Charles; 150x160 feet, 102 single apartments with underground quarters for 102 automobiles; \$227,500.

BONDS

HOLLISTER, San Benito Co., Cal.—Until Aug. 10, bids will be received by supervisors for purchase of \$5000 bond issue of Olympia School District; proceeds of sale to finance school improvements.

SAN JOSE, Santa Clara Co., Cal.—Election will be held Aug. 12 in Hester School District to vote direct tax of \$6000 to finance sidewalk, grading and paving improvements. Trustees of district are: Paul Rudolph, G. A. Bean and J. H. Rainwater.

BAKERSFIELD, Kern Co., Cal.—Election will be held Aug. 14 in Olig School District to vote direct tax of \$3000 to finance school improvements. Trustees of district are: S. H. McNeill, A. D. Burton, G. C. Fleming.

VISALIA, Tulare Co., Cal.—Supervisors sell \$12,000 bond issue of Packwood School District; proceeds of sale to finance erection of 2-classrm brick school.

YUBA CITY, Sutter Co., Cal.—Until Aug. 4, bids will be received by supervisors for purchase of \$3000 bond issue of Wilson School District; proceeds of sale to finance school improvement.

AUBURN, Placer Co., Cal.—Election will be held July 31 in Eureka Union Elementary School District to vote bonds of \$15,000 to finance school improvements. Trustees of district are: Wm. Rodgers, Vital Butler, W. E. Purdy, F. C. Croxen and J. F. Simmons.

TRANQUILLITY, Fresno Co., Cal.—Tranquillity School District votes bonds of \$12,000 to finance 2-classroom addition to present school.

SAUSALITO, Marin Co., Cal.—Election will be held Aug. 22 in Sausalito School District to vote bonds of \$25,000 to finance purchase of additional lands on which it is proposed to erect new school. Trustees of district are: S. G. Ratto, Chas. W. Ellis and Fred Ferry.

HUNTINGTON BEACH, Orange Co., Cal.—Huntington Beach high school will vote on a \$100,000 bond issue Aug. 15th, to be used to erect bldg. at high school site. There is at present about \$200,000 available. The proposed bldg. will have an auditorium to seat 1500, academic depts., domestic science and manual arts depts., cost about \$500,000. Allison & Allison, 1405 Hibernian Bldg., Los Angeles, archts.

BAKERSFIELD, Kern Co., Cal.—Supervisors sell \$6500 bond issue of Vineland School District; proceeds of sale to finance school improvements.

CHURCHES

Contract Awarded.

CHURCH—San Joaquin Co., Cal. Lincoln Manor near Eleventh St. Frame and stucco church building. Owner—Presbyterian Church of Tracy, Rev. G. Sydney Barber, Pastor, Tracy. Architect—R. S. Tuttle, 363 17th St., Oakland. Contractor—Samuel Elyre, Tracy. Other bids were: Allen Cherhart, Stockton, \$23,344; H. W. Reuben, Modesto, \$20,660. Bids do not include heating.

PRATT'S CONCRETE MIX

*Clarence
of Sand
Pratt*

BOB SMITH is dead.

SO THEY say.

BOB WAS general manager.

OF THE Contra Costa Building Material Co.

OF BERKELEY, California.

SANDY PRATT has known Bob.

FOR ALMOST twenty years.

AND DURING that entire period.

SANDY CAN'T recall.

A SINGLE business transaction.

BETWEEN BOB and Sandy.

THAT SANDY could criticize Bob.

IN ANY way.

PERHAPS THAT is more.

THAN SANDY'S friends.

WOULD SAY about Sandy.

ON TUESDAY last.

SANDY SAT.

AMONG THE wonderful flowers.

TOO MANY to count.

AT BOB'S funeral service.

IN BERKELEY.

SANDY WAS impressed.

BY THE presence.

OF SO many men.

FROM WORKMEN to business men.

BUT WHAT impressed.

SANDY THE most.

WAS THE presence.

OF ALL of Bob's competitors.

AND IF Sandy Pratt.

CAN SO live.

AND CONDUCT his business.

SO THAT when.

SANDY JOINS Bob.

THAT SANDY'S competitors.

WILL ATTEND Sandy's funeral.

AND MAYBE bring a flower.

THEN SANDY will not.

HAVE LIVED in vain.

"I THANK you."

Official Proposals

NOTICE TO CONTRACTORS

(Oakland—78th Avenue School)

Office of the Secretary of the Board of Education of the City of Oakland.

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County, hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 11th day of August, 1925, at 9:45 o'clock A. M., at which time said bids will be opened for the erection and completion of the 78th Avenue School Building, to be erected on the southwest corner of Ney and Ritchie streets. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, Room 415, 513 16th Street, Oakland, Calif.

On deposit of Twenty-five (\$25) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent of Buildings at his office herebefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of the Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000) Dollars, but for all bids of less than Fifty Thousand (\$50,000) Dollars, said check shall be for at least ten (10%) per cent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 11th day of August, 1925, at 9:45 A. M., in the Board Room, 211 Second Floor of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMOND,
Secretary of the Board of Education of
Oakland, California.

STATE OF CALIFORNIA
CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on August 24, 1925, at which time they will be publicly opened and read for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Sacramento County, between American River and Globe Iron Works, (JII-Sac-3-B), about four-tenths (0.4) mile in length; to be graded and paved with Portland cement concrete.

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

San Mateo County, between Northerly Boundary and Kings Mountain Road (IV-S.M-55-A&C), construction of about 10,000 lineal feet of guard rail.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said offices and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willets, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank forms of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. ROY,
JOHN E. EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON.

W. F. MILSON, Secretary.

Dated: July 27, 1925.
(July 31; Aug. 7-14-21)

NOTICE TO BIDDERS

(Pipe—City of Modesto)

Notice is hereby given that sealed bids or proposals will be received by the City Council of the City of Modesto at the office of the City Clerk, at 717 Tenth Street, not later than 7:30 o'clock

P. M., on Wednesday, the 12th day of August, 1925, for the following material:

2000 feet of eight (8) inch, Class "B" Cast Iron Pipe;
2000 feet of six (6) inch, Class "B" Cast Iron Pipe;
2200 feet of four (4) inch Class "B" Cast Iron Pipe.

All proposals or bids shall be accompanied by a certified check or Bidding Bond payable to the Mayor of said City, which check or bond shall be an amount not less than ten (10) per cent of the total bid. Bidders must state time of delivery.

The City Council reserves the right to reject any or all proposals or bids. By order of the City Council of the City of Modesto, County of Stanislaus, State of California.

H. E. GRAGG,
City Clerk.

NOTICE TO BIDDERS

(Oakdale and South Joaquin Irrigation Districts)

Notice is hereby given that sealed proposals will be received at the office of the Oakdale Irrigation District in Oakdale, California, until two o'clock P. M., on Monday, the 17th day of August, 1925, for the purchase of the following equipment to be used on the Melones Storage Project.

One locomotive, may be new or used if in first class condition, standard gauge, oil burner, preferably superheated, adapted to be operated safely on curves of one hundred and fifteen feet radius on steel 60 pounds to the yard, may be geared or direct connected, must comply in all particulars with all laws and regulations of all State and Governmental authorities governing the use of locomotives on railroads subject to the jurisdiction of the Railroad Commission of California, and the Interstate Commerce Commission, tractive power to be between 21,000 pounds and 23,000 pounds, price to be delivered at Oakdale, California, subject to the approval of the Chief Engineer of the Sierra Railway Company of California.

Sixty cars of 100,000 pounds capacity and minimum cubical contents of 950 cubic feet, or seventy-five cars of 80,000 pounds capacity and minimum cubical contents of 750 cubic feet for hauling sand or gravel, must be center dump and 100 per cent full clearing, may be new, or used if in first class condition, the style of car preferred is a steel gondola of battleship design 100,000 pounds capacity and between 1000 and 1100 cubic feet contents, height of car from top of rail to be not greater than 9 feet 6 inches, but other styles of cars will be considered if they comply in all particulars with rules of the American Railway Association and the Master Car Builders Association. Price to be delivered at Oakdale, California, subject to the approval of the Chief Engineer of the Sierra Railway Company of California.

Said Joint Board of Directors will meet at the office of the Oakdale Irrigation District, Oakdale, California, at 2 o'clock P. M. of said 17th day of August, 1925, and open all proposals received in response to this notice.

The contract for supplying the foregoing equipment will be let to the lowest responsible bidder, but the Boards reserve the right to reject any and all bids.

Bidders may submit bids upon either the locomotive, or the cars separately, or may submit bids for the locomotive and the cars under one bid.

Each proposal must be accompanied by a certified check for five (5%) per cent of the amount of the proposal submitted, payable to the order of Oakdale and South Joaquin Irrigation Districts as a guarantee that

Architect's Preliminary Estimates

the bidder will, if successful, execute a satisfactory contract to furnish within forty-five days the equipment herein described and called for under this notice.

Bids must be enclosed in a sealed envelope, marked "Proposal For Joint Railroad Equipment," and addressed to the Joint Board of Directors of Oakdale and South San Joaquin Irrigation Districts, Oakdale, California.

Done in pursuance of an order of the Joint Board of Directors of the Oakdale Irrigation District and of the South San Joaquin Irrigation District, this 21st day of July, 1925.

M. E. KEARNEY,
Secretary of the Board of Directors of the Oakdale Irrigation District.

S. L. STEELE,
Secretary of the Board of Directors of the South San Joaquin Irrigation District.

NOTICE TO BIDDERS

(Hanford Joint Union High School District)

At a regular meeting of the Board of Trustees of the Hanford Joint Union High School District, held at the regular place of meeting of said Board of Trustees, a motion was regularly passed, and entered in the minutes of said meeting, that the clerk of the said Board of Trustees be instructed to be published in the Hanford Daily Sentinel, the required number of issues, a notice to bidders calling for sealed bids to furnish the following school supplies and equipment:

Fortieres for Auditorium Windows.
One Moving Picture screen.
Tools and general supplies for shop.
One bookkeeping machine.
100 or more steel lockers, 12x15x42 inches with locks.
50 or more steel lockers, 15x15x15 inches with locks.
One or more Upright Pianos.
100 dozen towels, more or less, samples submitted.
350 sq. yards, more or less, Linoleum or Cork Carpet, samples submitted.

Specifications may be secured from G. W. Armistead, clerk of the Board. Bids may include all of the above articles or may be submitted to cover any one or more classified articles as above specified.

All proposals must be sealed and accompanied by a certified check or bidder's bond equal to ten per cent of the amount of the bid, and must be in the hands of the clerk of the Board before 8:00 P. M., August 10th, 1925, at the High School building, at which time and place the bids will be opened. The trustees reserve the right to reject any or all bids.

G. W. ARMISTEAD,
Clerk of the Board of Trustees Hanford Joint Union High School Dist.

NOTICE TO CONTRACTORS (Bakersfield—Board of Education)

Notice is hereby given that sealed bids will be received by the Board of Education, Bakersfield School District, Bakersfield, California, up to 7:30 P. M., August 13th, 1925, for the furnishing of labor and materials for:

(1) The installation of urinal stalls in the Washington, Lowell and Fremont school buildings, according to plans and specifications on file in the office of the Board of Education, Room 3, City Hall.

(2) The installation of heating systems in the classrooms and offices of the following schools:

- a. Hawthorne: Four classrooms and offices.
- b. Penn: Four classrooms.
- c. McKinley: Eight classrooms.
- d. Fremont: Four classrooms.
- e. Lincoln: Three classrooms and office.
- f. Williams: Five classrooms and office.
- g. Jefferson: Two classrooms.

Bids will be received for the work on each building separately, or segregated as shown on bid form furnished by Board of Education. Bids must be accompanied by a cashier's or certified check in the amount of, at least, ten per cent (10%) of the amount of bid, such check to be made payable to the Board of Education, Bakersfield School District, and to be submitted as a guarantee that the bidder, if successful, will enter into a contract satisfactory to said Board of Education, and in addition thereto, will furnish good and sufficient bonds therefor.

The Board reserves the right to reject any or all bids, and to waive any informality in any bid received.

By order of the Board of Education, Bakersfield School District, made July 14, 1925.

M. P. FLICKINGER, President.
W. F. WHITAKER, Secretary.

NOTICE TO BIDDERS

(Susanville Elementary School Dist.)

The Board of Trustees of the Susanville Elementary School District will receive sealed proposals at or before 8 p. m., Wednesday, August 12th, 1925, at the office of the County Superintendent of Schools, Susanville, California, at which time and place bids will be opened and read in public for furnishing the labor and material for erecting and completing a proposed grammar school building at Susanville, California, in accordance with plans and specifications prepared by Ralph D. Taylor, Architect, Susanville, California.

Bids will be received separately for the following classes of work:

1. General Contract for Building.
2. Heating.
3. Plumbing.
4. Electrical Wiring.

All bids must be accompanied by a certified check for 10 per cent or more of the amount of the proposal. In case this proposal is accepted, in whole or in part, and the bidder fails to execute a contract for the performance of said work, and a bond of sufficient sureties and content in the sum of 50 per cent of the amount of the contract to secure the faithful performance thereof, within ten days after such acceptance, then this certified check shall be retained by the Board of Trustees of Susanville Elementary School District as liquidated damages for the failure to carry out this proposal. Such contract and bond shall be in such form and of such contents as shall be satisfactory to the Board of Trustees of said Susanville Elementary School District.

Plans and Specifications may be obtained from Ralph D. Taylor, Architect, Rooms 5-7 Lassen Industrial Bank Building, Susanville, California. All bids to be made out on forms furnished by the Architect.

A deposit of Fifteen Dollars will be required from all contractors receiving plans—said deposit to be refunded when plans and specifications are returned in good condition.

The Board of Trustees reserve the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Trustees of the Susanville Elementary School District, Susanville, California.

By M. R. ARNOLD, Clerk.
Dated July 22, 1925.

L. A. COUNTY ROAD FUNDS

A balance of \$3,713,134.63 remained in Los Angeles county road fund derived from state taxes at the close of the fiscal year June 30, 1925, according to a report filed by County Road Commissioner George W. Jones with the California state highway commission. Of this amount \$60,512.60 is credited to equipment. This balance will be available for road improvements during the next fiscal year.

The county received out of 1924's auto license fund \$1,015,713.57 and from 1925's auto license fund \$218,080.31. From the 1924 fuel tax the county received out of the state treasury \$1,317,180.92 and from the 1925 fuel tax \$1,220,966.37.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten- cii cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

CLYDE

HOISTS and DERRICKS

"Equipped by Clyde" has become a mark of distinction in the construction field. More and more are complete Clyde outfits being purchased. The resulting splendid service justifies the expenditure.

Illustrated here is a Clyde 20-ton guy derrick with a 115 foot boom operated by a Clyde two drum electric hoist. Both are owned and operated by the Phoenix Utility Company on the \$10,000,000 development for the Minnesota Power & Light Co., at Fond du Lac, Minnesota.

The outfit handles all material excavated for a large power house and was one of six similar installations used on the project.

Clyde Electric Hoists are built with all the thoroughness found in any other Clyde unit. They are provided with especially designed motors, automatic mechanical brakes in addition to foot brakes, rugged drum type controllers, semi-steel friction drums, and gears with machine cut teeth. The lever arrangement is designed for easy and instantaneous control.

Additional information given cheerfully.

You'll Take Pride in Your Clyde!

KOEHRING

DANDIE

Light Mixer

Dandie Light Mixer

7 cu. ft. mixed Concrete. Two or four cylinder gasoline engine. Power charging skip, or low charging hopper and platform. Rubber tired steel disc wheels or steel rimmed wheels.

Send back the coupon

VALUE
—Such as Never Before
Seen in the Light Mixer Field!

STILL within the price range for light mixers, this 7 ft. Dandie Model offers extraordinary values!

A heavy duty, four cylinder, radiator cooled gasoline engine, completely enclosed in a steel housing.

Completely enclosed transmission always running in an oil bath, and mounted on shaft revolving in roller bearings. Steel disc wheels with rubber tires or regular steel rimmed wheels. Beveled edge, chilled drum rollers, pinned to shaft which turns in big bearings! Koehring double gear drum drive!

In every bearing—every detail—you'll find the reliable Koehring construction the surest insurance of reliability and long, trouble-free service life!

Light Weight—just the balanced light weight to be hauled on its rubber tires behind your car or truck and to lose no time between job and job.

This Dandie Model has been tested and tried by *overwork* and abuse—and it's more than worthy of the Koehring name.

For high speed operation—solid, substantial construction and light weight portability—this Dandie has established new values and standards in the light mixer class.

Congress of March 3, 1879.

\$20,000,000 HIGHWAY PROGRAM IS PROVIDED

Provision for the raising of \$20,000,000 in state highway funds is contained in the first of the proposed initiative measures to be presented to California voters in 1926, Robert B. McPherson, state assemblyman of Vallejo announces.

The measure contemplates taking \$10,000,000 at once from the state's surpluses to begin the road program and provides that the remaining \$10,000,000 be raised by means of a weight tax on vehicles over a five-year period, according to Assemblyman McPherson.

Acquisition by the state and construction of certain state highways as yet unnamed are provided for in the measure. These will include the San Francisco bay shore highway, the Vallejo-Sears Point via Black Point cutoff, the Garden highway, Sacramento to Tudor; the Antioch road, the Sutter by-pass and causeway and possibly the West Side highway out of the San Joaquin valley, according to Assemblyman McPherson.

RAIL LINE TO TIMBER BELT IS PROPOSED

Invasion of the Deschutes timber belt by the Southern Pacific with probable branch lines over the Cascade summit to the fir belt of the McKenzie slope, is a probability, it was admitted by Robert E. Strahorn, railroad builder, who was in Bend, Ore., recently, accompanied by officials of the Southern Pacific Company.

Strahorn, spokesman for the party of rail officials, before being asked about probable extension of the Natron cutoff line north to the Deschutes territory said that the purpose of visit of the rail officials to Bend was to obtain data relative to potential tonnage in view of railroad activity in the Klamath country. Little attention has been given to the country north of Skookum, on the Natron cutoff line, up to this time, Strahorn said.

Members of the Strahorn party, including Paul Shoup, executive vice-president of the Southern Pacific, have been in Bend for several days making a study of the potential tonnage. This work will not be completed for four or five days, it was estimated by Strahorn. The rail officials were in conference with officials of the Deschutes National Forest, securing information about timber which is under federal jurisdiction.

COMMENTS S. P. FOR FOREIGN CEMENT STAND

Hearty indorsement of the resolution before the San Francisco Board of Supervisors which calls for the use of American cement in all city, county and public construction in San Francisco, in place of inferior foreign cement, is expressed by the California Development Association through Charles S. Knight, director of the industrial department.

Knight under recent date wrote a letter to Mayor Rolph, in which the resolution, which was passed in its first reading unanimously by the Board of Supervisors, was cited as an effort of constructive value to the State, Knight said:

"Not only San Francisco, but the entire State of California is facing a very serious situation in many lines of industry today on account of the competition of foreign products, which in many instances are inferior in quality to those produced in California and the United States.

"We heartily congratulate the San Francisco Board of Supervisors on the purchasing policy that has been carried out in support of California payrolls, and we feel that after a thorough consideration your board will give the cement industry of California that recognition which it is entitled to receive."

PLAN MARKETING CAMPAIGN

Enlargement of its trade extension committee with a view to putting on an intensive campaign for marketing lumber, was voted by the directors of the National Lumber Manufacturers' Association, in session at Portland, Ore., July 30. Prominent lumbermen from all parts of the country attended the meeting.

\$5,102,987 IS S. P. BUILDING EXPENDITURE FOR JULY

Building operations in San Francisco for the month of July, 1925, totaled approximately \$5,102,987, according to Chief Inspector of Buildings John P. Horgan of the Department of Public Works. During the month 918 permits were issued.

Following is a segregated report of the July activities as compiled by Chief Inspector Horgan:

Class	No. of Permits	Est. Cost
A	3	\$ 102,000
B	1	120,000
C	31	799,143
Frames	474	2,556,455
Alterations	406	473,165
Public Bldgs.	3	1,052,224

Total 918 \$5,102,987

The activities of the past month exceed those of June, 1925, by \$441,963 during which period 902 permits were issued. The totals for July, 1924, registered 776 permits representing an approximate expenditure of \$3,983,466. During May of this year 905 permits were issued, the improvements undertaken representing a total valuation of \$4,047,811.

During the past month the Department of Public Works issued 474 permits for frame structures, at least seventy-five per cent of these being for the erection of homes, the remaining twenty-five per cent largely representing flats and apartment buildings.

No large projects were issued during the past month, the biggest amount for any single structure being \$120,000.

10,000 MILES FEDERAL AID ROADS COMPLETED LAST YEAR

Nine thousand four hundred and forty-five miles of Federal-aid road was brought to completion during the fiscal year ending June 30. An additional 4587 miles is reported completed but has not been finally inspected and accepted, according to the Bureau of Public Roads of the United States Department of Agriculture.

The outstanding result of the year's work has been the large mileage of continuous highway routes made available. In practically every State gaps in through routes have been closed and many extensions made. Probably the most notable project opened to traffic is the Wendover Cutoff across the Great Salt Lake Desert, which has removed an age-old obstacle to transcontinental traffic.

All of the construction has been on the designated 175,000 mile Federal-aid highway system which is to serve as the main road system for the Nation. At the beginning of the fiscal year 35,452 miles had been completed with Federal aid, and the year's work brings the total to more than 46,000 miles in service, since a considerable portion of the 17,123 miles reported as under construction has already been opened to traffic.

Texas led in mileage completed during the year with 784 miles, followed by South Dakota with 458 miles, Illinois with 431 miles, and Minnesota with 429 miles.

TRADE NOTES

K. O. Clark and H. K. Koebig, formerly associated in the joint ownership and operation of the Clark Cement & Concrete Construction Co. and the Color Control Company, announce a segregation of their business interests. Mr. Clark will take over the operation of the Clark Cement & Concrete Construction Co., doing cement contracting and concrete construction work, with offices at 634 S. Western Ave., Los Angeles; Mr. Koebig will take over the operation of the Color Control Company, doing the scientific processing and coloring of concrete surfaces and cement floors, with offices at 1000 N. Orange Dr., Hollywood.

H. H. Knowles, formerly connected with the Knowles Pottery Company of Santa Clara, announces the opening of offices at 220 Post street, San Francisco, as factory representative for the Greenwood Pottery Company of Trenton, N. J., specializing in Greenwood vitrified hotel china and the Anchor Pottery Company of the same city, handling semi-porcelain hotel ware. Mr. Knowles covers the Pacific Coast for both concerns and is completing arrangements for the opening of several branch offices in the more important Pacific Coast centers.

The Concrete Brick & Tile Company of Los Angeles is reported to be planning establishment of a plant in Richmond, Contra Costa County. R. E. Johnston, president and general manager of the company, has been in that territory looking over prospective sites accompanied by Joseph Voorheis, assistant general manager of the National Stone Tile Company with headquarters in San Francisco and New York.

The Marion Steam Shovel Company has established direct factory branch warehouses and offices at 571 Howard Street, San Francisco, and 322 East Third Street, Los Angeles. At these points a complete line of replacement parts will be carried. Mr. Bert Engstrom and Mr. R. P. Ryan will be at San Francisco and Mr. John Harvey at Los Angeles.

B. N. Nelson of Oroville will start immediate construction of a moulding and box factory at Eighth and Yuba streets, Marysville. The first unit, including equipment, will cost approximately \$25,000. The main structure will cover an area of 40 by 100 feet.

Graham & Norton Company, distributors of elevator signs and accessories, who recently opened an office at San Francisco, expect to open an office in Los Angeles soon, according to announcement by M. W. Squires, Pacific Coast manager.

Farrar & Carlin & Granfield Company, grading contractors, announce consolidation, effective July 1. The two companies will hereafter operate under one management under the firm name of Granfield, Farrar & Carlin.

GLASS PRICES CUT

Press dispatches report reductions of 20 to 25 per cent in the prices of plate glass announced by the Pittsburgh Plate Glass Company to meet increased foreign competition. Standard Plate Glass Company followed suit in the reductions which became effective at once.

Application For Water Rights Filed For \$1,700,000 Project

The construction of storage reservoirs and other works at an estimated cost of \$1,700,000 in connection with a project for the irrigation of thousands of acres of land in the vicinity of Woodland, Davis and Dixon is outlined in an application which has just been filed with the state division of water rights by B. C. Rogers of Alameda.

Under the plan outlined the project would be developed through the utilization of water from Putah and Pope Creeks. The application filed by Rogers, who is said to be acting for R. R. Reed, an Oakland man, is for permission to divert 1500 second feet by direct diversion and 300,000 acre feet for storage.

The construction of a group of four reservoirs is proposed in the application. The proposed site for one of the largest of these, a reservoir with a capacity of 150,000 acre feet, is in the Upper Putah Creek Canyon. Another reservoir with a capacity of 55,000 acre

feet would be located in Pope Valley.

One of the proposed impounding dams would be 106 feet high and several hundred feet long. The land it is proposed to irrigate forms a triangle of about 60,000 acres in the territory west of Woodland, Davis and Dixon. No mention is made in the application of the use of water for the development of hydro-electric energy.

Officials of the division of water rights were told by Rogers that a survey crew of several men has been working on filed details of the project for several months.

Among the late applications for water diversion permits is one by Fred Dewhirst, as trustee of the Mt. Pleasant-Lincoln Irrigation District in Placer County. This request is for 300 cubic feet per second and 100,000 acre feet. The water would be taken from Bear River and used to irrigate land in a district comprising about 60,000 acres.

Elevated Loop and Interurban Car System Outlined by Architect

Plans to afford relief of traffic congestion in lower Market and Mission streets, calling for the construction of an elevated loop street from the Embarcadero along Market and Mission streets to Twelfth street and the inauguration of an interurban street car traffic between San Francisco and San Mateo by way of the Twin Peaks Tunnel, have been drafted by Louis Mullgardt, San Francisco architect.

In addition to construction of a loop elevated street or viaduct in Market, Mission, the Embarcadero and Twelfth street the plan comprehends inauguration of an interurban street car system from the ferry out Market street to the Twin Peaks tunnel, through the tunnel, over the tracks of the Municipal Railways to the Ingleside Country Club, and construction of tracks from that point to connect with the tracks of the Market Street Railroad at Colma, and then over the latter

company's rails as far south as San Mateo.

Thompson declared today inauguration of such a system would reduce street car running time from San Francisco to South San Francisco from 1 hour and 20 minutes to 20 minutes, and would reduce proportionately the running time between this city and all peninsula communities as far south as San Mateo.

Under the plan, interurban electric, making only station stops, would be run over the outer Market street tracks and the city cars would use only the inner tracks; only automobile truck traffic would be permitted on the surface of Market and Mission streets, passenger automobiles being compelled to use the elevated street. There would be parking stations for automobiles on the elevated and sidewalks.

In Market street, the elevated would extend from curb to curb, 76 feet wide, leaving 22 foot sidewalks on either side.

BLACKBURN SAW GAUGE PROVES TIME SAVER ON JOB

Something new in the construction field and a valuable time saver on the job is the "Blackburn" saw gauge, manufactured by L. Ph. Bolander, millwright contractors, 954 Bryant street, San Francisco.

The Blackburn gauge eliminates the use of a rule and permits the cutting of timber to any length in feet, inches or fractions. One move places the bumper in position ready for use, and, according to M. E. Wormuth, who is marketing the product, the wages of the operator saved will pay for the gauge in two weeks, if in constant use.

Firms now using the gauge are Barrett & Hilp, Reinhardt Lumber & Planing Mill; Ralph McLeran & Company; Christensen Lumber Company; Geo. Wagner, Inc.; Portmans Planing Mill and Mission Concrete Company.

BRICK TESTING MACHINE

A portable machine for testing bricks in cross bend has been designed by Dr. A. H. Stang, of the engineering mechanics section of the Bureau of Standards, and construction is practically completed. The machine will weigh about 40 pounds. It is hydraulically operated, 16 inches high, 6 inches wide and 12 inches long.

On account of the proposed change in the A. S. T. M. specifications for brick testing, which will probably eliminate all physical tests except the cross-bend test, the need for such a machine is evident. With this machine an inspector can test bricks on the job and will not need to send specimens to a distant testing laboratory. Delays will thus be avoided and a real indication given of the quality of the brick.

Bid 6. Austin Engineering Co., 121 W 42nd St., New York City.

Bid 7. Virginia Engineering Co., Inc. 330 28th St., Newport News, Va.

Bid 8. D. D. Adams Co., 683 N Snelling Ave., St. Paul, Minn.

Bid 9. Lawson & Drucker, 461 Tehama St., San Francisco.

Bid 10. O. E. Ross, 302 E Anaheim St., Long Beach, Cal.

Part I—General Construction

Item 1. Net price for the basic work under part 1, complete—Bid 3, \$243,188. Bid 5, \$240,000.

Item 2a. Net prices to be added under item 1 for the addition of erect of subsistence building—Bid 3, \$61,263. Bid 5, \$49,000.

Item 2b. Do for power and ice plant—Bid 3, \$29,374. Bid 5, \$26,500.

Item 2c. Do for south ward—Bid 3, \$93,000. Bid 5, \$91,400.

Item 2d. Do for Chinese quarters—Bid 3, \$9000. Bid 5, \$9,500.

Item 2e. Do for hospital stores building—Bid 3, \$25,458. Bid 5, \$28,600.

Item 3. Substitution of genuine tangle, add or deduct item 1—Bid 3, deduct \$3000. Bid 5, deduct \$5000.

Item 4a. Do items 2a and 2c for subsistence building—Bid 3, deduct \$3000. Bid 5, deduct \$4000.

Item 4b. Do for south ward—Bid 3, deduct \$30. Bid 5, deduct \$1500.

Item 5. Substitution of insulating board, add or deduct item 1—Bid 3, deduct \$1600. Bid 5, deduct \$1350.

Item 6a. Do items 2a, 2c, and 2d for subsistence building—Bid 3, deduct \$325. Bid 5, deduct \$400.

Item 6b. Do for south ward—Bid 3, deduct \$175. Bid 5, deduct \$200.

Item 6c. Do for Chinese quarters—Bid 3, deduct \$325. Bid 5, deduct \$300.

Item 7a. 1 to 2 to 4 concrete, per cu. ft.—Bid 3, 15c. Bid 5, 65c.

Item 7b. Steel reinforcement, per lb.—Bid 3, 6c. Bid 5, 5c.

Part II—Plumbing, Sprinkler System Etc.

Item 8. Net price for the basic work—Bid 4, \$37,475. Bid 7, \$43,200. Bid 8, \$36,888. Bid 9, \$36,700. Bid 10, \$34,000.

Item 9a. For subsistence building including brine and coil trench and lines—Bid 4, \$14,520. Bid 7, \$11,050. Bid 8, \$9929. Bid 9, \$13,400. Bid 10, add \$10,000.

Item 9b. For power and ice plant—Bid 4, \$2890. Bid 7, \$2600. Bid 8, \$2320. Bid 9, \$2500. Bid 10, add \$2000; telegraphic modification, add \$1000.

Item 9c. For south ward—Bid 4, \$13,730. Bid 7, \$11,117. Bid 8, \$11,345. Bid 9, \$12,200. Bid 10, add \$14,000; tele-

graphic modification, deduct \$1000.

Item 9d. For Chinese quarters—Bid 4, \$2259. Bid 7, \$2100. Bid 8, \$2615. Bid 9, \$2000. Bid 10, add \$2000; telegraphic modification, add \$500.

Item 9e. For hospital stores building—Bid 4, \$2482. Bid 7, \$2300. Bid 8, \$3192. Bid 9, \$2320. Bid 10, add \$1000.

Part III—Electrical Work

Item 10. Net price for the basic work—No bids.

Item 11a. Substitution building, including electric service lines—No bids.

Item 11b. Power and ice plant—No bids.

Item 11c. South ward—No bids.

Item 11d. Chinese quarters—No bids.

Item 11e. Hospital stores building—No bids.

Parts II and III

Item 12. Price for items 8 and 10 combined—Bid 2, \$49,800. Bid 7, \$72,500.

Item 13a. Add to item 12 for work covered by items 9a and 11a—Bid 2, \$15,600. Bid 7, \$17,250.

Item 13b. Do items 9b and 11b—Bid 2, \$4000. Bid 7, \$4000.

Item 13c. Do items 9c and 11c—Bid 2, \$17,000. Bid 7, \$20,117.

Item 13d. Do items 9d and 11d—Bid 2, \$2260. Bid 7, \$2320.

Item 13e. Do items 9e and 11e—Bid 2, \$4200. Bid 7, \$5600.

Parts 1, II, and III—Entire Project

Item 14. Net price for entire basic work under Parts 1, II, and III—Bid 1, \$250,000. Bid 5, \$300,000. Bid 6, \$421,000.

Item 15a. Additions to subsistence building—Bid 1, \$55,000. Bid 5, \$70,000.

Item 15b. Do power and ice plant—Bid 1, \$35,000. Bid 5, \$32,000.

Item 15c. Do south ward—Bid 1, \$100,000. Bid 5, \$113,000.

Item 15d. Do Chinese quarters—Bid 1, \$10,000. Bid 5, \$12,500.

Item 15e. Do hospital stores building—Bid 1, \$20,000. Bid 5, \$34,000.

Official Proposals

NOTICE TO CONTRACTORS

(Colusa Union High School District)

Notice is hereby given that sealed bids will be received by the Board of Trustees of the Colusa Union High School District, Colusa, Colusa County, California, at the present High School, until 8 o'clock P. M., on Monday, August 17, 1925, for the erection of a Main High School Building, a Gymnasium and a Shop Building, to be erected in Colusa, Calif., according to plans and specifications prepared by George S. Selson & Company, the authorized Architects.

Bids will be received for the various branches of the work as follows: For the Concrete Work; for the Mason Work; for the Concrete and Mason Work combined; for the Carpenter Work; for the Concrete, Mason and Carpenter Work combined; for the Plastering Work; for the Sheet Metal for the Roofing; for the Sheet Metal for the Plumbing Work combined; for the Electrical Work and Electrical Plumbing, Sheet Metal and Electrical Work combined; for Linoleum; for the Coating Work; for Ornamental Iron Work; and an alternate for Steam Heating.

All bids will be received with alternate propositions.

Plans and specifications can be seen during office hours at the office of the clerk of said Board at Colusa, California, and may be seen at or obtained from the office of the Architect, 1415 California State Life Building, Sacramento, California.

A cash deposit of \$25 will be required from all prospective bidders on all copies of plans and specifications returned out, as a guarantee of the return of the same.

All bids will be presented on blank forms, which may be procured from the office of the Architects.

Each bid must be accompanied by a certified check on some responsible California Bank for a sum not less than ten per centum (10%) of the amount of the bid, made payable to L. K. Jordan, Clerk of the Board of Trustees, as a guarantee of the contract that the party to whom the contract may be awarded will within ten days after the award is made enter into the necessary agreement and furnish the necessary Surety Bonds for the faithful performance of said work, and in full performance of said work, and in case the bidder or refuses to enter into said agreement, or to furnish said bonds said check will be forfeited to the said School District, in the manner provided by law. The Board of Trustees will not accept a Bidder's Bond in lieu of a certified check.

Each bid must be enclosed in a sealed envelope and addressed to L. K. Jordan, Clerk of the Board of Trustees, Colusa, California, and endorsed "Proposal for Building School."

The Board of Trustees expressly reserves the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Trustees (Signed) L. K. JORDAN, Clerk Colusa Union High School Trustees.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 315 Forum Building, Sacramento, until 2 o'clock P. M., on August 31, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

portions of State Highway, as follows: San Diego and Imperial Counties, between top of Mountain Springs Grade and Myers Creek Bridge (VII-12-H & A), about one and nine-tenths (1.9) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willis, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of the work to be done, with a representative of the Commission. It is requested that work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVEREDING,
T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MINTON, Secretary.
Dated: August 3, 1925.

4. Electrical Wiring.

All bids must be accompanied by a certified check for 10 percent or more of the amount of the proposal. In case in part, and the bidder fails to execute a contract for the performance of said work, and a bond of sufficient sureties and content in the sum of 50 per cent of the amount of the contract to secure the faithful performance thereof, within ten days after such acceptance, then this certified check shall be retained by the Board of Trustees of Susanville Elementary School District as liquidated damages for the failure to carry out this proposal. Such contract and bond shall be in such form and of such contents as shall be satisfactory to the Board of Trustees of said Susanville Elementary School District.

Plans and Specifications may be obtained from Ralph D. Taylor, Architect, Rooms 5-7 Lassen Industrial Bank

Building, Susanville, California. All bids to be made out on forms furnished by the Architect.

A deposit of Fifteen Dollars will be required from all contractors receiving plans—said deposit to be refunded when plans and specifications are returned in good condition.

The Board of Trustees reserve the right to reject any or all bids and to waive any informality in any bid received.

By order of the Board of Trustees of the Susanville Elementary School District, Susanville, California.

Edw. M. H. Arnold, Clerk.
Dated July 22, 1925.

NOTICE TO CONTRACTORS

(Valley School District)

Notice is hereby given that Sealed Bids will be received and opened by the Board of Trustees of the Valley School District, San Joaquin County, State of California, in the School Building, at Banta, California, at 2:00 o'clock P. M., Saturday, August 15th, 1925, for the erection and completion of a one-story tile and concrete school building for said School District in accordance with plans and specifications made for the same by W. H. Weeks, Architect, 369 Pine St., San Francisco, and 1924 Broadway, Oakland, California, with their several propositions.

General Contract.
Heating.
Pumping Plant.

Plans and specifications may be seen at the Offices of the Architect before mentioned, or at the Office of the Clerk of the Board of Trustees, Joseph J. Raspo, Banta, California.

Each bid must be accompanied by a certified check on some responsible California bank in a sum not less than five per cent (5%) of the amount of the bid, and made payable to Joseph J. Raspo, Clerk of the Board of Trustees of the Valley School District; said check to be forfeited to the School District if the successful bidder fails to sign the contract and give a good and sufficient bond, as required by law, within 10 days after the awarding of the contract.

Each bid must be made on bid forms obtained from the Architect, enclosed in a sealed envelope which is indorsed "Proposals for General Contract, Heating, or Pumping Plant," and must be delivered to Joseph J. Raspo, Clerk of the Board of Trustees Banta, California, prior to the date and time set for the opening of bids.

Owner reserves the right to reject any or all bids.

JOSEPH J. RASPO,
Clerk of the Board of Trustees Valley School District, Banta, California.

The Portland Cement Stucco textures here shown are taken from photographs of actual stucco jobs. Any competent workman in the plastering trade can reproduce these beautiful, permanent and economical finishes.

A Texture for Each Period

Controlled and directed by the creative genius of the architect, Portland Cement Stucco assures a range of beauty obtainable with no other material. It makes certain a texture and tint that complete harmoniously the style of the period in which the structure is designed. Have you received your copies of "Portland Cement Stucco Textures" and "Portland Cement Stucco"? If not, send for them today. Address the nearest office listed below.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

ELEVATOR INSURANCE RATES ARE REDUCED

The importance of the work which the Bureau of Standards, Department of Commerce, is conducting on elevator interlocks is forcibly illustrated by the fact that the National Bureau of Casualty and Surety Underwriters, one of the largest groups of this kind in the United States, has recently granted a reduction in insurance rates on elevators equipped with interlocks which have passed the Bureau of Standards' tests.

A substantial saving in insurance rates has thus been made possible, but far more important than this, and of course the reason underlying the above action, is the greater assurance of safety in elevators equipped with devices which have successfully passed these tests. The best statistical information available indicates that effective hoistway door elevator interlocks would have prevented three-fourths of the fatal elevator accidents which have occurred in the past.

This work was originally undertaken for the City of Baltimore, but has been extended to include tests for the Office of the Supervising Architect and for the District of Columbia. The tests will probably also be utilized in the near future by a number of State safety commissions.

Heavy Timber Mill Construction

Those who are contemplating the erection of factories and warehouses, or the enlargement of present facilities of this character will be interested in a new bulletin on "Details of Heavy Timber Mill Construction" just issued by the National Lumber Manufacturers Association, Washington, D. C. This bulletin illustrates good practice in heavy timber mill construction detailing and furnishes a distinct service not elsewhere available in compact and simple form. It will be mailed free upon request. Occasional searches which designers and draftsmen make for such details are likely to fail to reveal the kind of material desired. Lost time is bound to result, poor proportions and relationships of hastily improvised details are sure to be noticeable in the finished production, and features which are actually essential in this type of construction are often omitted.

From the preface of the bulletin it is indicated that heavy timber detailing has become a specialty. Those who specialize in mill construction have sets of details designed especially to meet their needs. Those who only occasionally are called upon to design buildings of this class usually improvise details as the need develops. This bulletin is intended primarily for this latter class, though its use by specialists as well would help standardize procedure. Its use in the drafting room

should save the time of draftsmen and designers and help toward a widespread knowledge of good practice in timber detailing. Proper detailing is the essential feature of most types of construction. The general design may be sound in every respect but unless the connections are properly proportioned and secured, lack of stability and sometimes actual failure occur.

These details are based upon a careful field examination of recently erected buildings built in conformance with well established design principles. As originally practiced in the textile mills in New England, standard mill construction is no longer suitable for the congested areas of our modern industrial cities. Close column spacing though not objectionable in textile mills, seriously handicaps some other forms of industrial enterprise.

In order to meet the demand for large areas of floor space unobstructed by columns two types of construction are used: the so-called semi-mill construction, and laminated mill construction. Neither of these types comply with standard mill construction in every detail. The details shown in this bulletin, therefore, cover all three of these distinct forms of heavy timber construction. If kept available for reference in the drafting room, a great deal of time may be saved and aggravating uncertainty eliminated.

ADDED HIGHWAY PATROL IS NEEDED ON COAST ROAD

Traffic conditions along the coast highway north of Santa Barbara have reached a point where the state motor vehicle department feels that additional patrol is necessary. Last Sunday the traffic resembled a city street.

Additional state police have been assigned to meet the emergency. "There is a steadily increasing tide of cars from other states passing both north and south on the highway and all California seems on wheels," said one of the traffic officers.

PORTLAND BUILDING GAINS

Building construction authorized in Portland, Ore., in the last seven months showed an increase of 47 per cent as compared with the like period of last year and totaled \$25,119,440.

DANDIE

Light Mixer

Dandie Light Mixer

7 cu. ft. mixed Concrete. Two or four cylinder gasoline engine. Power charging skip, or low charging hopper and platform. Rubber tired steel disc wheels or steel rimmed wheels.

Send back the coupon

VALUE
—Such as Never Before
Seen in the Light Mixer Field!

STILL within the price range for light mixers, this 7 ft. Dandie Model offers extraordinary values!

A heavy duty, four cylinder, radiator cooled gasoline engine, completely enclosed in a steel housing.

Completely enclosed transmission always running in an oil bath, and mounted on shaft revolving in roller bearings. Steel disc wheels with rubber tires or regular steel rimmed wheels. Beveled edge, chilled drum rollers, pinned to shaft which turns in big bearings! Koehring double gear drum drive!

In every bearing—every detail—you'll find the reliable Koehring construction the surest insurance of reliability and long, trouble-free service life!

Light Weight—just the balanced light weight to be hauled on its rubber tires behind your car or truck and to lose no time between job and job.

This Dandie Model has been tested and tried by *overwork* and abuse—and it's more than worthy of the Koehring name.

For high speed operation—solid, substantial construction and light weight portability—this Dandie has established new values and standards in the light mixer class.

WESTERN TIMBER DISAPPEARING FAST SAYS GOVERNOR

Alarm over the rapid rate at which Washington forests are being cut up into lumber has been expressed by Governor Boland F. Hartley, himself a timberman of long experience.

Governor Hartley predicted that within twenty years the timber of the state will have been cut away until lumbering will no longer be a major industry. At present lumbering and contingent industries are said to carry 65 per cent of the state's payrolls.

The timber stand in this state is one of the important remaining ones in the entire country.

Same lumbermen are inclined to ridicule the governor's statements as absurd, but on one point they agree. That is that the present system of taxation does not favor conservation. It is cheaper to cut timber, regardless of current prices, than to hold the stands which are heavily taxed. Under this system of things the denuded land cannot be reforested profitably by the owners.

Other lumbermen point to the fact that as the easily accessible timber is cut away, a natural increase in price will develop, which will force lumber to give way to cheaper building materials. Far in the mountains, at least, they maintain, there will be timber for the cutting if the world lumber market justifies it.

FIVE-DAY WEEK DEMAND LESSENS, IS REPORT

The demand for the five-day week, which threatened to become a serious issue earlier in the year, has not met with favor on the part of the workmen themselves, says the Association of Building Trades Employers with headquarters in Cleveland, Ohio. The sole reason why it was ever advocated was to provide employment for more men. In view of the fact, the association says, that the country, this year, is enjoying a continuation of the building boom which require the services of every skilled mechanic, the argument in favor of shortening the working week fell into disfavor.

The issue, the association says, is not dead by any means and the moment the pressure for additional building is removed it is sure to be revived, particularly by those trades in which the shortage of mechanics is most acute. It is evident to any one who has made a study of conditions that the time is coming when the demand for new building is going to fall off quite considerably. Then there will have to be readjustments in wage rates in order to lessen the wide difference that exists between the income of skilled workers in the building trades and those in other industries.

In order to meet this exigency when it comes, contractors should be in a position to co-ordinate their efforts in a national way. This can only be done through strong local associations in the leading cities affiliating with a national association, which would be in a position to deal with the larger problems of the industry on a nationwide basis.

NEW PAINT ADHERES TO CREOSOTED WOOD

To meet a demand for a paint that will adhere to creosoted lumber, the Jennison-Wright Co., Toledo, Ohio, has produced Kreolite Insulating Koaing. The paint is suitable for such applications as guard rails along highways, signposts, railway crossing gates, fence posts and for marking aisles in factories having creosoted floors. The paint remains in condition to be applied with a brush at all atmospheric temperatures, and dries in from two to three hours. It is available in silver, orange and black, which colors can be obtained with one application to the creosoted surface. Any other color desired may be painted on after the first application.

OAK FLOORING OUTPUT

Production of oak flooring in June was 41,692,000 feet, according to a report by the Oak Flooring Manufacturers' Association of the United States to the Department of Commerce. Shipments totaled 43,699,000 feet, the report states.

Stock on hand July 1 was 53,191,000 feet, unfilled orders 50,092,000 feet, production for the first six months of the year 248,388,000 feet and shipments 240,515,000 feet.

COTTONEVA LUMBER HOLDINGS ARE SOLD

Final confirmation of the transfer of the timber holdings of the Cottonave Lumber Company, consisting of some 20,000 acres of virgin Redwood timber in the vicinity of Rockport, 30 miles north of Fort Bragg, to the Finkbine-Guild Lumber Company, a Mississippi corporation, was made at a meeting of the directors of the latter company in Chicago, thus closing what is probably the largest single property transfer ever recorded in Mendocino county.

The timber and land involved in the transaction comprises a tract 14 miles long and six miles wide, extending north from a point near Rockport and east to the Eel river. The site of the old town of Rockport and the old wharf and harbor site is also included in the deal, which has been pending for the past 13 months.

The Finkbine-Guild Lumber Company is one of the largest lumbering firms in the south, with two large mills and a lumber refining plant located at Gulfport, Miss., in addition to which more than 50 large retail lumber yards are maintained by the firm in the southern and central states.

The purchase of the Cottonave holdings was made by the new owners for the purpose of supplying their Mississippi refining plant with raw lumber material with which to supplant their present output of southern Cypress. Redwood was deemed the most desirable product for this purpose, and the holdings just purchased after being worked up into rough-lumber locally, will be shipped by steamer to the refining plant at Gulfport.

For the purpose of converting the timber into rough lumber in the form of slitches, the Finkbine-Guild Company will at once begin the erection of a modern mill of a maximum capacity of 300,000 feet per shift on the site of the old town of Rockport. The cost of the new plant will be approximately

BUSINESS AND HOME BUILDING

The average contractor and building material merchant has little appreciation of the influence of taxation on the building industry. The power of taxation, wisely used, tends to build up a community and make it prosperous. The same power, unwisely used, can depress trade, inflate speculative values, and reduce an intelligent citizenship from prosperity to poverty.

A man may carry a 100-pound sack of plaster on his back with little discomfort, but if he tied to one of his legs he will be seriously inconvenienced. This is true of taxation. To tax homes heavily and autos not at all will depress home building and stimulate auto buying. If factory buildings in Los Angeles be heavily taxed, and those in Vernon be exempt, factories will tend to locate in Vernon. Were the owner of a vacant lot taxed the same as the owner of an improved lot he would seize the first opportunity to build.—David Woodhead, President of the Woodhead Lumber Co., in the California Lumber Merchant.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

If the construction record established during the first half of 1925 continues throughout the balance of the year, the building shortage will be at an end by the first of January, 1926, is the conclusion reached by the National Association of Real Estate Boards. The Association has recently completed a survey of conditions which shows that only in the smaller towns is there a need for additional structures. In cities under 25,000 population, 40 per cent reported a shortage in dwellings, 34 per cent a shortage of apartments and 36 per cent a shortage of business buildings. In no city over 500,000 was a shortage in apartment houses noted, while only 18 per cent reported shortage in dwellings and 10 per cent shortage in business structures.

Building throughout the United States for the first six months of 1925 rolled up a grand total never before equaled in the history of the country. This is shown upon reports from 183 cities reported by the National Association of Real Estate Boards. Of the 183 cities reported, 100 showed a shortage of dwellings, 84 showed a shortage of apartments, and 91 showed a shortage of business buildings. However, show decrease in the number of cities reporting shortages in these classes.

City	Dwellings	Apartment Houses	Business Buildings
1925	32,247,403,319		
1924	26,589,731	1,789,417,391	
1923	24,560,332	1,654,740,781	
1922	24,563,389	1,216,844,209	
1921	117,328,348	710,436,583	

At a cost estimated to be \$350,000 the Monolith Portland Cement Company with a plant at Monolith, Kern County, may in a short time abandon its present fuel system, which consumes vast quantities of oil, and install a natural gas fuel plant, obtaining the gas from a tap line with one of the main pipe lines leading from Elk Hills to Los Angeles, according to reports from Bakersfield.

Italian iron and steel producers are disturbed over the fact that France has suddenly declined to extend the restrictions on the exportation of iron and steel scrap to include Italy, advises to the Department of Commerce state. If the restriction is really effected the Italian industry will be hard hit and will have to develop its sources of supply.

Pittsburgh Plate Glass Co. has reduced prices 25 per cent. Standard Plate Glass Co. met reduction in prices of 25 per cent by Pittsburgh Plate Glass, made necessary by foreign competition. Company is producing at capacity, and hopes the reduction will permit it to continue at a high rate.

By the will of Chas. Holbrook, wealthy San Francisco hardware dealer, who died last month, the Pacific School of Religion in Berkeley will receive \$100,000 for the establishment of a library.

Fire of undetermined origin gutted the plant of the Albina Marion Iron Works at Portland, Ore. July 31. The loss is estimated at \$100,000.

Value of contracts let on large engineering construction projects for the month of July was more than 6 per cent ahead of the corresponding month in 1924. From January 1 to August 1 the value of contracts let shows a gain of 10 per cent, compared with the same period a year ago. Engineering News-Record reports. The year has kept consistently in the lead and now, at the beginning of the eighth month, promises to eclipse the record established in 1924. The trend is toward expansion in commercial buildings, waterworks, sewers, and road improvements. Speculative housing conditions and further enlargement of factory and mill capacity has taken a general setback.

Building in Alameda during July was greater in volume than in any month since October, 1924, according to the monthly report compiled by Building Inspector Eugene Maillot. The July total, \$187,997, showed an increase of \$51,016 over June, but was \$4096.50 less than that of October, 1924. Seventeen new buildings costing \$171,750, including a new warehouse at the Eastern terminal, were started during the month.

Striking dockworkers of Oakland, Ore. who walked out July 13, are expected to work Alameda docks for a day a day. They are expected to work a day a day. No further action will be taken on the part of the men regarding the increase until such time as the matter can come before the State Board of Conciliation.

A petition has been filed in the Superior Court at Auburn by Christian C. Anderson, asking letters of testamentary in the estate of his brother, P. C. Anderson. The estimated value of the estate is \$20,000, including \$15,000 cash and securities. Anderson, who was a resident of Roseville, committed suicide. He was a general contractor and took his life because of ill health.

City trustees of Yuba City have filed protests against proposal of the Great Western Power Company to raise Lake Almanor dam forty-five feet. The directors of the power company wanted the sentiment of the city which holds that the raising of the dam would be dangerous to the lower country.

Laying 36,000 brick a day, or approximately three and one-half carloads, James Brown, Indian, and former Carlisle, Pa., football player, has gained a reputation among the construction workers on a highway near Kansas City, Mo., as being the champion bricklayer of the world. He receives \$2 an hour, or \$16 a day.

Standard Oil Company has purchased 648 acres of land on Southern Pacific railroad between Antioch and Pittsburg, Contra Costa County, and contemplates construction of world's largest storage reservoir costing approximately \$100,000. The reservoir will have a capacity of 2,000,000 barrels.

ALONG THE LINE

Charles C. Carleton, formerly attorney for the California state highway commission at Sacramento, but more recently attorney for the Construction Industries Joint Committee at Los Angeles, has opened offices for private practice of law at suite 509 Pershing Square Bldg., Fifth and Hill Sts., Los Angeles. Mr. Carleton represented the interests of the construction industry during the recent session of the state legislature at Sacramento.

G. K. Parker has resigned as superintendent of the South San Joaquin Irrigation District in San Joaquin County and C. L. Riley, assistant engineer for the district, appointed to fill the vacancy. Parker in future will be connected with the Mathews Construction Company of Sacramento which has the contract to construct the Melones dam for the South San Joaquin Irrigation District.

Willis Pfeffer has been appointed city engineer of Inglewood to succeed Arthur W. Cory, who resigned to become resident engineer of Los Angeles county sanitation district No. 5. Mr. Pfeffer was senior engineer draftsman for the California highway department, Division VII, from 1917 to 1920, and was for a number of years with Paul E. Kressley, consulting engineer of Los Angeles.

Harry E. Blake, formerly connected with the Federal government in engineering work, has been appointed city engineer of Alhambra. The appointment was made by City Manager M. H. Irvine who has been performing the duties of both offices. The engineering work has increased so as to require one man's entire time.

Howard McCurdy, consulting engineer, formerly located in Pacific Electric Bldg., Los Angeles, has been appointed city engineer of Vernon, and has moved his office to the new city hall, 4305 Santa Fe Ave., Vernon, where he will continue his private practice in addition to supervising the engineering work of Vernon.

Phillips & Stelzer, general contractors, have opened offices at 536 Munras Ave., Monterey. Phillips formerly operated in the San Francisco Bay region while Stelzer was engaged in the building business in Los Angeles and Hollywood.

Francis Decaire, 76 years of age, general contractor of Reno, Nevada, died in that city Aug. 2. In addition to operating in the Reno section, Decaire had several contracts in Verdi, Nevada.

J. D. Norris, for the past three years connected with the Engineering Department of the Southern Pacific, has been named city engineer of Santa Cruz.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

PLUMBING ORDINANCE WRONG SAYS JAILED PLUMBER

Alleging that the city ordinance regulating the registration of plumbers and the issuance of plumbing permits is void, George V. Nicholls, serving time in the San Francisco County Jail for violating the ordinance, applied for a writ of habeas corpus to the District Court of Appeals. Acting Presiding Justice Darcy A. Cashin made the writ returnable August 24 at 10 A. M., and admitted Nicholls to \$100 bail until that time.

Nicholls was arrested September 22 of last year by Chief Plumbing Inspector William D. Hobro for changing a sewer pipe at 2304 Twenty-third street without a permit from the Board of Health.

In the petition it is alleged that the ordinance is "unreasonable, oppressive and against public policy, that the requirements of registration, examination, bonding and payment of license fees are unreasonable and tend to create a monopoly."

CERTIFICATES GRANTED

The following were granted architects' certificates at the last meeting of California State Board of Architecture, Southern District: G. Lawrence Ott, 5719 Victoria Ave.; Robert B. Stacy-Judd, 5030 Hollywood Blvd.; Huntington Barker, 132 N. Hobart Blvd.; Frank H. Chantrill, 4454 Leavitt St., all of Los Angeles, and Rubie F. Frodin, 30 N. Michigan Ave., Chicago, and Everett T. Babcock, 649 La Lona Dr., Pasadena.

INDUSTRIAL ACCIDENTS INCREASING

Industrial accidents in 22 states increased 20 per cent in 1923 as compared to 1922, according to figures published by the American Labor Legislation Review. In the state of Pennsylvania alone the compensation cost to employers in 1923 was \$13,000,000. Employees lost a like amount in wages. In other words, industrial accidents in one state in a single year represent a financial loss of \$26,000,000.

MISSOURI COMPENSATION LAW SUBJECT TO REFERENDUM

As a result of the efforts of the Building Trades Council of St. Louis, the recently enacted workmen's compensation law in Missouri will be subject to a referendum vote in November, 1926. The filing of the referendum petition prevented the law from becoming operative on July 9th, the date it was to have gone into effect.

ANTI-INJUNCTION BILL PASSED

Governor Small of Illinois has approved a bill which finally passed the legislature of that state on June 10th, prohibiting judges from issuing or granting injunctions to restrain strikers from engaging in "peaceful persuasion and peaceful picketing" in labor disputes involving terms or conditions of employment.

Report is Complete on Steel Reinforcement in Concrete Roads

An excellent progress report of the Special Investigation on the Economic Value of Steel Reinforcement in Concrete Roads was presented by C. A. Hogentogler, Chairman of that investigation, at a recent meeting of the Executive Committee of the Highway Research Board of the National Research Council. Mr. Hogentogler expressed appreciation for the splendid co-operation and assistance received in the course of this study from the various state highway departments and other organizations.

The report showed that inspections have been completed on 375 miles of plain and reinforced concrete roads, varying in age from one to ten years, and containing approximately 300 comparisons of slabs with and without steel which were subjected to the same influencing conditions. These roads are located in Massachusetts, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, Georgia, and Ohio. The states still listed for inspection are Michigan, Illinois, Missouri, Wisconsin, Iowa, Utah, Washington, California, Texas, and Mississippi.

It is thus assured that a sufficient

number of direct comparisons will be made to warrant drawing definite conclusions regarding the effect of steel as influenced by age, design, traffic, climate, and subgrade, as well as by the type, weight, and placement of the reinforcement itself. Detailed sketches, designs, and tables are being prepared which will give basic comparisons and a summary of results. Maintenance costs of both plain and reinforced concrete roads have also been secured on a large mileage. These costs are in such detail as to show how the maintenance is influenced by any desired variable.

The final report on this investigation will be one of the most complete studies on concrete roads ever undertaken. It will be presented at the Fifth Annual Meeting of the Highway Research Board to be held in Washington, D. C., on December 3 and 4, 1925. As a supplementary feature of this report it is expected to have papers presented by representatives of several states which have compiled special information on plain and reinforced concrete roads. It is planned to devote one of the sessions of the Annual Meeting of the Highway Research Board to the discussion of this report.

NORTH CAROLINA CONTRACTORS NAME LICENSE BOARD

The board of registration under the contractors' license law of North Carolina has just organized and is preparing to carry out the provisions of the new statute. The board consists of Harry P. Grier, Statesville, chairman; U. A. Underwood, Wilmington, vice-chairman; R. L. Goode, Charlotte, treasurer; C. D. Rigsbee, Durham, and H. C. Caldwell, Asheville.

Contractors who were in business in the state prior to March 6, 1925, will receive licenses without an examination. Announcements made in several publications that the operation of the law has already demonstrated its benefits are premature. It will take a year or more to determine just what advantages will accrue from the law either to contractors or to the public.

JOINS NATIONAL EXCHANGE

The Contra Costa County Builders' Exchange, with headquarters in Richmond, is now affiliated with the National Association of Builders' Exchanges. The certificate of membership was received and read at the meeting, which was presided over by President E. H. Higgins. The national association has headquarters in Pittsburgh, Pa.

WASHINGTON GOOD ROADS MEET SET FOR SEPTEMBER

The program for the Washington state good roads convention to be held in Hoquiam September 4 and 5 has been prepared by representatives of Hoquiam civic and service organizations. Douglas Shelor, secretary of the Automobile club of Washington, attended and declared that about 700 delegates would attend the conclave.

Sessions will be held morning and afternoon of Friday, September 4, with luncheon at Hotel Emerson and a banquet in Aberdeen in the evening. Business will be completed Saturday morning. Delegates will then be taken to Pacific Beach in the afternoon. Excursions to Lake Quinalt, ocean beaches and other scenic resorts of the county will be arranged for Sunday, September 6.

Superior Judge William E. Campbell was named general chairman for the convention.

RETURN TO WORK

The strike of hod carriers and plasterers' laborers in Pittsburgh recently ended when the men compromised their demand for \$1.12½ per hour by accepting \$1.09½. The scale was previously \$1 per hour.

Poor Workmanship, Improper Design, Inferior Materials Cause of S. B. Quake Damage

In view of the unconfirmed and diversified rumors and reports as to the failures of structural materials in the Santa Barbara earthquake, the California Common Brick Manufacturers' Association and Allied Interests, desirous of securing facts for the good of the building industry and building owners requested H. J. Hammer, J. H. Little and T. Ronneberg, San Francisco consulting structural engineers, to make detailed study and report. The members of this committee of engineers were selected on account of their prominence in active building construction work in San Francisco immediately following and continuing since 1906. The report of the engineers is published herewith—EDITOR.

Structural Steel Frame

The only structural steel frame building coming under our observation is the United States Post Office Building. The floor construction is of concrete with concrete fireproofing around the structural steel members. The exterior is a stone base with brick backing, above which there are brick curtain walls covered with cement stucco plaster and terra cotta trim. The interior of the post office is finished in only ornamental terra cotta with exposed steel floor construction. The main ceiling is of white vaulted construction. The building has withstood the earthquake with the exception of minor damage to the interior.

Reinforced Concrete

Santa Barbara has a large number of various types of reinforced concrete construction, and demonstrated clearly that properly designed and constructed buildings of this material came through the catastrophe exceptably well.

As an example of flat slab reinforced concrete construction, take the Latham's Fireproof Storage. This building is five stories high with reinforced concrete exterior walls. The concrete is of fair quality and the design apparently well conceived except for some details. The slight damage done to this building occurred at the exterior end walls where the proper consideration apparently was not given to bending in outside wall columns. As a whole the structure is a tribute to its type, and the slight damage done can be repaired at a minor cost.

Another building of flat slab construction is a two story concrete frame building with brick filler walls, occupied by the Coast Wholesale Grocery Co. The exterior columns in this case were evidently designed for bending, with the result that there were no failures in any of the columns. However, due to shifting of combination tie and retaining wall, there was a slight separation of the columns from the base on the north side of the building. The entire brick parapet dropped off due to lack of anchorage. The brick filler walls stood very well, except in a few instances, and these failures were due primarily to lack of bond between the face brick and the brick backing and also between the brick and concrete frame.

In reference to the total or partial collapse of other concrete buildings such as the San Marcos Office Building, Arlington Hotel, the building occupied by the Barbara Top & Trimming Works, etc., we attribute these failures to flagrant violation of proper

design, poor materials, poor workmanship or a combination of all three.

In reference to concrete structural frame with terra cotta tile filler walls, of which there are a considerable number, it is sufficient to take two examples quite similar in general character. The St. Francis Hospital failed quite seriously structurally. In the filler walls and in the partitions. General observation would indicate that the columns were slender and of insufficient size to properly take care of bending, although apparently sufficient for direct vertical loads in spite of the fact that the concrete is of poor quality. In direct connection with this failure there is the St. Vincent Orphanage, a building of similar design except that the columns seemed to be of larger proportions and of better materials and workmanship, the damage being confined to a few minor consequential cracks. That this building was subjected to severe earthquake strain is evidenced by the fact that portions of the heavy tile roof were shifted in sections. The moving of this tile roof has no connection with the structural stability of the building.

Brick Buildings

In reference to masonry construction, the brick type is more numerous and therefore the successes and failures of brick buildings are more apparent. The failure of brick buildings in every instance is due to poor material, poor workmanship or poor design or a combination of all three. Without exception the mortar in the destroyed buildings is of very poor quality and in many instances the particular bricks used are unsuitable for building purposes and quite generally they were laid up without leader or bond courses or proper ties.

Of the veneer type, there are many old buildings which apparently were at some time dressed up with a brick facing four inches thick, laid up in poor mortar and anchored to the wood by the use of nails. In some cases this veneer pulled away from the frame and the brick walls collapsed as shown in the three-story Hotel Neal, 217 State Street.

In contrast to this, there is the Recreation Center Building, a wood frame construction with a four-inch brick veneer facing. In very good condition showing good materials and good workmanship.

Of the brick bearing wall type the failure of the California Hotel, among many others, is the most outstanding example of poor material, workmanship and design. On the other hand there are many brick structures of this type remaining and with good workmanship. The Franklin School, the A. M. C. A. Building, the Banca Ponderosa, Pucatz, etc., show the results of good construction.

In this connection attention is called to the Commercial Trust & Savings Bank Building which is of brick construction and in which the two street fronts have ornamental terra cotta facing backed with brick. Except for a small section in the upper part of the rear wall, the structure is intact.

Terra Cotta Hollow Tile Bearing Walls

While many of the hollow terra cotta bearing walls failed for the same reasons as given for other masonry, there are, however, a number of structures of this type in good condition. The Nash Auto Sales Co., a one story building at 327 State Street, constructed of twelve inch hollow tile wall laid in good mortar and well bonded, supporting wood roof trusses spanning about 45 feet, withstood the shock almost perfectly, a few slight cracks at openings in rear wall being the only damage.

Street Front Walls of Brick Buildings

Probably the most common failure of brick buildings is the falling out of the front and rear walls. Without exception where these failures occurred, they can be attributed to the lack of bonding and tying, particularly at connection of the end walls to the side walls. This is evidenced by the fact that some of the buildings which had been remodelled on street fronts have remained perfectly intact. For example the St. Charles Market, a one story white glazed brick front and the Hunt Mercantile building, a two story brick front building, indicated that these fronts had been remodelled comparatively recently with good materials and workmanship and the side wall elevations show clearly that the new brick work had been well bonded back into the side walls. These two buildings are on either side of the Morning Press building which is a three story brick construction, of which the front was badly damaged. This building, in addition to being laid up in poor mortar, clearly showed lack of bond between front and side walls.

In regard to street front walls, particularly where long spans over store fronts are involved, and the masonry above is supported by lintels, it cannot be too strongly emphasized that the greatest care must be taken both in the details adopted and in the construction of the work.

Parapet Walls and Chimneys

The failure of parapet walls and chimneys is so common and yet is so important to public safety that every precaution should be taken to accurately anchor and tie these to their main structure.

Conclusion

All architects, engineers, contractors, building materials people and building owners should visit Santa Barbara immediately to see and study the effects of the recent earthquake. The destroyed

buildings are an indictment against poor structural design, inferior materials and careless workmanship. This is so self-evident even to a layman that it needs no theoretical arguments because it is plainly and practically demonstrated by the fact that in the midst of the ruins there remain standing intact as a monument to skill and integrity, structural steel framing, reinforced concrete construction, brick buildings, terra cotta wall construction, and wood frame buildings.

In every building damaged in the earthquake at Santa Barbara, the damage is due not to the kind of material used nor the type of construction attempted but to poor workmanship, inferior quality of materials, improper design or a combination of the three.

For a number of years after the destruction of San Francisco in 1906, the phrase "Lest we forget" was the universal slogan and warning. But as time rolled on, the people have forgotten and through ignorance or selfishness, poor construction is creeping in. Let us revive the phrase "Lest we forget" and insist that all buildings be properly designed and carefully inspected and constructed with good materials, honest and careful workmanship.

TRADE NOTES

Robert Inglis, Dan Schroedel and A. A. Hauerbach have purchased the stock control of the San Joaquin Lumber Company with headquarters in Stockton. The three men have been connected with the company since its organization fifteen years ago. The purchase of control was made from the Coos Bay Lumber Company, which has held the controlling interest in the local organization from the first.

The Payne Furnace and Supply Company is now installed in a new plant at 334-336 Foothill Drive, Beverly Hills. The plant occupies a site of 150 feet by 329 feet. Increased shipping facilities and the improved location of the new factory are expected to greatly broaden the activities of the concern.

The California Clay Company announces a change of trade name to California Materials, Inc., with headquarters at 1917 Stockton Blvd., Sacramento. The same management and conscientious effort to maintain service will be maintained, according to officials of the company.

Capitol Construction Company of Sacramento has been incorporated. The company is capitalized at \$500,000 and has the following directors: Harry Berry of Sacramento; Henrietta Jewett and M. Berger.

A. L. Markwell, 1502 Jackson street, Oakland, and C. M. Murray of Pacific Grove, will operate under the trade name of Mission Building Material Company.

T. C. Farris, Jr., general contractor, has moved his headquarters from 1325 Paloma Ave., Burlingame, to the Commercial Building, San Mateo.

Julius C. Born and Ernest A. Reed will operate the Marin Sheet Metal Works with headquarters in San Anselmo.

\$40,089,354 is Pacific Coast Construction Total for July

Although \$40,089,354 in building permits issued during July is the total of the reports from 81 of the principal cities of the seven Pacific Coast States, this figure shows a 15% reduction from the June record, a reduction chiefly attributable to seasonal influence. The figure, however, is 2% above the record of July of last year, is slightly above that of the figure for July of 1922 and is 12% above that of July, 1923, as shown by the National Monthly Building Survey of S. W. Strauss & Co.

Following are the official July, 1925, building construction figures reported to us by building department officials of 81 cities of the seven Pacific Coast States:

CALIFORNIA:	July, 1925	July, 1924	June, 1925

PRATT'S CONCRETE MIX

Charm
by Sand
Pratt

NOTE:—The following story has been published before in these columns, but as the story says, "history repeats itself." Therefore Sandy Pratt gives it to a waiting world again.

ACROSS THE American River.
 FROM THE sand-producing plant.
 OF THE Pratt Building Material Co.
 AT SACRAMENTO, California.
 ARE MANY auto campers.
 AND SANDY Pratt, President.
 OF THIS sand and rock company.
 WAS UNDER the belief.
 THAT THE old Indian style.
 OF HAVING the squaw.
 DO ALL the work.
 WAS NOW ancient history.
 SANDY WAS led to believe.
 THAT NO man now lived.
 WHO WOULD dare.
 ASK OR force his wife.
 TO WASH dirty clothes.
 WITH AN old fashioned tub.
 AND AN ordinary wash board.
 NOT LONG ago Sandy was.
 ON THE above river bank.
 AND ON the opposite side.
 WAS A woman washing.
 WITH A galvanized tub.
 WHILE HER brave husband.
 SAT SMOKING on a log.

UNDER THE shade.
 SANDY THOUGHT no woman.
 WOULD WASH for her husband.
 UNLESS SHE had an electric machine.
 COSTING SEVERAL hundred dollars:
 BUT HISTORY repeats itself.
 THERE IS one brave husband left.
 IN THIS good old world.
 "I THANK you."

A scene on the bank of the American River when Miss 1925, who never saw a galvanized wash tub or an old fashioned washboard, saw the squaw-like wife washing her husband's clothes near Sandy Pratt's sand plant.
